CANADA. BUREAU OF STATISTICS

EMPLOYMENT AND PAYROLLS, with average weekly earnings
(JANUARY 1964)

(DOMINION BUREAU OF STATISTICS)
(Labour Division
Employment Section)

DOMINION BUREAU OF STATISTICS

Labour Division

Employment Section

EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

JANUARY 1964

Published by Authority of

The Minister of Trade and Commerce

April 1964
8003-501

Price \$3.00 per year
30 cents per copy

Volume 42, No. 1

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

72-001 — Advance Statement on Employment and Weekly Earnings—Monthly—Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

72-003 — Man-Hours and Hourly Earnings—Monthly—Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

72-005 — Estimates of Labour Income—Monthly—Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

72-006 — Hiring and Separation Rates in Certain Industries—Semi-Annual—Price \$1.50 per year

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

72-201 — Review of Employment and Payrolls—Annual—Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

72-202 — Review of Man-Hours and Hourly Earnings—Annual—Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

72-203 — Earnings and Hours of Work in Manufacturing—Annual—Preliminary Report—Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

72-204 — Earnings and Hours of Work in Manufacturing—Annual—Final Report—Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

72-502 — Labour Income, 1926-58 — Price 75 cents

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,
JANUARY, 1964

Summary

The industrial composite index of employment (1949=100) declined less than seasonally from December to January. The January index, at 123.3, was down 1.5 p.c. from December 1963. As is usual for the time of year, most major industrial divisions declined. More than half the overall reduction occurred in trade, reflecting the layoff of casual employees taken on during the Christmas season.

Seasonally adjusted, the industrial composite rose from 127.4 in December to 129.0 at the end of January. Over one third of the gains originated in the construction industry where a contra-seasonal rise in the building and general engineering component was a major factor in raising the seasonally-adjusted index by 5.5% to 133.9, its highest level since the fall of 1957. In addition to the gains in construction, there were percentage increases of 1.0 p.c. or more in the adjusted indexes for forestry, mining, trade, service and transportation, storage and communication. The adjusted index for manufacturing advanced by 0.6 p.c. to 120.3 in January due largely to a marked rise in durables. In this component, expansion continued in transportation equipment, wood and iron and steel products.

All regions shared in the expansion in employment. Increases in the seasonally-adjusted industrial composites for the regions ranged from 0.9 p.c. in British Columbia to 2.6 p.c. in the Atlantic Region.

The industrial composite of average weekly wages and salaries rose seasonally by \$3.34 to \$84.98 in January. This increase was \$2.97 above the same month last year. The payroll index for January, at 246.0 was 2.6 p.c. above the December 1963 figure of 239.8 and 8.5 p.c. above the January 1963 index of 226.7.

EMPLOYMENT

Manufacturing

The seasonally-adjusted employment index for manufacturing rose by 0.6 p.c. from December to 120.3 in January. The increase in January was largely a result of an advance of 1.1 p.c. in the durables component. The adjusted index for non-durables rose fractionally.

The seasonally-adjusted index for durable goods manufacturing rose from 125.7 in December to 127.1 in January. The increase marked a continuation of the acceleration in growth rate which began in July 1963. Since that month, the index has risen by 6.7 p.c. and is now only 1.6 p.c. below the post-war high of 129.1 recorded in the winter of 1956-1957.

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

The December-to-January increase for durable goods resulted from above-average increases in the wood, iron and steel, and transportation equipment industries. In wood, all component industries recorded larger-than usual advances as the industry reacted to expansion in the construction industry and increased foreign demand. In iron and steel, all component industries improved over the previous month except agricultural implements for which employment rose less than seasonally.

Transportation equipment continued to lead the way among the major industry groups in durables. In January, the motor vehicle and motor vehicle parts and accessories industries experienced large staff increases although usually there is little change between these months. Railroad and rolling stock equipment and ship-building and repairing reported above-average advances.

The seasonally-adjusted index for non-durable goods manufacturing, at 114.6, was virtually unchanged in January. In general, most component industries reported changes in line with usual seasonal behaviour. However, improvement was indicated in rubber, textiles and miscellaneous manufacturing industries.

Non-Manufacturing Industries

Increases in seasonally-adjusted employment indexes occurred in all non-manufacturing industrial divisions. In the goods producing industries, forestry was up 4.1 p.c., mining 1.0 p.c. and construction 5.5 p.c. The rise in forestry resulted from smaller-than-seasonal reductions in Quebec. Construction has expanded sharply since the middle of 1963. Since July the index has risen by 13.0 p.c. from 118.5 to 133.9. However, over a third of the rise was recorded between December and January due to a large contra-seasonal advance in building and general engineering.

The increase in mining may reflect changing seasonal patterns in coal mining in Nova Scotia. Historically coal mining in that province has been only mildly responsive to seasonal factors. However, from 1959 to 1962 the industry was characterized by large reductions in employment in the winter and early spring. During the past 18 months the reductions have not occurred and seasonal employment patterns have resembled those existing prior to 1959.

The adjusted indexes for the service producing industrial divisions all reported marked gains from December to January. In transportation, storage and communication the adjusted index rose by 1.0 p.c. as expansion continued in water transportation and storage. A rise of 1.1 p.c. was recorded in trade due to smaller-than-seasonal reductions in retailing.

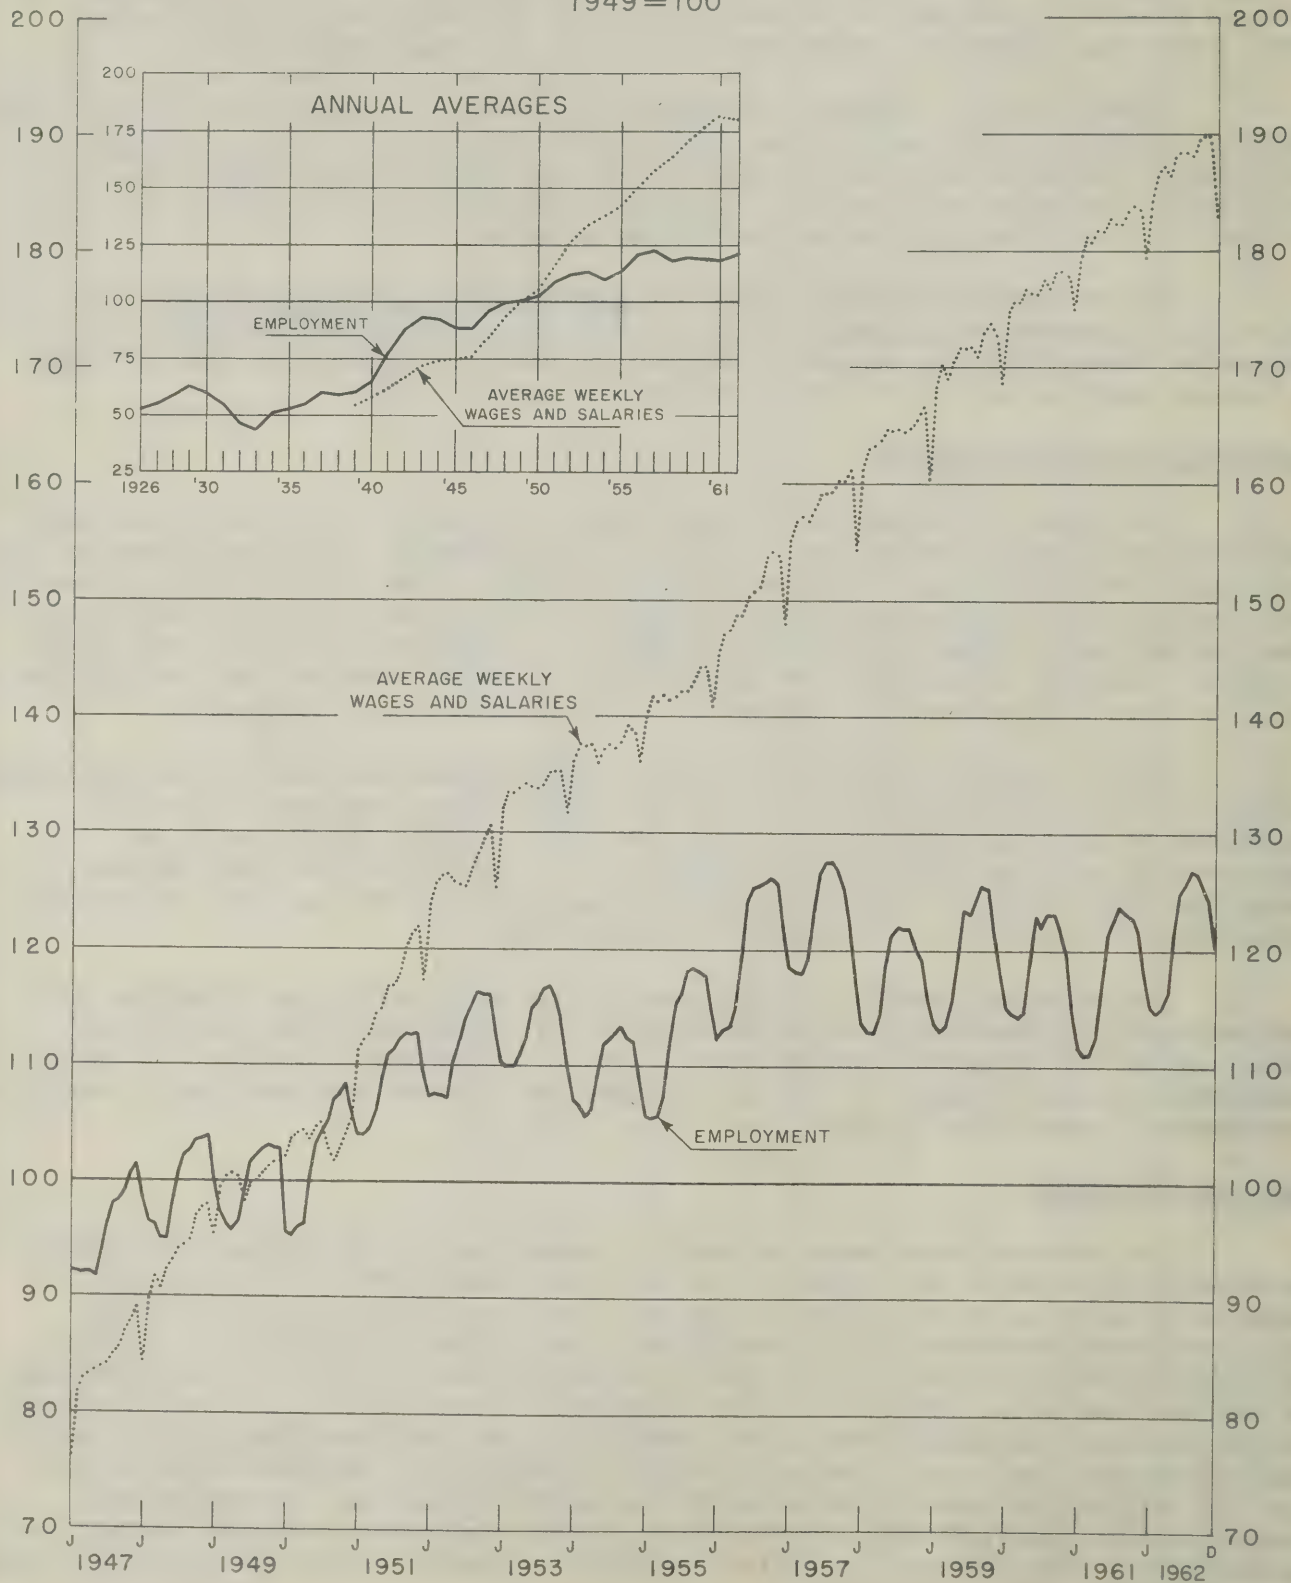

Regional Employment

The seasonally-adjusted industrial composites for all regions showed marked increases from December to January. The increases ranged from 0.9 p.c. in British Columbia to 2.6 p.c. in the Atlantic region. The large advance in the Atlantic Region reflected movements in the mining and construction industries. In Quebec the adjusted index rose by 1.6 p.c. due to above-average increases in manufacturing and smaller-than-usual reductions in forestry and construction. In Ontario, above-average increases in manufacturing and service and smaller-than-usual reductions in construction and trade were the main factors in raising the adjusted index by 1.2 p.c. In the Prairie Region, the adjusted index rose by 1.6 p.c. as employment strengthened in manufacturing, construction, trade, and transportation, storage and communication. The increase in British Columbia reflected larger-than-usual increases in manufacturing and construction.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

(COMPOSITES OF NINE NON-AGRICULTURAL INDUSTRIES)

1949 = 100

AVERAGE WEEKLY WAGES AND SALARIES

The industrial composite of average weekly wages and salaries rose by \$3.34 to \$84.98 from December to January. A large rise between these months is usual because average earnings tend to be low in December due to short time during the Christmas season. The latest figure was \$2.97 above the same month last year.

The large rise in per-capita earnings reflected increases of \$12.82 in construction, \$3.94 in manufacturing, and 3.94 in mining. Advances in these industries were due to the Christmas effect mentioned above. An additional factor, contributing to the rise in the composite was extensive seasonal layoffs of casual employees in trade who had been taken on in November and December at below average rates.

Year-to-Year Percentage Changes in Average Weekly
Wages and Salaries by Industry Division, Canada, 1956-63

Industry Division	Percentage Change in average weekly wages and salaries

TABLE 8. Sex Distribution of Employees Reported, by Industries, Canada - Concluded

Industries	January, 1964					December, 1963		January, 1963	
	Both sexes	Men	Women	Men	Women	Men	Women	Men	Women
	number			per cent					
Manufacturing — Concluded:									
Transportation equipment	140,847	129,252	11,595	91.8	8.2	91.9	8.1	91.8	8.2
Aircraft and parts	28,700	25,892	2,808	90.2	9.8	90.2	9.8	89.7	10.3
Motor vehicles	39,965	37,627	2,338	94.1	5.9	94.4	5.6	93.5	6.5
Motor vehicle parts and accessories	26,925	21,911	5,014	81.4	18.6	81.8	18.2	81.5	18.5
Railroad and rolling stock equipment	20,209	19,904	305	98.5	1.5	98.6	1.4	98.4	1.6
Shipbuilding and repairing	21,558	20,818	740	96.6	3.4	96.4	3.6	96.8	3.2
Non-ferrous metal products	54,651	48,537	6,114	88.8	11.2	88.9	11.1	88.6	11.4
Aluminum products	8,613	7,323	1,290	85.0	15.0	84.9	15.1	84.1	15.9
Brass and copper products	8,951	7,913	1,038	88.4	11.6	88.4	11.6	87.9	12.1
Smelting and refining	27,432	26,684	748	97.3	2.7	97.2	2.8	97.2	2.8
Electrical apparatus and supplies	85,834	59,869	25,965	69.7	30.3	65.5	30.5	69.6	30.4
Heavy electrical machinery	19,265	14,934	4,331	77.5	22.5	77.7	22.3	77.5	22.5
Telecommunication equipment	22,808	13,984	8,824	61.3	38.7	60.1	39.9	60.3	39.7
Non-metallic mineral products (k)	37,551	33,404	4,147	89.0	11.0	89.0	11.0	88.8	11.2
Clay products	4,347	3,871	476	89.0	11.0	89.6	10.4	90.3	9.7
Glass and glass products	10,202	8,228	1,974	80.7	19.3	79.9	20.1	79.8	20.2
Concrete products	9,312	8,846	466	95.0	5.0	95.3	4.7	95.6	4.4
Products of petroleum and coal	15,504	13,319	2,185	85.9	14.1	85.8	14.2	88.4	11.6
Petroleum refining and products	14,980	12,842	2,138	85.7	14.3	85.6	14.4	88.2	11.8
Chemical products	56,928	44,677	12,251	78.5	21.5	78.5	21.5	78.3	21.7
Medicinal and pharmaceutical preparations	8,148	4,571	3,577	56.1	43.9	55.7	44.3	56.3	43.7
Acids, alkalis and salts	10,006	9,365	641	93.6	6.4	93.6	6.4	92.5	7.5
Other chemical products (l)	38,774	30,741	8,033	79.3	20.7	79.4	20.6	79.8	20.2
Miscellaneous manufacturing industries	40,209	25,898	14,311	64.4	35.6	64.7	35.3	65.3	34.7
Construction									
Building and general engineering (m)	229,523	221,463	8,060	96.5	3.5	96.6	3.4	96.4	3.6
Building	148,615	143,223	5,392	96.4	3.6	96.4	3.6	96.3	3.7
General engineering	126,788	122,317	4,471	96.5	3.5	96.5	3.5	96.4	3.6
Highways, bridges and streets	21,827	20,906	921	95.8	4.2	95.9	4.1	95.7	4.3

EMPLOYMENT, URBAN AREAS
INDUSTRIAL COMPOSITE
1949=100

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

**Estimated Provincial Coverage of all Paid Workers,
June 1, 1951**

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

Price \$3.00 per year
30 cents per copy

Volume 42, No. 2

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58** — Price 75 cents
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,
FEBRUARY, 1964

Summary

The industrial composite index of employment (1949=100) was 123.0 at the end of February, down slightly from the January figure of 123.3. Among the major industrial divisions, increases in manufacturing and service were outweighed by decreases in forestry, construction and trade. There was little change in the remaining divisions.

Seasonally-adjusted, the industrial composite rose from 129.0 in January to 129.4 in February, marking the seventh successive month for which a month-to-month increase was recorded. The seasonally-adjusted indexes for most major industrial divisions also advanced, with the largest percentage gains occurring in forestry and service. The seasonally-adjusted index for manufacturing showed a reduced rate of increase as the expansion in durables was dampened by industrial disputes in shipbuilding and repairing in British Columbia. There were declines in the adjusted indexes for construction and transportation, storage and communication.

The seasonally-adjusted indexes for Newfoundland, Nova Scotia, New Brunswick, Ontario and Alberta advanced in February. The adjusted index for Quebec was unchanged while the indexes for the remaining provinces declined.

The industrial composite of average weekly wages and salaries was \$85.72 in February, up 62 cents from January 1964 and \$2.81 from February 1963. The payroll index for February, at 247.4, was up 0.4 p.c. from January 1964 and 8.5 p.c. above the February 1963 figure of 228.1.

Employment

Manufacturing

The seasonally-adjusted index of employment for manufacturing rose from 120.4 in January to 120.8 in February. This is smaller than the month-to-month increases consistently recorded since July 1963 when the current upsurge began. Industrial disputes in shipbuilding and repairing were major factors slowing down the rate of advance.

The seasonally-adjusted index for durable goods manufacturing rose by 0.5 p.c. to 127.7 at the end of February. The latest increase brought the index to within 1.1 p.c. of the post-war high of 129.1 recorded in the winter of 1956-1957. The rapid expansion in durables which commenced in mid-1963 continued and was evident in all component industries.

Between January and February, there was further improvement in iron and steel, non-ferrous metals and non-metallic mineral products but a contra-seasonal reduction in transportation equipment. The changes in electrical apparatus and supplies and non-metallic mineral products followed usual seasonal patterns.

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

For footnotes (a) to (w) see page iii.

In transportation equipment, railroad and rolling stock equipment recorded a contra-seasonal advance, thus continuing an expansion which began in the summer of 1963. Increases in aircraft and parts, motor vehicles and motor vehicle parts and accessories were seasonal. The only weakening occurred in shipbuilding and repairing in which industrial disputes in British Columbia reduced employment in the industry by 6.7 p.c.

The seasonally-adjusted index for non-durable goods manufacturing rose from 114.8 in January to 115.1 in February due to strengthening in food and beverages and miscellaneous manufacturing industries. The remaining components recorded movements that differed little from usual seasonal patterns.

Non-Manufacturing

Between January and February the seasonally-adjusted index of employment in forestry rose by 2.8 p.c. Large month-to-month fluctuations in the adjusted index for forestry are not uncommon; this industry has a large erratic element due in part to its high sensitivity to weather conditions. The seasonally-adjusted indexes for mining and construction declined, although the decrease in mining was small. In construction, the seasonally-adjusted index declined by 1.1 p.c. in February after advancing by over 5 p.c. from December 1963 to January 1964. This industry has shown vigour since June 1963 although it declined in the first half of 1963. The latest index, at 132.2, is 10.4 p.c. above June 1963.

There were increases in the seasonally-adjusted indexes for all service-producing industrial divisions except transportation, storage and communication. The largest advance occurred in service, continuing the accelerated growth-rate in evidence in that division during the past fifteen months. A moderate rise in trade reflected smaller-than-seasonal reductions in the retailing component. The seasonally-adjusted index for transportation, storage and communication recorded a moderate decline in February due to a smaller-than-seasonal increase in water transportation and a contra-seasonal decrease in storage.

Regional Employment

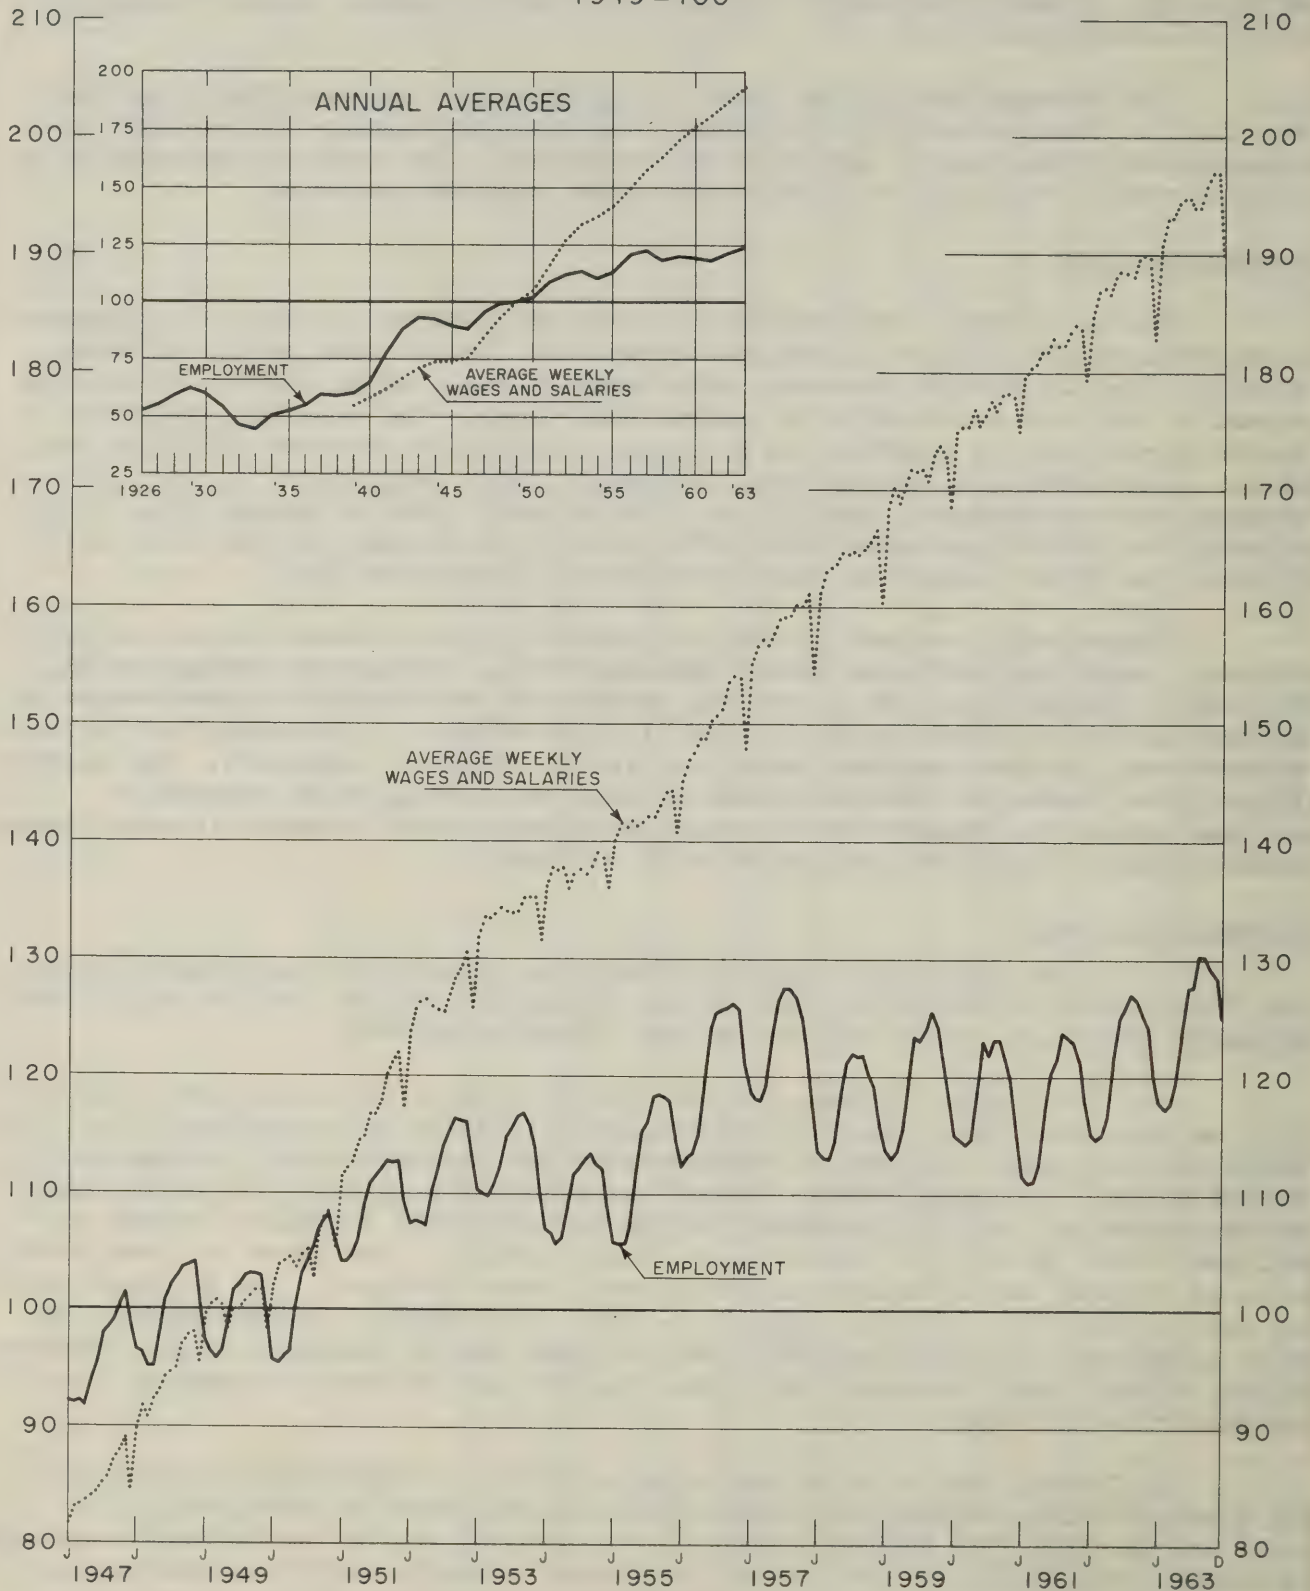

Only the seasonally-adjusted indexes for Ontario and the Atlantic Region rose from January to February. The indexes for Quebec and the Prairie Region were virtually unchanged while that for British Columbia declined.

In the Atlantic Region, the seasonally-adjusted index rose by 1.6 p.c. to 112.6 as employment fell less than seasonally in forestry and construction and recorded above-average increases in manufacturing and transportation, storage and communication. The gains between January and February originated in Newfoundland and New Brunswick where the seasonally-adjusted industrial composite indexes of employment rose by 2.7 p.c. and 2.3 p.c., respectively. The index for Nova Scotia advanced slightly while that for Prince Edward Island declined. The adjusted index for Ontario rose from 130.8 in January to 131.8 in February. In that region, all major industrial divisions improved over the month except construction and transportation, storage and communication. However, the main sources of expansion were manufacturing and trade.

In Quebec, the index was unchanged at 128.7 as weakening in construction and transportation, storage and communication was balanced by strengthening in trade and service. The adjusted index for the Prairie Region was virtually unchanged in February at 139.0. In that region, employment strengthened in manufacturing, mining and trade but weakened in construction and transportation, storage and communication.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES (COMPOSITES OF NINE NON-AGRICULTURAL INDUSTRIES)

1949 = 100

The seasonally-adjusted index for British Columbia declined by 0.7 p.c. to 124.6 in February. The decrease reflected an above-average decrease in manufacturing due to industrial disputes in shipbuilding and repairing. An additional factor was a larger-than-seasonal reduction in transportation, storage and communication. These losses were offset to some extent, by increases in construction and service that were larger than usual for the time of year.

AVERAGE WEEKLY WAGES AND SALARIES

The industrial composite of average weekly wages and salaries rose by 62 cents to \$85.72 at the end of February. The gain reflected increases in all major industrial divisions except mining which was virtually unchanged. The largest increases occurred in forestry (\$9.12), construction (\$1.78) and transportation, storage and communication (\$1.23).

Per capita earnings in manufacturing rose by 13 cents to \$88.96 at the end of February. This increase was smaller than usual and reflected a decline in durables of 12 cents. This decrease resulted from lower earnings and reduced employment in the relatively highly-paid shipbuilding and repairing industry.

Per capita earnings were up in all provinces. The increases ranged from \$1.76 in British Columbia to 20 cents in Ontario.

Table 2.-Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, Goods-Producing Industries

INDEX NUMBERS OF EMPLOYMENT, CANADA GOODS-PRODUCING INDUSTRIES

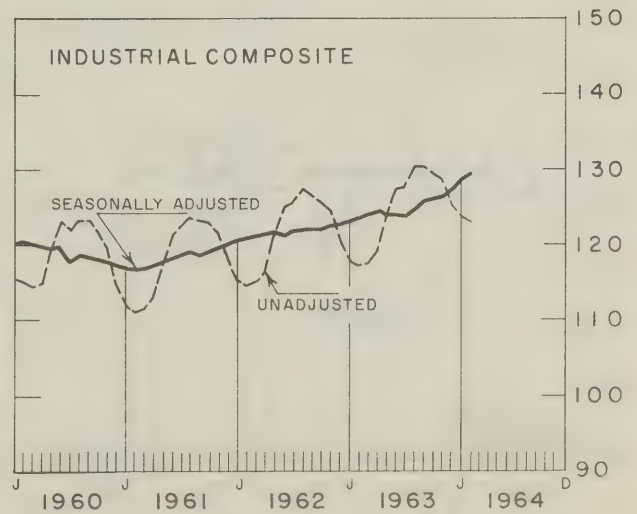

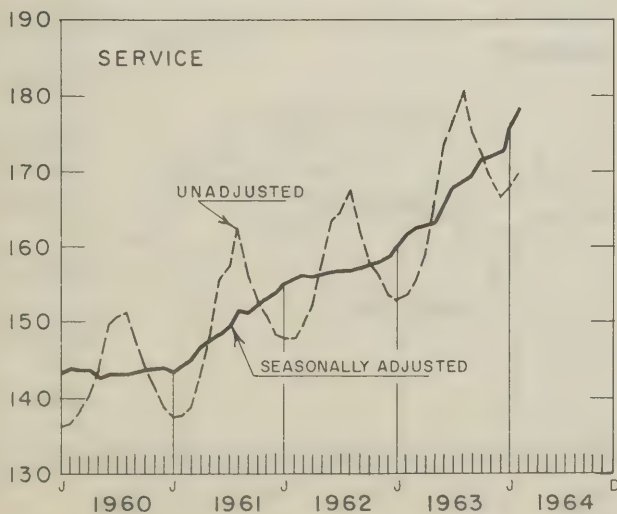

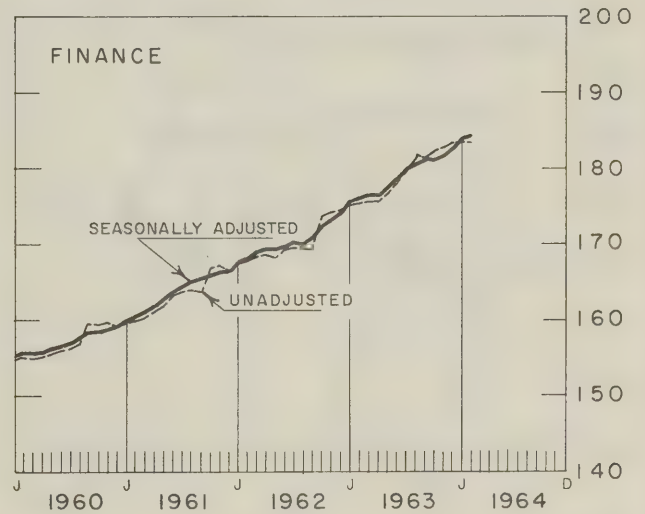

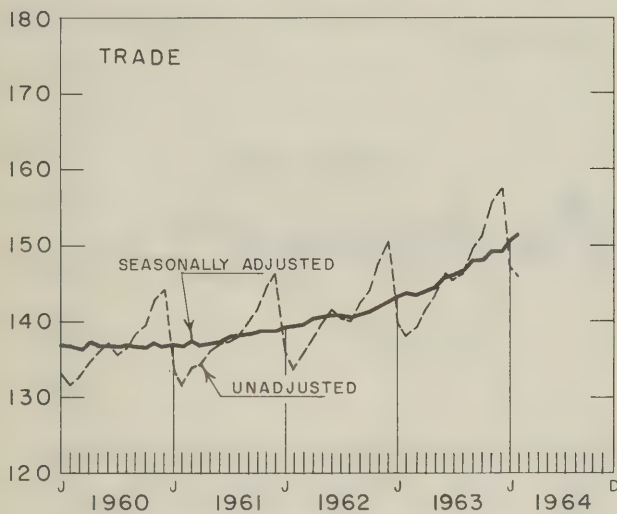

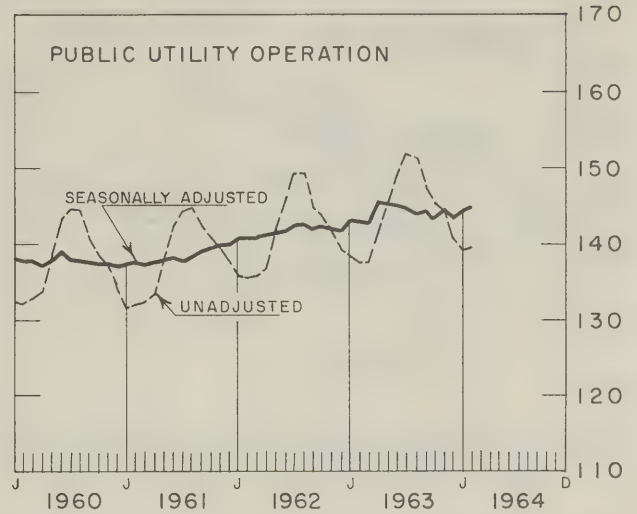

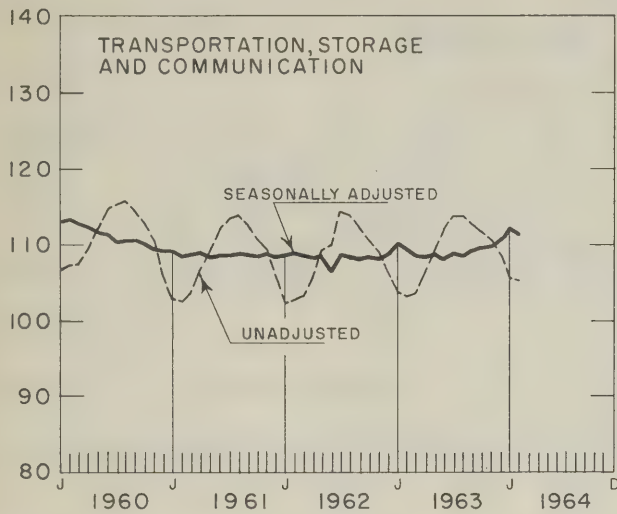

1949=100

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON

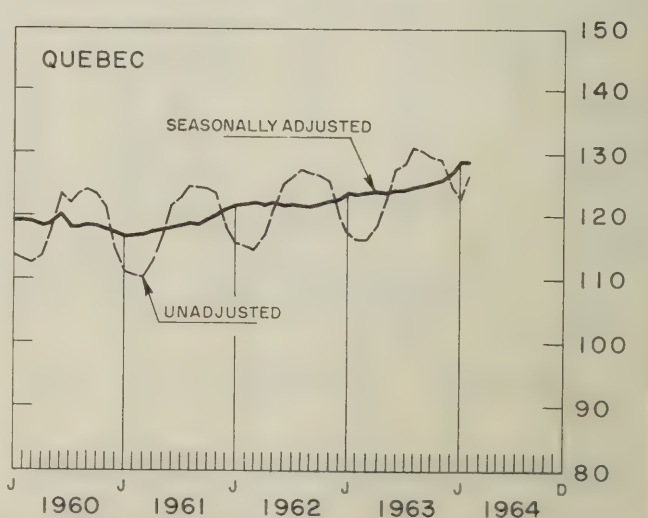

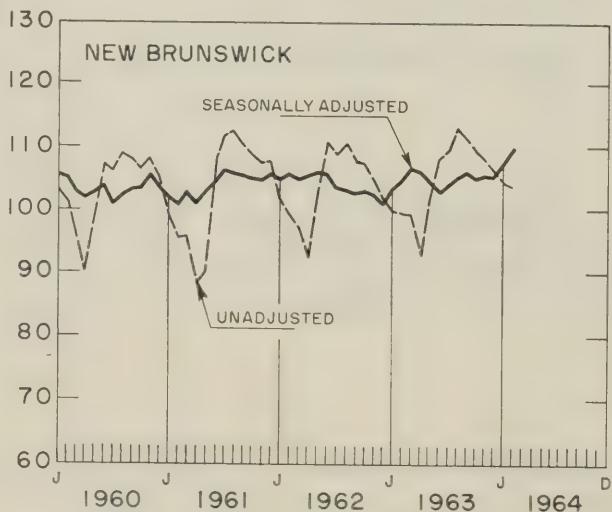

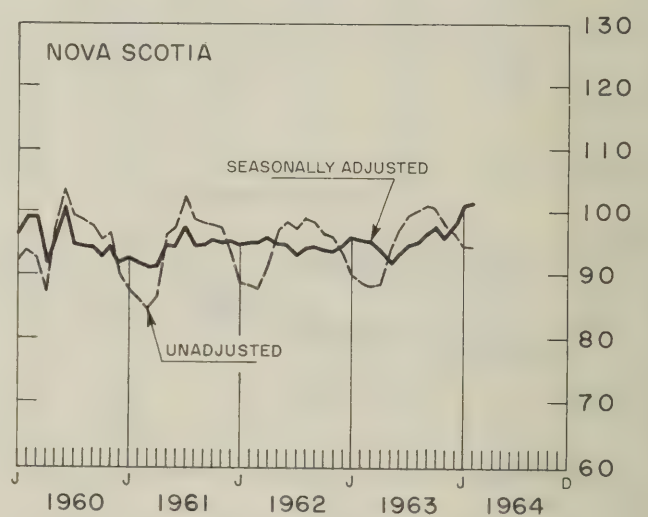

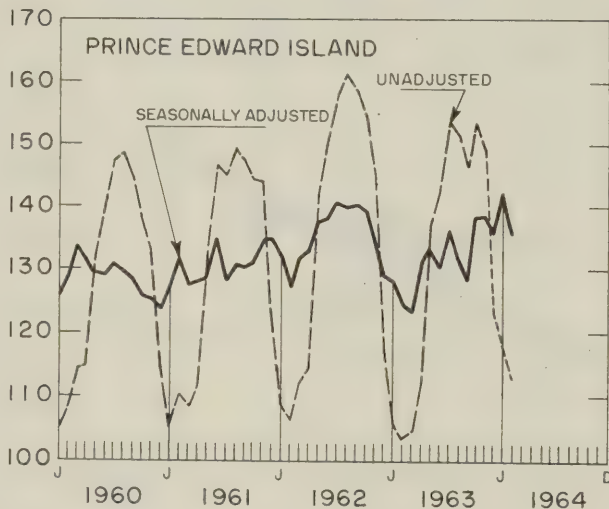

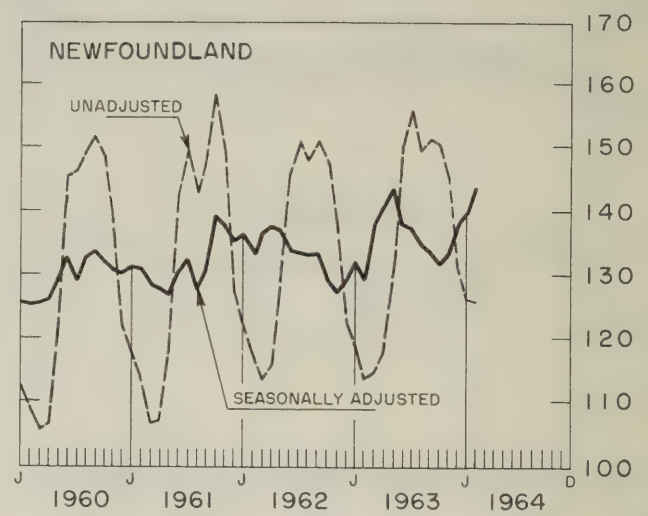

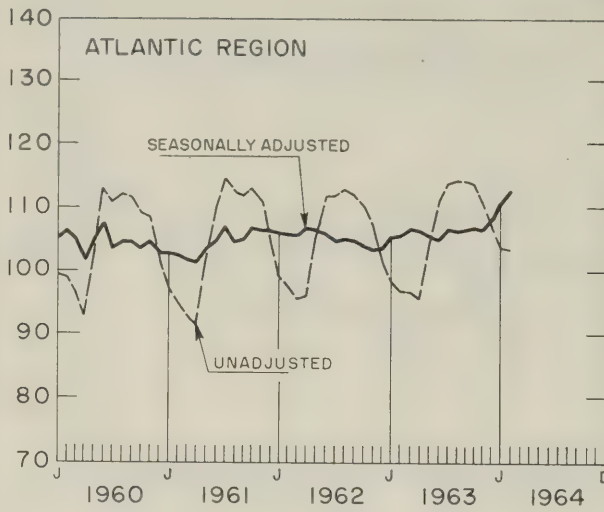

INDEX NUMBERS OF EMPLOYMENT, CANADA SERVICE-PRODUCING INDUSTRIES

1949=100

INDEX NUMBERS OF EMPLOYMENT, ATLANTIC REGION AND EASTERN PROVINCES

1949=100

INDEX NUMBERS OF EMPLOYMENT, ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

1949=100

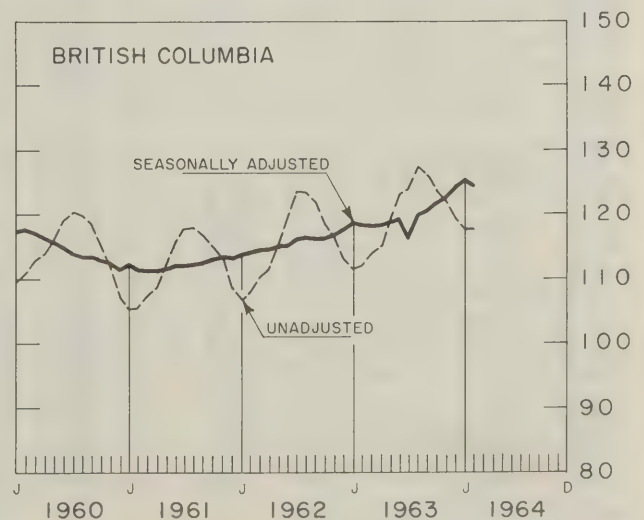

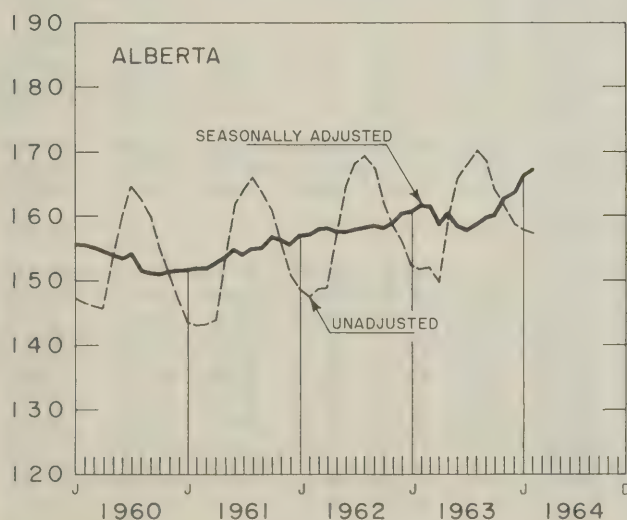

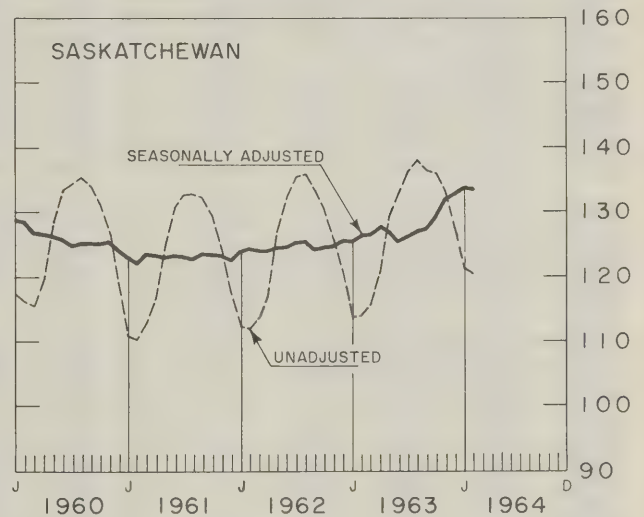

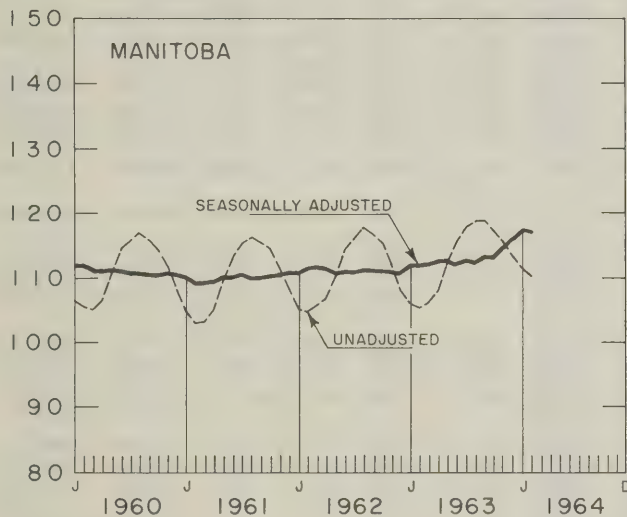

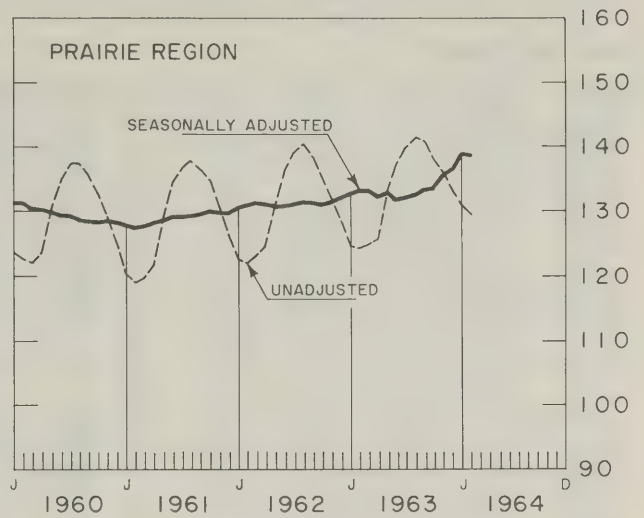

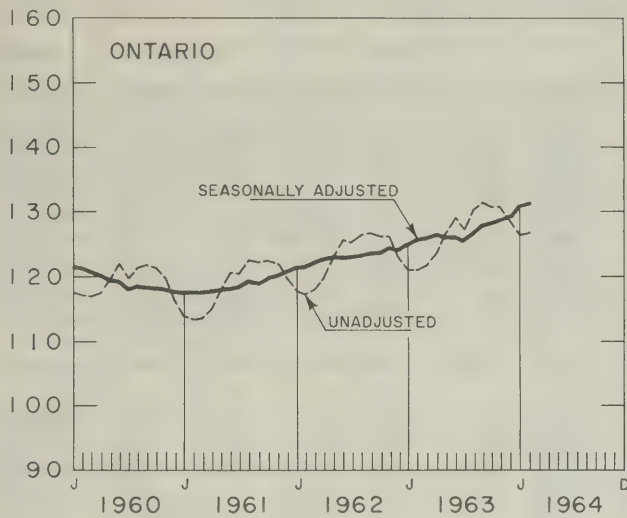

TABLE 4 Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Esti- mated cov- erage (w)	Employment indexes				Average weekly wages and salaries				Employees reported February 1964
		Feb. 1964	Jan. 1964	Feb. 1963	Feb. 1962	Feb. 1964	Jan. 1964	Feb. 1963	Feb. 1962	
	%	1949 = 100				dollars				number
Forestry (chiefly logging)	76	61.9	70.1	57.0	65.6	94.12	85.00	89.09	85.46	44,857
Mining	96	113.2	112.7	112.5	113.7	106.00	105.99	102.81	98.65	100,033
Metal mining		124.5	124.4	126.3	127.3	104.88	105.03	101.90	98.91	58,804
Gold (a)		64.1	64.3	66.6	68.3	86.80	86.72	83.40	81.23	14,588
Other metal (b)		180.6	180.4	181.8	182.0	110.85	111.10	108.20	105.08	44,216
Iron		281.2	277.0	280.7	218.0	125.50	125.36	119.52	115.19	9,384
Uranium	116.75	116.82	116.52	117.09	3,904
Fuels		88.7	88.3	86.5	88.4	112.76	112.65	109.80	103.23	27,249
Coal		39.4	39.6	39.5	39.6	83.14	84.34	80.32	72.58	9,710
Oil and natural gas		288.7	285.5	278.3	297.5	129.16	128.60	126.87	120.70	17,539
Non-metal (c)		134.3	131.3	126.8	126.4	97.51	96.91	92.89	88.18	13,980
Asbestos		180.8	179.2	175.7	180.5	105.65	106.01	103.47	96.94	6,805
Manufacturing	92	117.6	117.0	112.2	108.9	88.96	88.83	85.41	82.74	1,272,965
Durable goods (u)		124.8	123.9	117.6	112.0	95.74	95.86	91.96	89.23	615,175
Non-durable goods (u)		111.6	111.3	107.7	106.3	82.61	82.29	79.42	77.01	657,790
Food and beverages		107.2	107.3	104.5	103.9	78.82	78.48	75.99	73.45	151,424
Meat products		129.5	131.3	126.6	127.9	84.64	85.49	83.46	81.13	29,503
Dairy products		116.6	115.8	115.3	115.5	74.37	73.88	71.90	69.11	14,385
Canned and cured fish		85.9	81.3	77.3	77.8	55.43	50.71	51.88	48.81	9,786
Canned and preserved fruits and vegetables		84.7	84.7	82.0	77.6	71.05	70.34	68.24	69.75	11,847
Grain mill products		96.0	95.0	95.5	97.3	87.43	87.11	83.75	79.22	9,052
Bread and other bakery products		109.7	109.5	108.6	107.9	74.18	73.85	70.11	67.71	22,899
Biscuits and crackers		94.5	93.2	93.1	89.6	69.06	71.58	66.77	64.26	6,804
Distilled and malt liquors		91.7	91.1	90.4	91.5	109.94	109.57	105.20	99.68	12,823
Other beverages (d)		148.1	149.4	136.9	136.9	78.93	76.63	75.13	72.59	10,942
Confectionery		89.0	95.0	90.5	84.4	63.60	62.99	60.39	58.77	8,882
Tobacco and tobacco products		99.9	106.7	116.8	114.1	79.32	80.23	77.35	72.20	10,141
Rubber products		115.9	115.5	107.6	100.8	91.20	91.29	89.07	85.82	23,038
Leather products		90.2	89.7	90.7	90.9	61.38	60.83	57.51	56.75	29,713
Boots and shoes (except rubber)		94.9	94.4	97.9	98.7	59.61	59.25	55.81	54.59	20,185
Other leather products (f)		81.5	81.3	77.5	76.8	65.15	64.16	61.43	61.75	9,528
Textile products (except clothing)		88.5	87.9	82.6	80.6	71.19	71.29	67.83	65.75	66,233
Cotton yarn and broad woven goods		76.8	76.4	72.2	74.9	68.76	68.99	64.30	63.48	18,703
Woollen goods		65.7	65.2	62.4	59.6	65.06	65.08	62.82	61.19	9,927
Synthetic textiles and silk (t)		105.5	104.0	94.2	89.3	77.99	77.82	74.83	71.03	18,049
Clothing (textile and fur)		100.4	99.2	94.9	93.0	57.05	55.90	54.21	52.30	108,217
Men's clothing		104.7	103.1	98.8	94.8	55.82	55.33	53.21	51.09	36,620
Women's clothing		113.0	110.7	105.3	103.7	59.25	57.30	56.33	54.53	30,866
Knit goods		75.2	75.9	72.6	73.4	56.18	55.34	53.05	51.56	19,507
Fur goods		54.0	54.5	58.5	58.6	85.15	80.98	78.76	72.71	2,426
Wood products		113.4	112.1	105.0	101.8	77.56	76.20	74.84	71.22	106,549
Saw and planing mills (g)		116.9	115.2	107.2	103.1	80.35	78.63	77.90	73.56	69,592
Furniture		122.3	121.8	115.0	110.9	74.02	73.43	70.62	68.45	27,859
Other wood products (h)		78.2	77.6	73.6	77.8	67.08	66.26	65.12	63.51	9,098
Paper products		126.2	126.2	121.6	120.7	102.86	102.34	98.34	96.52	94,869
Pulp and paper mills		125.6	126.1	121.0	120.3	110.81	110.35	106.20	104.43	66,681
Other paper products (i)		127.5	126.5	122.9	121.6	84.06	83.17	79.80	78.09	28,188
Printing, publishing and allied industries		126.4	125.8	124.5	125.1	96.94	96.17	93.31	89.54	60,715
Iron and steel products		116.5	114.8	110.9	103.4	100.03	100.07	96.97	93.74	189,135
Agricultural implements		73.2	71.3	71.2	62.1	107.36	107.25	105.50	97.80	12,879
Boilers and plate work		115.1	112.9	123.9	107.2	97.20	96.24	93.14	92.42	7,218
Fabricated and structural steel		143.9	140.8	143.2	147.3	101.32	100.83	98.96	94.06	10,822
Hardware and tools		122.0	119.3	112.0	102.9	88.25	88.44	85.37	82.54	13,862
Heating and cooking appliances		109.6	105.9	102.3	97.6	87.13	87.39	83.87	80.20	9,415
Iron castings		106.0	104.8	96.6	90.3	96.49	95.77	92.75	90.35	20,694
Machinery (j)		119.4	118.3	114.7	105.9	96.05	96.53	92.97	89.21	36,971
Industrial machinery (r)		138.1	136.7	130.9	119.8	96.70	96.96	93.70	89.80	29,328
Primary iron and steel		133.9	133.0	125.6	117.3	113.45	113.95	110.45	107.90	40,302
Sheet metal products		116.1	115.3	111.9	104.0	96.16	96.19	92.94	90.79	18,373
Wire and wire products		121.9	119.7	112.9	109.7	99.15	98.21	94.61	93.31	10,081

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

**Estimated Provincial Coverage of all Paid Workers,
June 1, 1951**

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan.....	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

8003-501

Price: 30 cents
\$3.00 a year

Volume 42, No. 3

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58**—Price 75 cents
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,
March, 1964

Summary

The industrial composite index of employment (1949=100) rose by 0.3 p.c. from 123.0 in February to 123.4 in March. Most major industrial divisions advanced but the gains were offset to some extent by decreases in forestry, mining and public utility operation. A large reduction in forestry is usual in March as logging operations are greatly curtailed in Eastern Canada.

Seasonally adjusted, the industrial composite index of employment showed a small increase from 129.4 in February to 129.6 in March. Among the major industrial divisions, the only significant advance occurred in forestry, due largely to smaller-than-seasonal reductions in the Quebec region. The increase in forestry was balanced by decreases in construction and mining; in the latter division, the reduction resulted from major layoffs in coal mining in Nova Scotia. There was little change in the remaining industrial divisions.

The seasonally-adjusted indexes for most provinces declined from February to March. The only increases were recorded in Newfoundland, Quebec and Ontario. However, the gains in those provinces balanced losses elsewhere.

The industrial composite of average weekly wages and salaries declined by 49 cents to \$85.25 in March. The latest figure was \$2.31 above March 1963. The payroll index for March, at 246.9, was down 0.3 p.c. from February 1964, but up 7.7 p.c. from March 1963.

EMPLOYMENT

Manufacturing

The seasonally-adjusted index of employment for manufacturing rose from 120.9 in February to 121.2 in March, thus continuing the slow-down in the rate of growth first noted in February. This slackening reflected conditions in the durables component where the rapid expansion characteristic of the sector during the last half of 1963, has not been in evidence during the first quarter of 1964. The adjusted index for non-durables continued to advance, rising by 0.5 p.c. to 115.7 in the current month.

The seasonally-adjusted index for durable goods manufacturing for March, at 127.8, was unchanged from February. This was the first time the adjusted index had shown no monthly increase since July 1963. The slackening in March 1964 resulted from a contra-seasonal decline in wood products, which offset larger-than-seasonal increases in iron and steel, non-ferrous metals and non-metallic mineral products. The decline in wood products was due in part to an industrial dispute in Ontario.

An increase in transportation equipment was about average for March. In this industry group, contra-seasonal advances in aircraft and parts and motor vehicles were balanced by smaller-than usual increases in railroad and rolling stock equipment and shipbuilding and repairing.

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

The advance in non-durable goods manufacturing resulted from above-average increases in textile, paper and chemical products. The rise in chemical products was due in part to the settlement of a major industrial dispute in the acids component. The only weakening occurred in food and beverages where there were contra-seasonal reductions in the vegetable and fish canning industries.

Non-Manufacturing Industries

Forestry was the only major industrial division for which the seasonally-adjusted index of employment showed a large rise from February. The index for mining fell by over 3 p.c. following extensive layoffs in coal mining in Nova Scotia. The adjusted index for construction declined in March as a contra-seasonal decrease occurred in the building component; however, this downward influence was offset to some extent by larger-than-usual increases in highways, bridges and streets.

The adjusted indexes for the service-producing industrial divisions showed little change from February to March. In transportation, storage and communication, there were larger-than-seasonal increases in water and truck transportation but these gains were offset by a contra-seasonal decline in railways.

Regional Employment

Regionally, only the seasonally-adjusted industrial composite indexes of employment for Quebec and Ontario advanced over the month. Industrial employment in Quebec rose by 1.2 p.c. to 130.1, reflecting improvement in forestry and construction. In Ontario, the adjusted index rose by 0.4 p.c. to 132.3 in March as a result of strengthening in most major industrial divisions; however, the overall gain was modified by weakening in construction.

The adjusted indexes for the Atlantic region, Prairie region and British Columbia declined from February to March. In the Atlantic region, the index fell by 2.4 p.c. to 110.1 due, mainly, to extensive layoffs in coal mining; however, larger-than-seasonal reductions in manufacturing and transportation, storage and communication also contributed to the decline. In the Prairie region, employment was down by 0.6 p.c. to 138.4 as a result of weakening in construction. The seasonally-adjusted industrial composite for British Columbia decreased from 124.6 in February to 123.3 in March as employment slackened in manufacturing, construction and trade.

AVERAGE WEEKLY WAGES AND SALARIES

The industrial composite of average weekly wages and salaries was \$85.25 in March, down 49 cents from February. A factor contributing to the overall decline was a decrease in construction of \$5.57, due to the observance of Good Friday as an unpaid holiday. An additional factor was that large reductions in staffs occurred in the relatively highly paid forestry and mining industries.

Per capita earnings were down in every province, except Newfoundland. The decreases ranged from 36 cents in Saskatchewan to \$1.40 in New Brunswick. In Newfoundland, per capita earnings rose by 93 cents as some canning and mining firms paid premium rates for work performed on the holiday.

Table 2.-Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, Goods-Producing Industries

Year and Month	Forestry (chiefly logging)		Mining		Manufacturing						Construction

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan.....	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58**—Price 75 cents
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS
APRIL, 1964

Summary

The industrial composite index of employment (1949=100) rose from 123.5 in March to 124.6 at the end of April. The increase marked the beginning of the seasonal upturn in employment in outdoor activities as gains of 5.8 per cent and 2.4 per cent were recorded in construction and in transportation, storage and communication, respectively.

Seasonally-adjusted, the industrial composite declined from 129.4 in March to 129.1 in April. The decrease resulted primarily from reductions in construction and trade. In the former, employment failed to rise in highway, bridge and street construction to the same extent as in earlier years. In the latter, there was a contra-seasonal decline in the retail component. These losses, together with smaller decreases in public utility operation and transportation, storage and communication were offset to some extent by substantial increases in forestry and mining. In the latter, the gain resulted from the return of coal miners in Nova Scotia who had participated in a sympathy walkout in March.

Regionally, only the seasonally-adjusted index for the Atlantic region was improved from March. The indexes for Quebec and Ontario declined, while those for the Prairie region and British Columbia were virtually unchanged.

The industrial composite of average weekly wages and salaries rose by \$1.01 to \$86.28 in April, a larger-than-usual increase for the time of year. The rise in April reflected a return to a more usual work week in construction after short time in March as a result of Good Friday falling in the reference period. For a similar reason, the payroll index rose markedly by 2.1 per cent to 252.3.

Compared to last year, per capita earnings were \$2.75 higher and payrolls were 7.8 per cent higher.

Employment

Manufacturing

The seasonally-adjusted index for manufacturing was unchanged in April at 121.2, thus continuing the slowdown in the rate of growth first noted in February. The slackening reflected conditions in the durables component where the rapid expansion characteristic of the sector during the last half of 1963 has not been in evidence during the first quarter of 1964. Over the six-month period between July 1963 and January 1964 durables advanced from 118.2 to 126.8, a rise of 7.3 per cent. Over the three-month period between January and April, the index rose by 0.9 per cent to 127.9. The adjusted index for non-durable goods manufacturing also slowed down in the first quarter of 1964. Non-durables rose by 3.1 per cent to 115.1 from July 1963 to January 1964 but by 0.3 per cent to 115.5 between January and April in 1964.

The seasonally-adjusted index for durable goods manufacturing was unchanged between March and April at 127.9 as most components recorded movements that did not differ substantially from usual seasonal patterns. There was a slightly greater-

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

than-seasonal advance in transportation equipment due to the partial settlement of an industrial dispute in shipbuilding in British Columbia. However, gains in the transportation equipment group were offset by somewhat smaller-than-seasonal increases in iron and steel products and non-metallic mineral products.

The seasonally-adjusted index for non-durable goods manufacturing was also unchanged from March to April because of offsetting movements among the major industry groups. Tobacco products showed a small rise between March and April although the industry usually records a relatively large decline at that time. Increases in printing, publishing and allied industries and miscellaneous manufacturing industries were larger-than-seasonal. These gains were balanced by an above-average decline in clothing and smaller-than-seasonal increases in paper and chemical products.

Non-Manufacturing Industries

The seasonally-adjusted indexes for forestry and mining advanced from March to April while the index for construction declined. The gains in forestry reflected strengthening in every region except British Columbia. In mining, employment increased sharply in the coal component as miners in Nova Scotia returned to work. The downturn in construction reflected movements in the highway, bridge and street construction component. This component usually records a large increase between March and April but this year the advance was relatively small.

In the service-producing industrial divisions, the seasonally-adjusted indexes for service and finance, insurance and real estate increased over the month; however, the rise in service was slight. The indexes for trade, public utility operation and transportation, storage and communication declined over the month. In trade, there was a contra-seasonal reduction in the retailing component resulting from the laying off of casual employees taken on to meet the Easter demand. In transportation, storage and communication, the decrease in the adjusted index resulted from a smaller-than-seasonal increase in water transportation in Quebec.

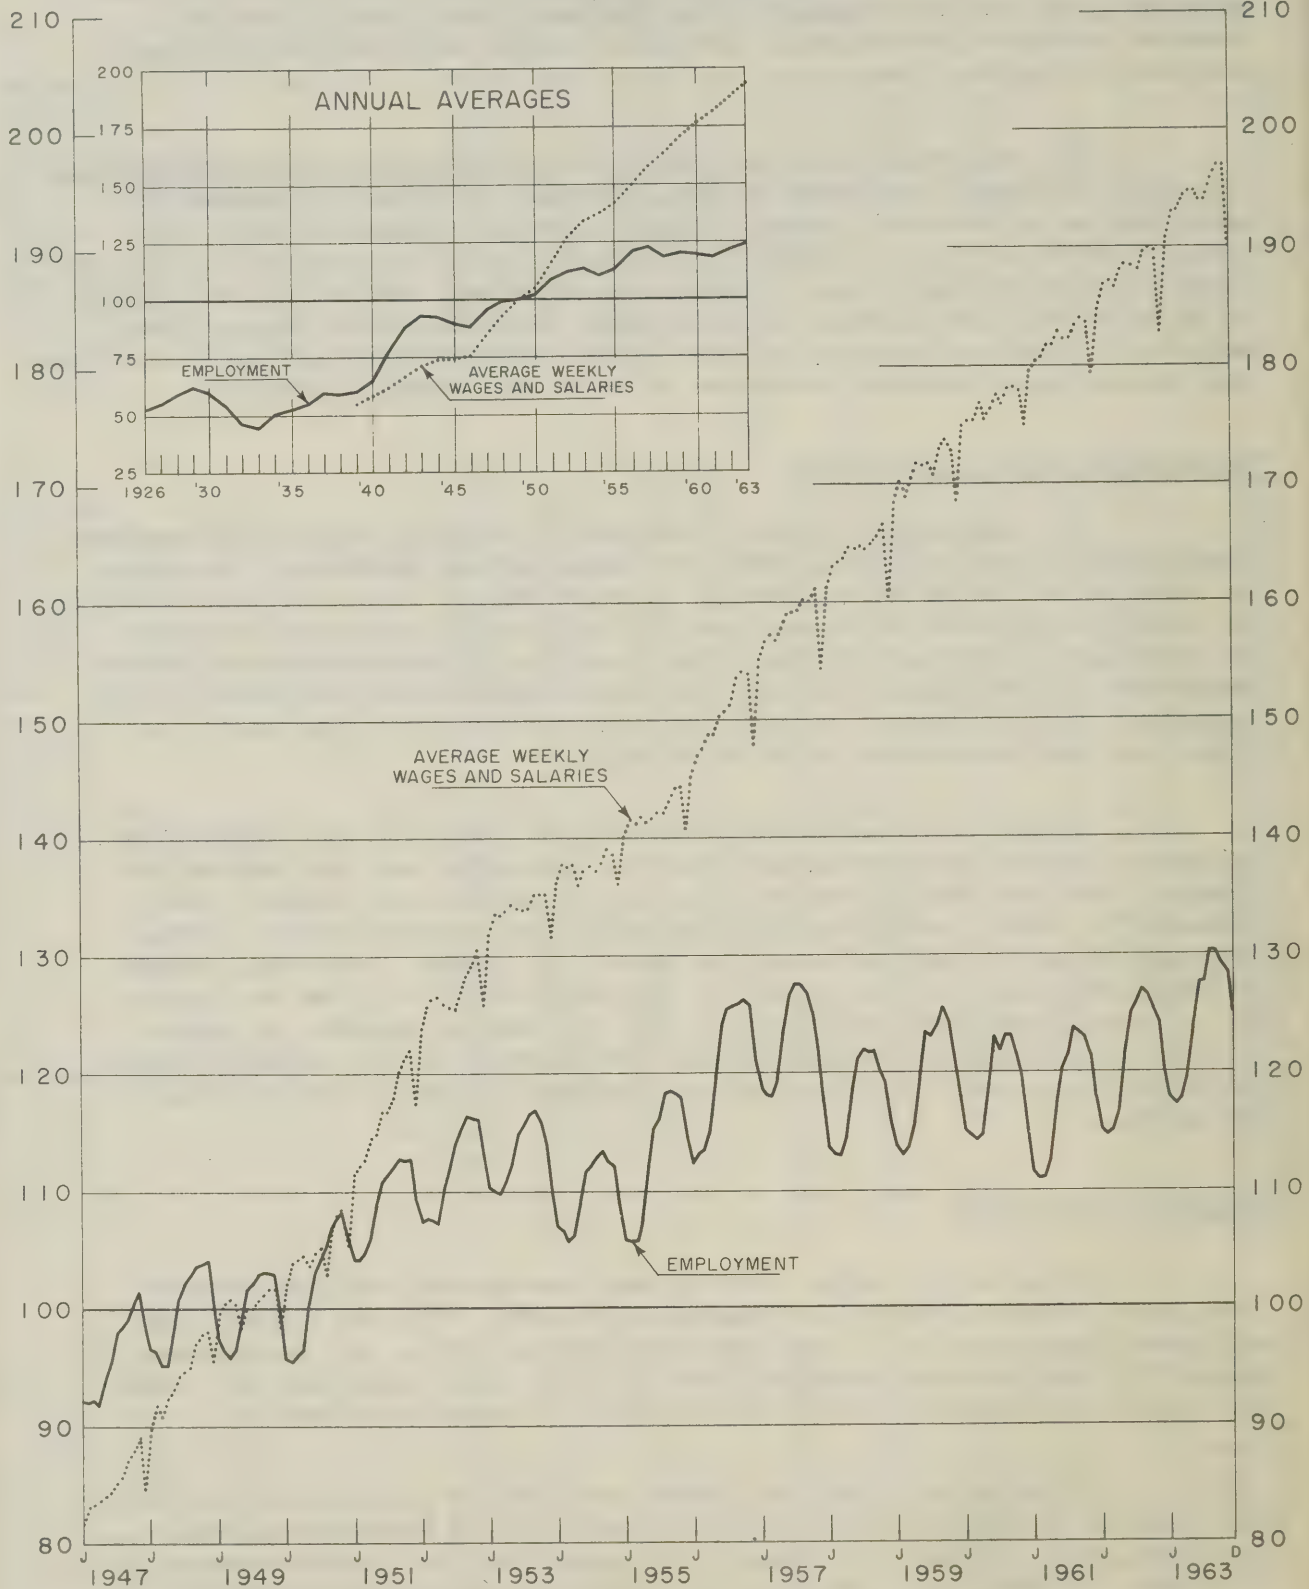

Regional Employment

The Atlantic region was the only one showing any improvement from March after allowing for seasonal movements. In this region, the adjusted index rose by 2.0 per cent to 111.1 in April. All provinces shared in the increase; however, over half the gain reflected the return to work of coal miners in Nova Scotia after a sympathy walkout.

The adjusted index for Quebec declined by 0.8 per cent to 128.9 in April as employment rose less than seasonally in construction and transportation, storage and communication and declined contra-seasonally in trade. Slackening in construction and trade also accounted for a decline in Ontario from 132.1 in March to 131.6 in April.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES (COMPOSITES OF NINE NON-AGRICULTURAL INDUSTRIES)

1949 = 100

The adjusted indexes for the Prairie region and British Columbia were virtually unchanged in April at 137.6 and 123.2 respectively. In the Prairie region, the major industrial divisions recorded changes that differed little from usual seasonal movements. In British Columbia, there was a mild strengthening in most major divisions, but this was offset by a contra-seasonal reduction in construction resulting from a major industrial dispute in the highway, bridge and street component.

Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by \$1.01 to \$86.28 in April. The large advance reflected increases in average earnings in all major industrial divisions except forestry and mining. The largest advance occurred in construction where per-capita earnings rose by \$4.95. This marked increase reflected a return to more usual hours of work after short time in March due to Good Friday. Also contributing to the large increase in construction was the fact that employment in the building and general engineering equipment, where average earnings tend to be above the general average, increased relative to that for highway, bridge and street construction, where earnings tend to be below the general average.

Per-Capita earnings in manufacturing rose by 74 cents in April as the durables component increased by \$1.20. A major factor contributing to the advance in durables was a rise of \$3.15 in the transportation equipment group resulting from increases of \$5.00 or more in the motor vehicle and motor vehicle parts and accessories industries. There was an increase of 30 cents in non-durable goods manufacturing. In that component, average earnings rose by a dollar or more in tobacco, rubber and leather products and by 92 cents in paper products.

EMPLOYMENT, URBAN AREAS
INDUSTRIAL COMPOSITE
1949=100

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

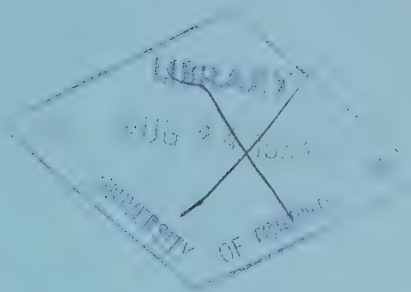

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58** — Price 75 cents
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS, MAY 1964

SUMMARY

The industrial composite index of employment (1949=100) advanced by 3.5 per cent to 128.9 in May, as most outdoor industries began to intensify operations. Employment increased in all major industrial divisions over the month, with over three quarters of the overall gains originating among the goods-producing industrial divisions.

Seasonally-adjusted, the industrial composite was unchanged at 129.0, reflecting offsetting movements among the major industrial divisions. A large advance in forestry and smaller gains in public utility operation, trade, service and finance, insurance and real estate were balanced by declines in mining, construction and transportation, storage and communication.

The seasonally-adjusted index for manufacturing was virtually unchanged in May, as a small increase in non-durables was offset by a decrease in durables. The decline in the seasonally-adjusted durables index reflected developments in wood products where a major industrial dispute in British Columbia caused the April-to-May advance in the saw and planing mills industry to be substantially below the seasonal average.

Quebec was the only region for which the seasonally-adjusted index of employment rose from April to May. The advance in that region resulted from an above-average increase in forestry. The adjusted index for Ontario was unchanged while those for the remaining regions declined.

The industrial composite of average weekly wages and salaries rose by 47 cents from April to May. The May figure, at \$86.80, was \$3.11 above May 1963. The payroll index for May, at 262.6, was 4.0 above April 1964 and 8.1 per cent above the May 1963 figure of 242.9.

EMPLOYMENT

Manufacturing

The seasonally-adjusted index for manufacturing was virtually unchanged in May at 120.8, as movements in the two major components were offsetting. The lack of movement in May continued the slow-down first noted in February 1964. This slackening has been evidenced by both components although it has been more pronounced in durables. Generally, the weakening would appear to be related to the stockpiling of building materials by construction firms in anticipation of the institution of the second stage of the sales tax and to various government incentives calculated to shift some summer construction to the winter months. As a result, the month-to-month requirements in the spring of 1964 have been below average. In April and May this slackening was amplified by industrial disputes in shipbuilding and wood products.

The seasonally-adjusted index for durable goods manufacturing declined slightly in May. All component industries increased over the month but only transportation

Note: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

For footnotes (a) to (w) see page iii.

equipment and non-ferrous metal products reported gains that were above average. Increases in electrical apparatus and supplies and non-metallic mineral products were seasonal in size while those for wood and iron and steel products were less than seasonal.

The advance in transportation equipment resulted from above-average increases in shipbuilding and repairing, and in railroad and rolling stock equipment; the marked rise in the former industry followed settlement of a major industrial dispute in British Columbia. Increases in motor vehicles and aircraft and parts corresponded to typical seasonal movements but the rise in motor vehicle parts and accessories was slightly below average.

Wood products rose less than seasonally in May due to a major industrial dispute in the saw and planing mills component. The wood products industry has indicated some weakening in recent months due to the shifts in seasonal demand mentioned above. Slackening in iron and steel reflected a contra-seasonal reduction in heating and cooking appliances and below-average increases in fabricated and structural steel and sheet metal products.

The seasonally-adjusted index for non-durable goods manufacturing showed a small rise from April to May, as most component industries recorded changes that did not differ substantially from usual seasonal patterns. Above-average increases in textile, petroleum and chemical products and a smaller-than-usual decline in clothing continued the expansion evident in those industries for several months. A seasonal advance in paper products, despite a major industrial dispute in British Columbia, underlined the strength in that industry. Only rubber products indicated weakening, the April-to-May increase being below average.

Non-Manufacturing Industries

Forestry was the only goods-producing industrial division which rose over the month; the gains in that division were due to a substantial increase in Quebec, where some firms increased staffs for the summer cutting season a little earlier than usual. A reduction in mining reflected a contra-seasonal decline in coal due to the shut-down of a major colliery in Nova Scotia as a result of fire. Construction declined for the fourth successive month, as the April-to-May increase in building and general engineering in the Prairie and Atlantic Regions was smaller than usual. There were small advances in the seasonally-adjusted indexes for all the service-producing industrial divisions except transportation, storage and communication which showed a slight decline.

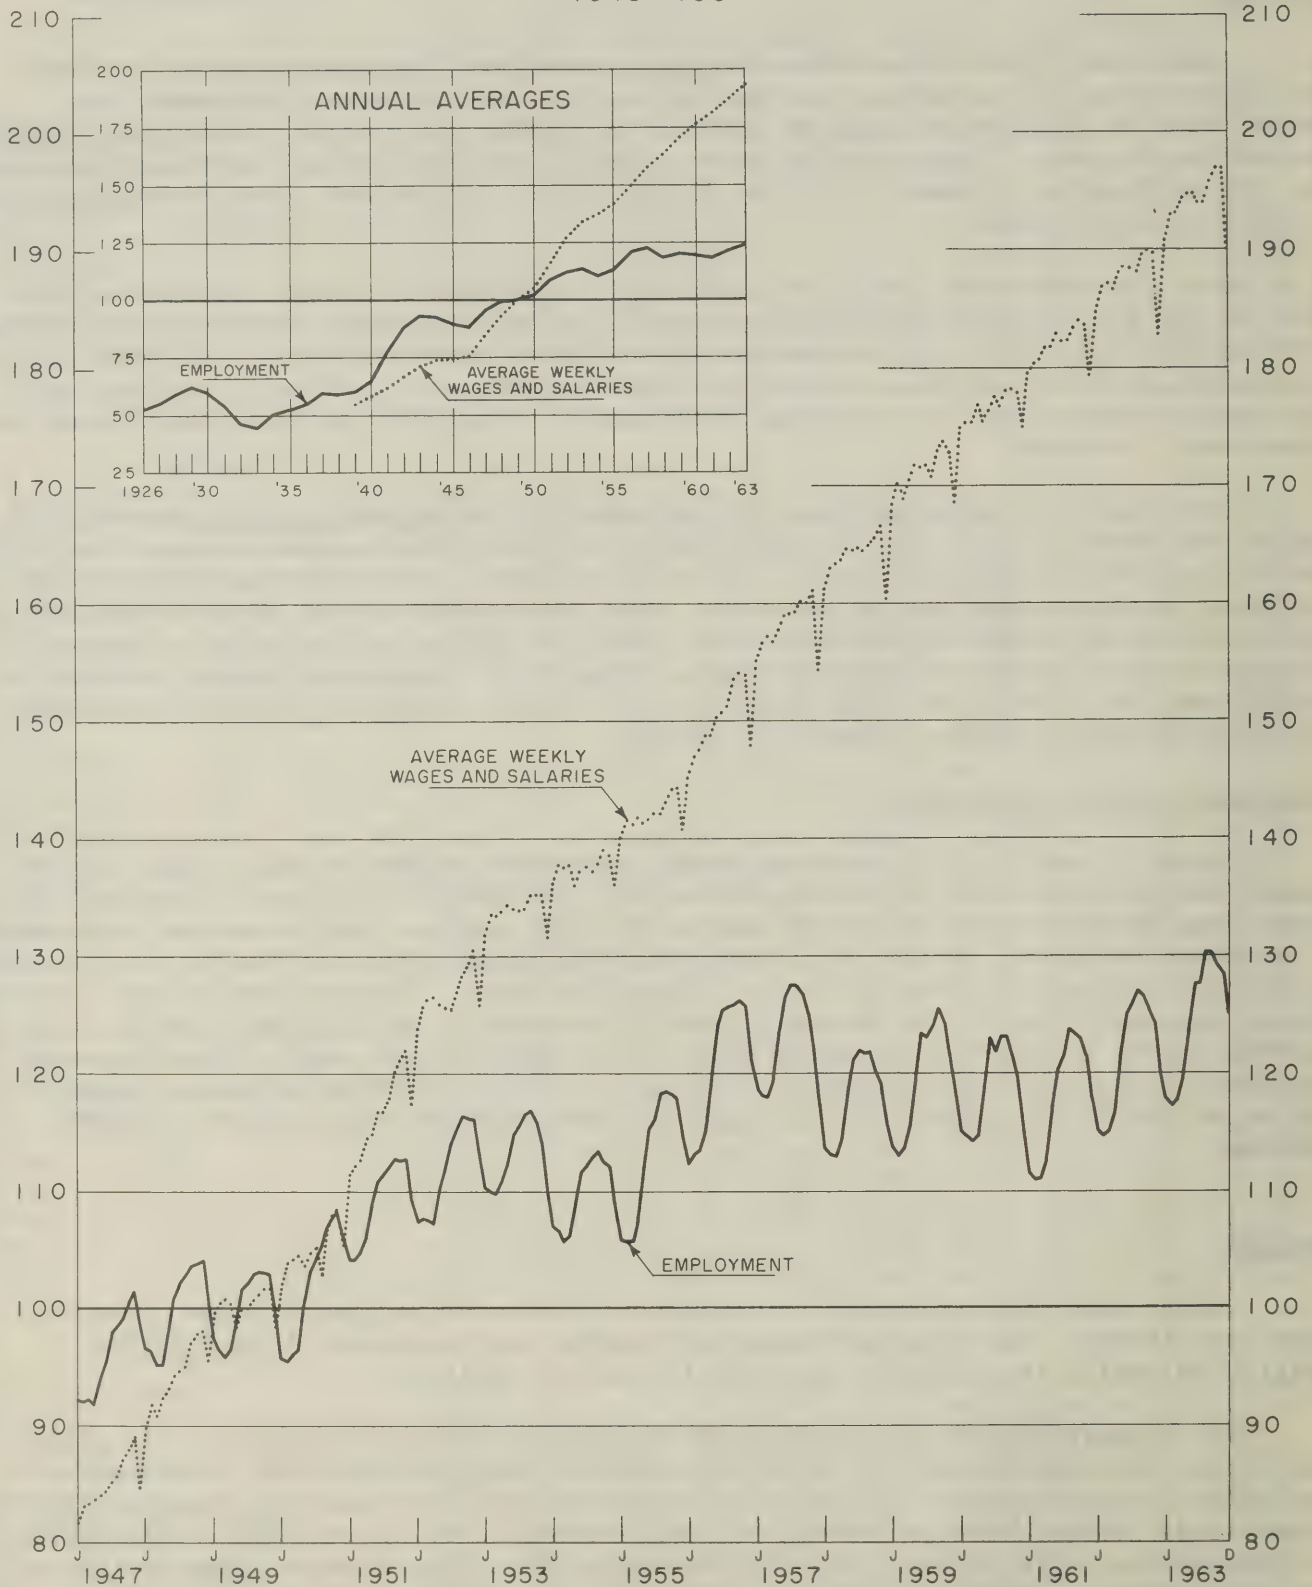

Regions

Quebec was the only region for which the seasonally-adjusted index of employment rose in May. The adjusted index for Ontario was unchanged while that for British Columbia, the Atlantic and Prairie Regions declined.

The adjusted index for the Atlantic Region declined by 2.3 per cent as employment rose less than seasonally in all the goods-producing industrial divisions and recorded a contra-seasonal reduction in transportation, storage and communication. An increase of 0.6 per cent in Quebec was due, primarily, to an unusually large advance in forestry and mild strengthening in manufacturing. The adjusted index for Ontario was unchanged, as the major industrial divisions recorded movements that differed little from usual seasonal patterns.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES (COMPOSITES OF NINE NON-AGRICULTURAL INDUSTRIES)

1949 = 100

In the Prairie Region, employment declined by 0.8 per cent largely due to weakening in Saskatchewan and Alberta. For the region as a whole, there were smaller-than-seasonal increases in manufacturing, construction and transportation, storage and communication. A decline of 0.5 per cent in British Columbia resulted from a major industrial dispute in manufacturing.

Average weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by 47 cents in May to \$86.80. The increase was due, primarily, to developments in forestry and construction. In forestry, per capita earnings declined by \$5.16 but this was outweighed by a substantial increase in employment at a rate of pay greater than the average for all industries. In construction, where earnings are also above average, an increase of \$1.89 in average weekly wages and salaries was accompanied by a marked rise in employment.

In manufacturing, average weekly earnings rose by 44 cents to \$90.10. However, this positive influence on the overall average was offset by the fact that employment in the division increased by a smaller percentage than that recorded for all industries. Within manufacturing, earnings rose by 84 cents in durables but by only 6 cents in non-durables. In durables, there were increases of \$1.37 and \$1.92 in iron and steel and non-metallic mineral products. In non-durables, the only significant advance occurred in tobacco products where earnings rose by \$2.64 due to the laying off of seasonal employees.

Average earnings rose in all regions except the Atlantic Region. The increases ranged from 51 cents in the Prairie Region to 75 cents in British Columbia. Average weekly wages and salaries declined by 94 cents in the Atlantic Region, as earnings were down over the month in forestry (\$6.45) and manufacturing (\$2.64).

TABLE 2. Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, Goods-Producing Industries

Year and month	Manufacturing											
	Forestry (chiefly logging)		Mining		All manufactures		Durable goods(u)		Non-durable goods(u)		Construction

INDEX NUMBERS OF EMPLOYMENT, CANADA GOODS-PRODUCING INDUSTRIES

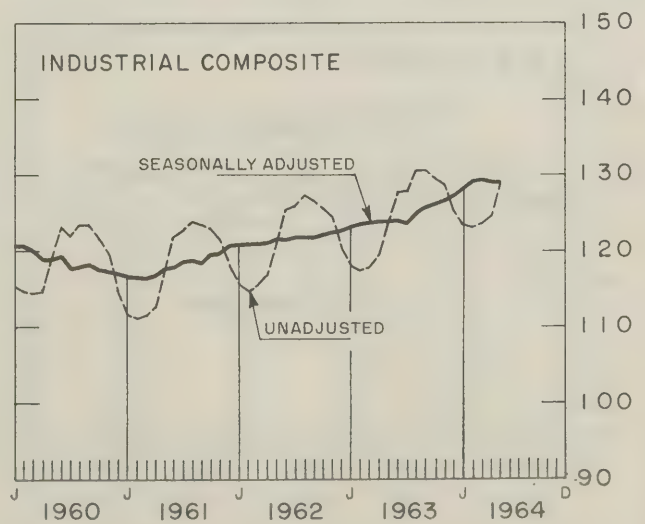

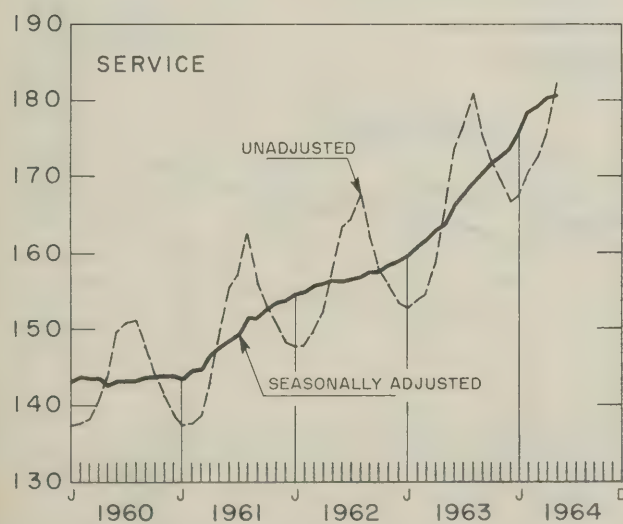

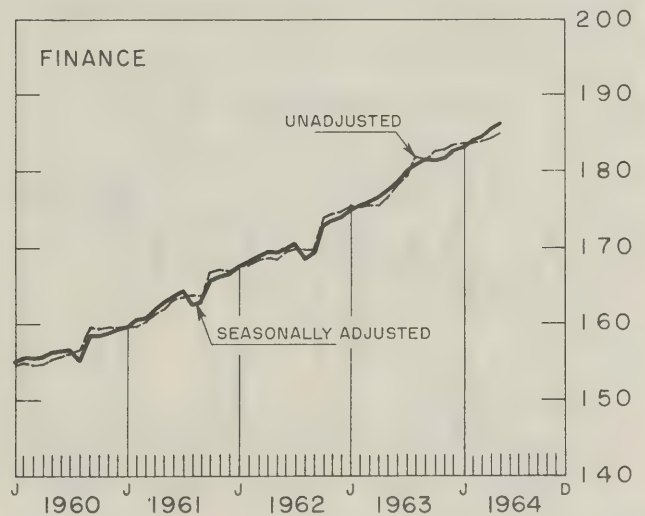

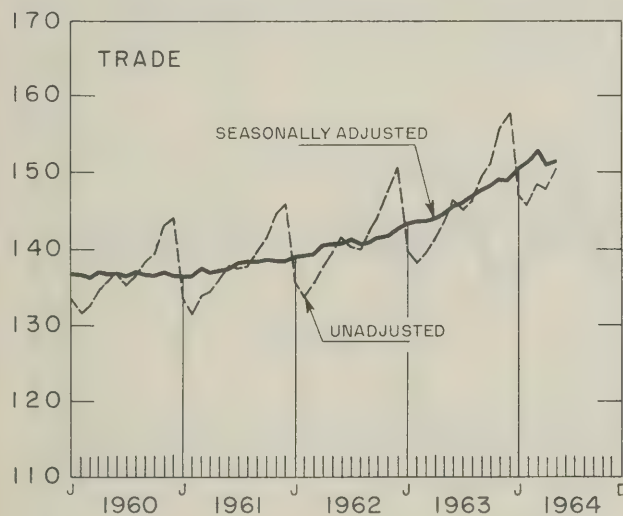

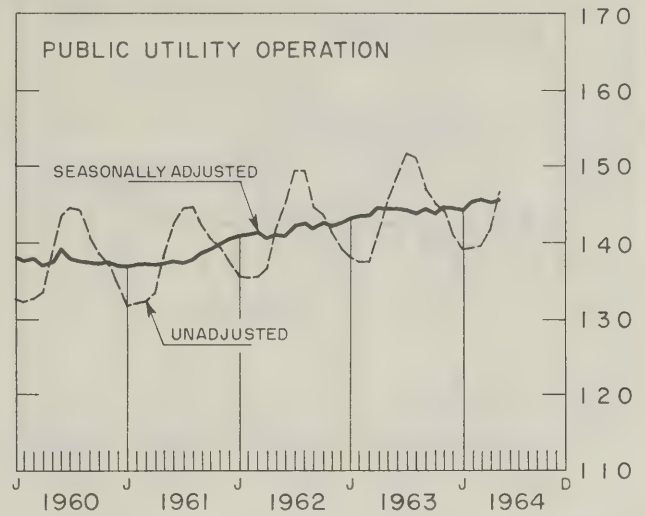

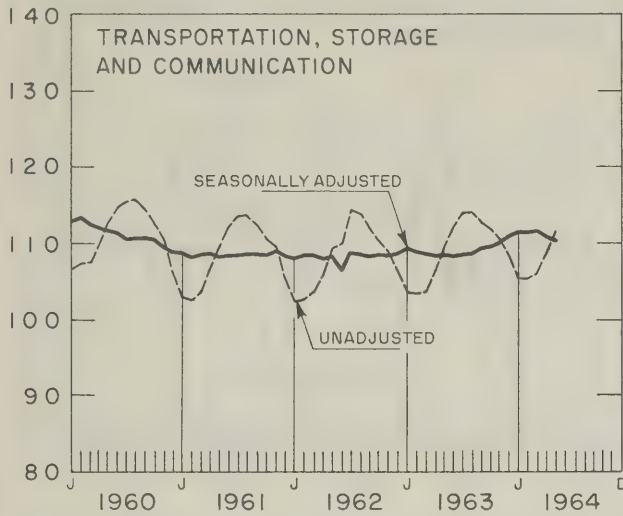

1949 = 100

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON.

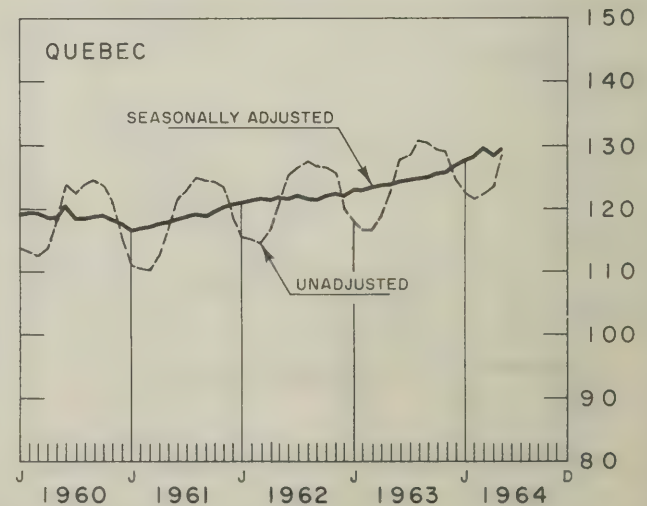

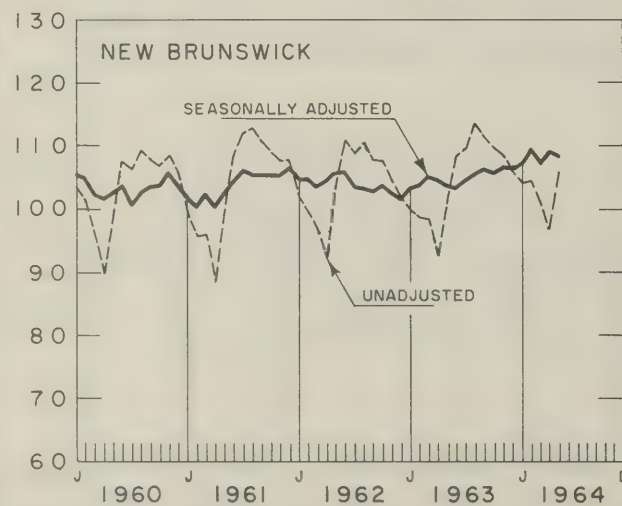

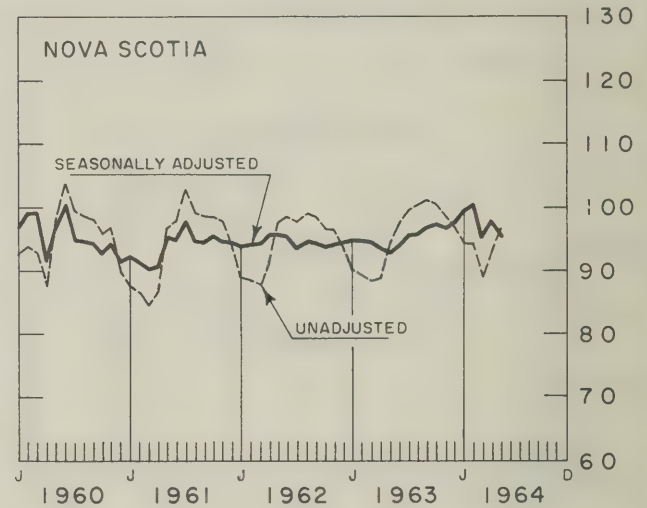

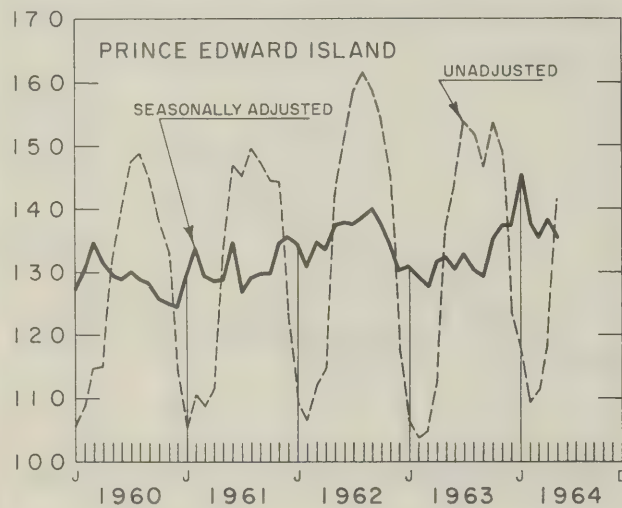

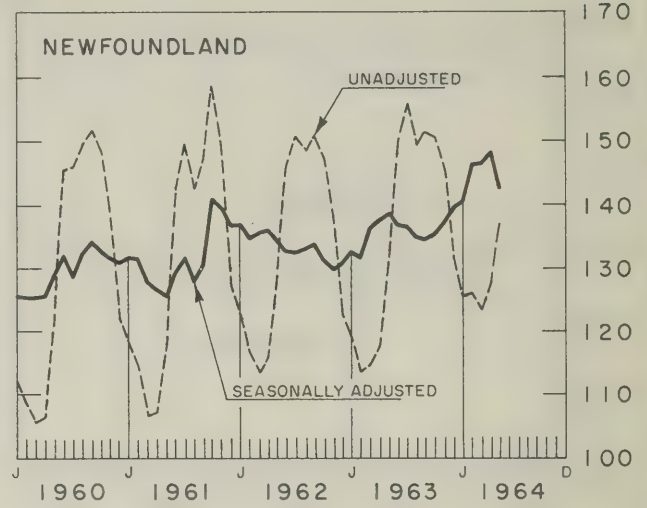

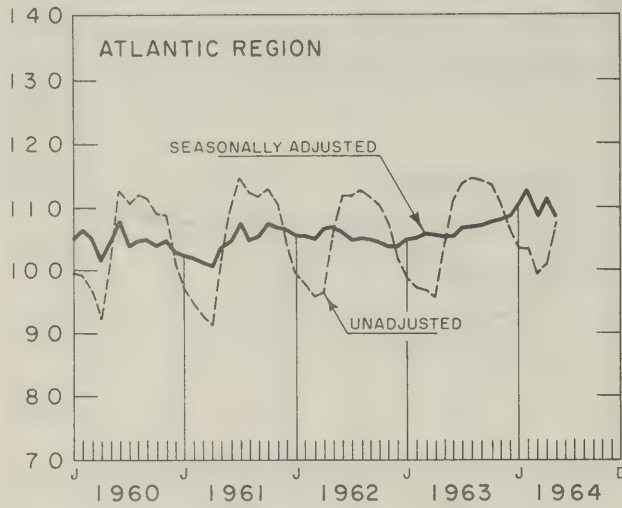

INDEX NUMBERS OF EMPLOYMENT, CANADA SERVICE-PRODUCING INDUSTRIES

1949=100

INDEX NUMBERS OF EMPLOYMENT, ATLANTIC REGION AND EASTERN PROVINCES

1949 = 100

INDEX NUMBERS OF EMPLOYMENT, ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

1949 = 100

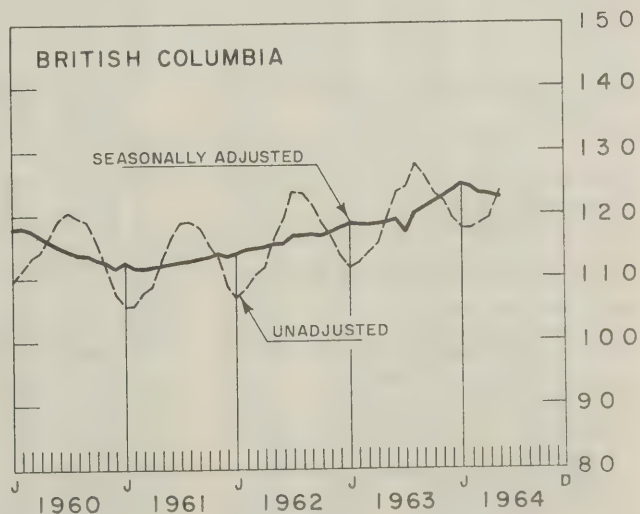

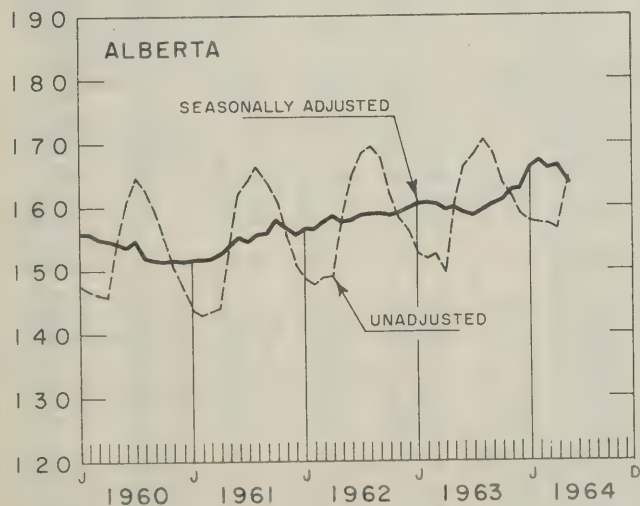

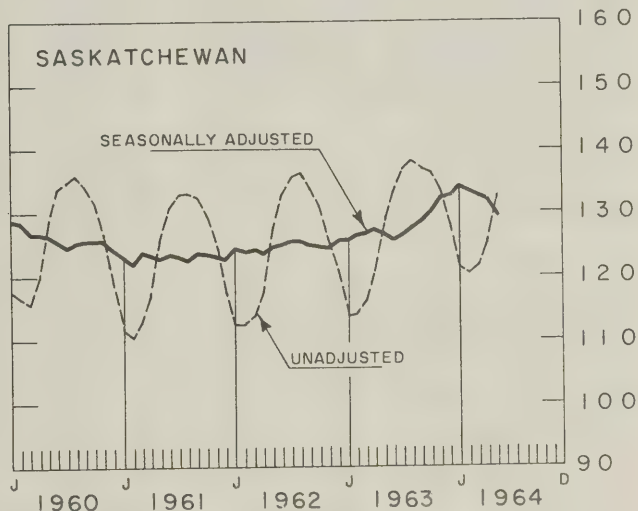

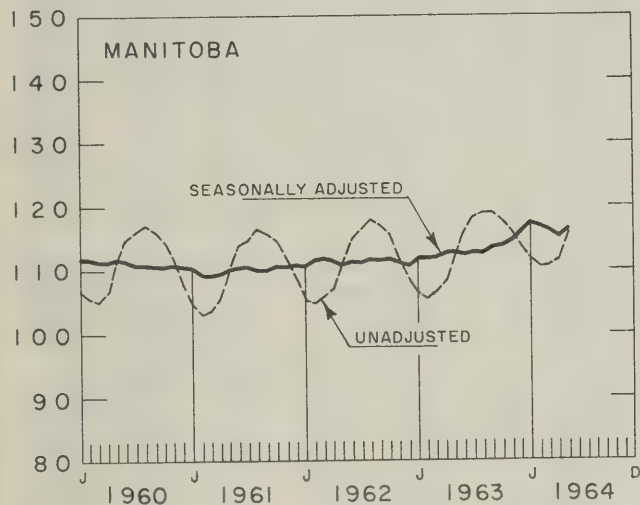

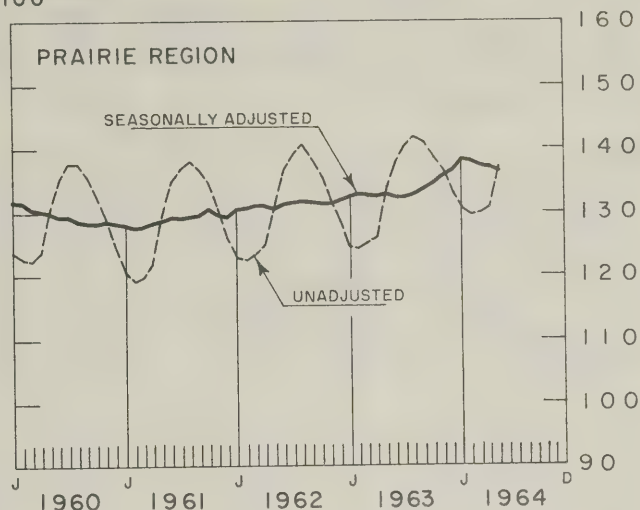

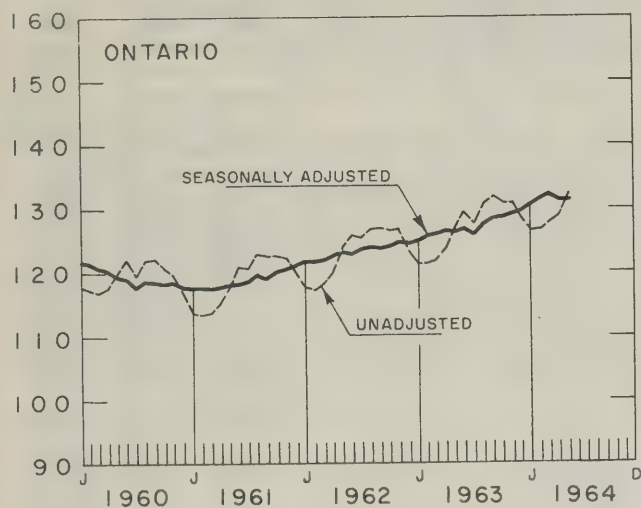

TABLE 4. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Esti- mated cov- erage (w)	Employment indexes				Average weekly wages and salaries				Employees reported May 1964
		May 1964	April 1964	May 1963	May 1962	May 1964	April 1964	May 1963	May 1962	
	%	1949=100				dollars				number
Forestry (chiefly logging)	76	60.8	37.7	51.8	53.6	91.57	96.73	84.93	80.97	43,965
Mining	96	114.7	111.7	113.7	117.8	105.03	105.08	101.72	98.59	101,345
Metal mining		131.3	127.4	128.5	133.0	104.23	105.53	102.39	100.22	62,005
Gold (a)		63.5	63.5	66.9	69.5	85.40	87.12	83.93	82.63	14,451
Other metal (b)		194.3	186.8	185.8	192.0	109.96	111.34	108.57	106.14	47,554
Iron		303.3	286.9	294.8	268.5	126.16	128.51	119.86	116.97	10,120
Uranium	118.23	117.93	120.28	113.86	3,528
Fuels		76.9	77.0	78.2	84.5	112.79	109.29	107.68	101.94	23,612
Coal		35.2	37.7	38.2	41.9	84.68	79.83	81.05	77.52	8,669
Oil and natural gas		246.0	236.6	241.1	258.8	129.09	128.35	124.90	118.09	14,943
Non-metal (c)		151.5	142.7	151.3	147.2	96.53	96.55	90.11	86.30	15,728
Asbestos		181.6	179.6	178.8	186.7	106.79	106.54	102.49	96.04	6,834
Manufacturing	92	121.3	118.6	116.3	113.7	90.10	89.66	86.73	83.72	1,312,468
Durable goods (u)		128.8	126.1	122.2	118.4	97.40	96.56	93.66	90.38	634,888
Non-durable goods (u)		115.0	112.4	111.3	109.7	83.25	83.19	80.36	77.70	677,580
Food and beverages		117.0	109.3	116.2	115.5	78.91	79.61	76.10	74.15	165,168
Meat products		136.0	131.2	133.8	132.4	87.84	86.57	87.37	85.10	30,989
Dairy products		131.7	124.6	130.9	130.0	75.91	74.98	72.06	69.53	16,206
Canned and cured fish		145.8	98.3	158.2	144.7	51.73	56.89	49.73	48.54	16,686
Canned and preserved fruits and vegetables		96.8	86.1	94.0	94.4	69.10	72.15	67.17	66.36	13,536
Grain mill products		95.5	94.4	91.2	100.1	87.62	86.22	84.27	82.40	9,028
Bread and other bakery products		111.9	110.8	112.2	111.4	76.19	74.55	72.49	70.82	23,385
Biscuits and crackers		97.9	95.5	94.4	95.2	71.98	71.76	68.15	64.28	7,050
Distilled and malt liquors		97.7	93.4	95.7	95.3	110.27	110.36	106.10	102.58	13,663
Other beverages (d)		159.6	151.3	153.3	156.8	79.84	79.46	77.52	77.42	11,798
Confectionery		82.2	81.9	83.4	81.5	65.88	66.09	63.58	60.08	8,199
Tobacco and tobacco products		90.1	97.2	87.9	99.4	85.92	83.28	85.56	77.60	9,143
Rubber products		116.7	115.6	111.8	105.4	92.43	91.73	88.42	85.88	23,198
Leather products		88.2	88.7	87.1	87.4	60.27	60.08	56.62	54.58	29,062
Boots and shoes (except rubber)		91.4	92.3	93.1	94.1	58.02	57.93	54.17	51.87	19,430
Other leather products (f)		82.4	82.1	76.3	75.1	64.81	64.47	62.06	60.68	9,632
Textile products (except clothing)		90.0	89.0	84.2	81.0	71.69	71.91	68.53	66.44	67,310
Cotton yarn and broad woven goods		77.6	76.9	72.7	73.4	67.95	68.81	64.61	62.51	18,911
Woollen goods		66.9	66.1	64.0	61.4	65.77	65.23	63.51	62.75	10,112
Synthetic textiles and silk (t)		109.4	106.8	97.3	88.9	78.23	79.19	75.07	73.41	18,724
Clothing (textile and fur)		98.3	98.8	92.8	91.1	55.69	55.46	53.74	51.03	106,015
Men's clothing		104.0	104.3	97.8	94.7	54.58	54.04	52.72	49.32	36,468
Women's clothing		106.9	108.7	97.5	96.6	56.25	56.67	54.70	52.81	29,092
Knit goods		76.4	75.4	73.4	73.1	56.42	55.78	53.51	50.67	19,793
Fur goods		58.1	56.8	61.9	65.6	84.77	84.22	79.17	75.61	2,614
Wood products		113.0	109.8	109.9	108.1	77.43	76.96	73.63	70.75	106,171
Saw and planing mills (g)		115.2	111.2	112.7	110.8	79.81	79.56	75.66	72.56	68,679
Furniture		123.6	122.0	117.5	114.3	74.50	73.98	71.30	69.13	28,078
Other wood products (h)		80.9	78.8	80.6	82.8	68.88	67.23	65.79	62.95	9,414
Paper products		131.4	128.5	127.3	125.1	104.09	104.17	101.02	97.28	98,775
Pulp and paper mills		131.3	128.0	127.2	124.8	111.83	112.52	108.76	104.94	69,684
Other paper products (i)		131.5	129.7	127.4	125.9	85.56	84.41	82.48	79.10	29,091
Printing, publishing and allied industries		127.3	126.8	126.2	126.7	97.74	97.44	93.72	91.46	61,173
Iron and steel products		121.2	119.2	115.7	109.7	102.14	100.77	98.72	95.92	196,729
Agricultural implements		74.5	74.2	75.0	62.6	109.80	107.03	105.97	98.31	13,106
Boilers and plate work		116.9	115.4	122.8	118.3	99.48	99.88	94.82	94.85	7,328
Fabricated and structural steel		154.3	149.6	156.5	157.0	102.75	101.38	98.99	96.86	11,576
Hardware and tools		126.2	124.7	114.7	106.9	88.71	89.08	87.05	84.17	14,332
Heating and cooking appliances		106.8	109.3	103.0	102.5	86.43	87.60	83.43	80.34	9,168
Iron castings		108.9	107.6	102.2	94.6	97.69	97.32	93.99	90.12	21,211
Machinery (j)		123.1	121.7	117.5	111.5	98.06	97.50	93.18	90.18	38,319
Industrial machinery (r)		143.1	141.2	135.1	126.7	99.01	98.42	93.81	90.83	30,681
Primary iron and steel		143.7	139.8	132.0	125.7	116.88	113.29	114.37	112.84	42,962
Sheet metal products		120.8	117.2	119.9	115.5	98.64	96.74	95.36	93.62	19,055
Wire and wire products		128.4	126.8	117.0	112.7	101.36	101.50	97.44	95.50	10,677

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58** — Price 75 cents
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS, JUNE 1964

SUMMARY

The industrial composite index of employment rose to 133.0 in June, up 3.0 p.c. from the May figure of 129.1. As is usual during the spring period, employment in all major industrial divisions increased over the month; forestry led the way with an increase of 34.4 p.c. as establishments in Eastern Canada increased the work force for the summer cut.

Seasonally-adjusted, the industrial composite was virtually unchanged at 129.1. The adjusted indexes for most major industrial divisions likewise showed little movement. Exceptions were forestry which declined and public utility operations which rose. The seasonally-adjusted indexes for most provinces were down slightly in June. However, the overall reduction was balanced by increases in Nova Scotia, Ontario and Saskatchewan.

The industrial composite of average weekly wages and salaries declined by 17 cents to \$86.63 in June. This figure was \$2.93 above the June 1963 figure of \$83.70. The payroll index for June, at 270.4, was 2.8 p.c. above May 1964 and 7.9 p.c. above June 1963.

EMPLOYMENT

Manufacturing

The seasonally-adjusted index for manufacturing recorded a fractional decline in June thus continuing the sluggish movement characteristic of recent months. Generally, the weakening seems to have resulted from a shift in seasonal demand. There is evidence that the rapid expansion experienced in the last half of 1963, while due for most part to a widespread cyclical rise in demand, also reflected stockpiling of building materials by construction firms in anticipation of the institution of the second stage of the sales tax and to various government incentives calculated to shift some summer construction to the winter months. As a result, the month-to-month requirements in the spring of 1964 have been below average. This weakening has been amplified in recent months by the incidence of industrial disputes in manufacturing.

The weakening in manufacturing previously has been more pronounced in durable goods manufacturing. In June, however, durables recorded a moderate increase as a result of strengthening in transportation equipment and electrical apparatus and supplies. In transportation equipment, the major factor was an above-average increase in aircrafts and parts, although there were also smaller-than-seasonal reductions in motor vehicles and motor vehicle parts and accessories.

The seasonally-adjusted index for non-durable goods manufacturing declined in June. In this component, employment rose less than seasonally in food and beverages and paper products and declined contra-seasonally in printing, publishing and allied industries. In the last named industry, the reduction reflected industrial disputes in Montreal. The remaining industries in non-durables showed movements which differed very little from usual seasonal movements.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

Areas and industrial divisions	Index numbers						Average weekly wages and salaries			Employees reported

Non-Manufacturing Industries

Among goods-producing industrial divisions other than manufacturing, the seasonally-adjusted index for forestry declined, while the indexes for mining and construction showed small increases. In forestry, employment rose much less than seasonally in Quebec. In that province, employment had shown an above-average increase in May due to an early start of the summer cutting season. As a result, the increase in the work-force in June was smaller than usual. In mining, employment rose more than seasonally in coal as a major colliery in Nova Scotia resumed operations after being closed the previous month due to fire. In construction, a larger-than-seasonal increase in highway, bridge and street construction was balanced by a smaller-than-seasonal advance in building and general engineering.

Among the service-producing industrial divisions, the adjusted index for public utility operations showed a relatively large advance in June. There was virtually no change in trade and transportation, storage and communication; finance, insurance and real estate showed a small advance and service a decline. In trade, there was an above-average increase in wholesaling but this gain was offset by a less-than-seasonal rise in retailing due to a major industrial dispute in Montreal. In service, employment rose more than seasonally in Ontario but less than seasonally in Quebec and the Prairie Region.

Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries declined by 17 cents in June to \$86.63. Among the major industrial divisions, earnings were down in forestry (\$1.28), manufacturing (37 cents), construction (\$2.11) and service (39 cents). Although per capita earnings declined in forestry and construction, these industry divisions did not contribute to the overall decline in earnings. In both divisions earnings are typically higher than for the industrial composite, and in June, employment in these relatively highly paid industries rose by 34.4 p.c. and 7.3 p.c., respectively, as against 3.0 p.c. for all Canada. The resulting increase in weight for the two divisions more than offset the negative effect on the overall earnings figure that resulted from the declines in earnings.

The decrease in construction was unusual for the time for year and underlined the extent to which employment in the lower paid highway, bridge and street component increased relatively to the more highly-paid building and general engineering component. Service generally shows a reduction in June due to substantial additions of seasonal employees in the hotel and restaurant industry.

In manufacturing, durables was down by 42 cents and non-durables by 29 cents. In durables, earnings declined in wood products (\$1.02), non-ferrous metals (46 cents), transportation equipment (61 cents) and iron and steel products (47 cents). There was no change in non-metallic mineral products but electrical apparatus and supplies were up by \$1.30. The important factor in the decline in durables, however, was that employment did not rise in the highly-paid (for durables) transportation equipment and iron and steel industries to the same degree as for the industries in which earnings tend to be below the average for the division.

Provincially, per capita earnings were down in Nova Scotia, New Brunswick, Quebec, Alberta and British Columbia. The decreases ranged from 18 cents in New Brunswick to 50 cents in Quebec. Earnings rose in the remaining five provinces with the gains ranging from 10 cents in Ontario to 66 cents in Saskatchewan.

TABLE 2. Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, Goods-Producing Industries

Year and month					Manufacturing							
	Forestry (chiefly logging)		Mining		All manufactures		Durable goods(u)		Non-durable goods(u)		Construction

INDEX NUMBERS OF EMPLOYMENT, CANADA GOODS-PRODUCING INDUSTRIES

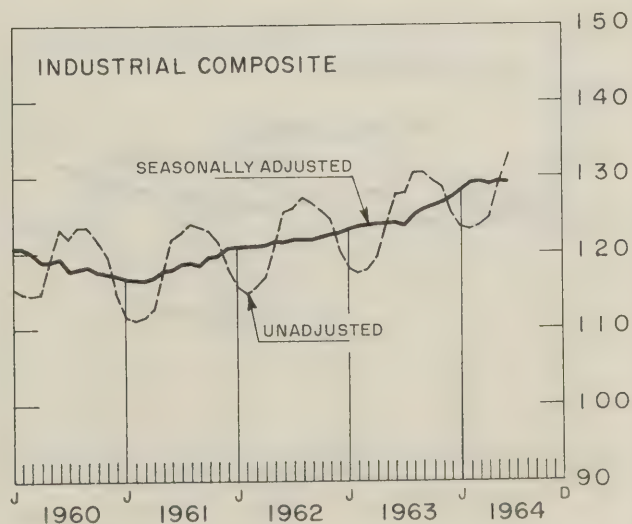

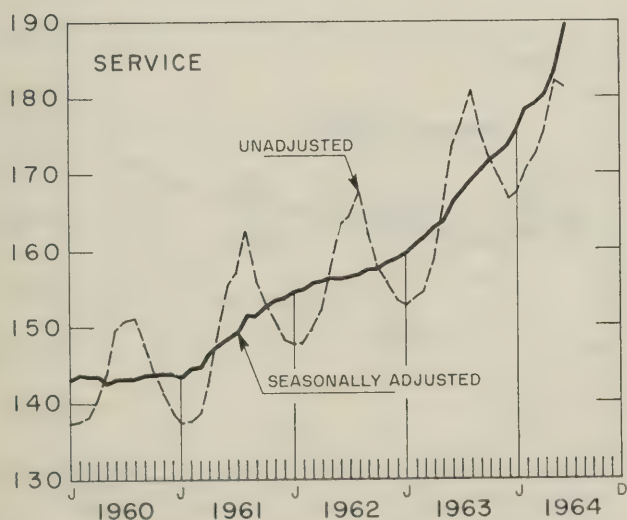

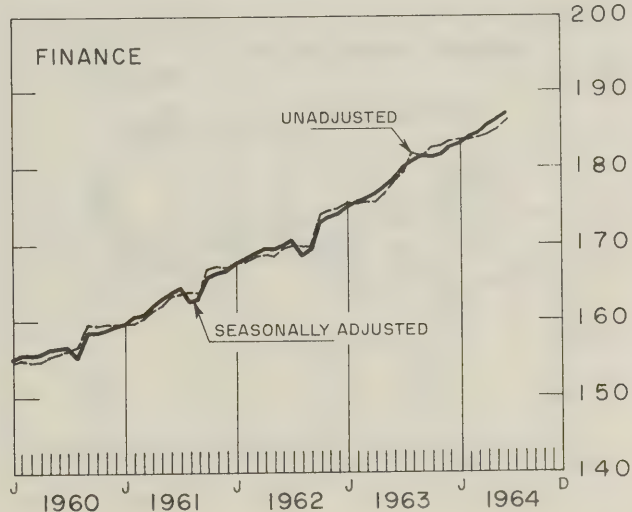

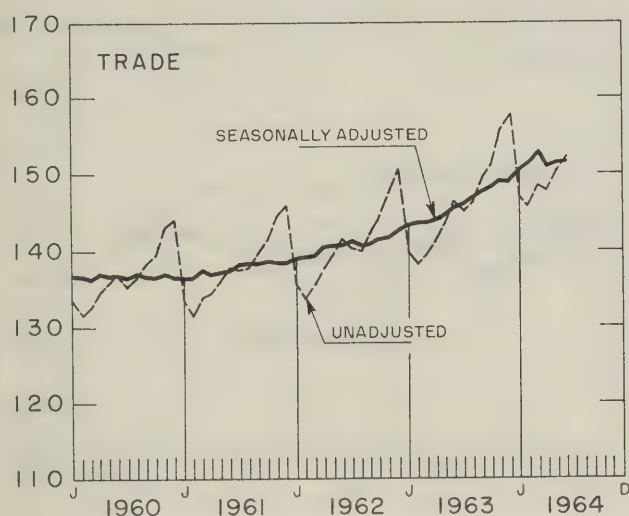

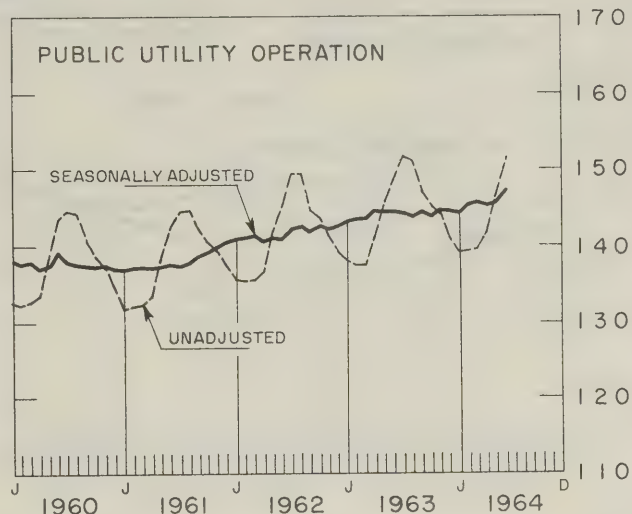

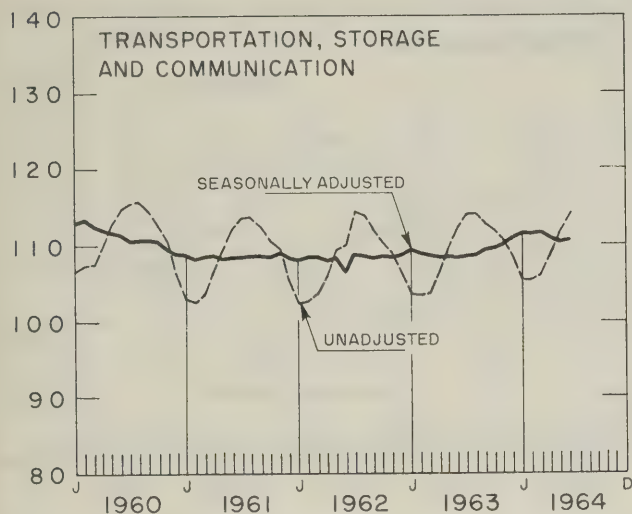

1949 = 100

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON.

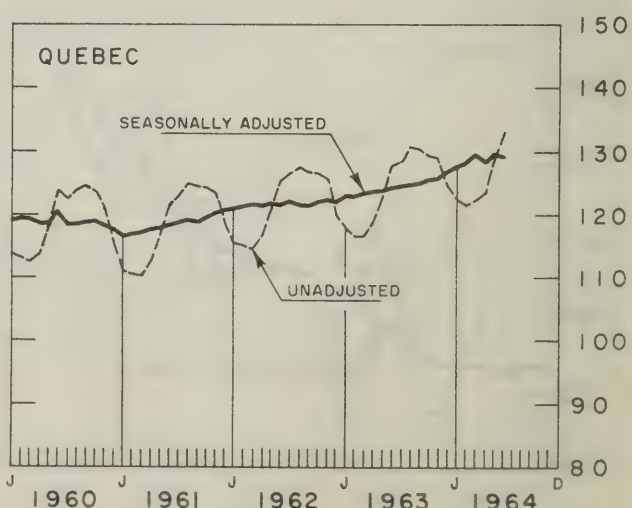

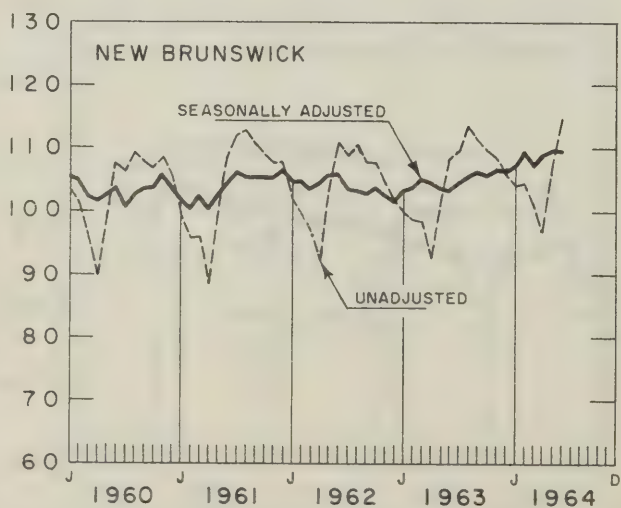

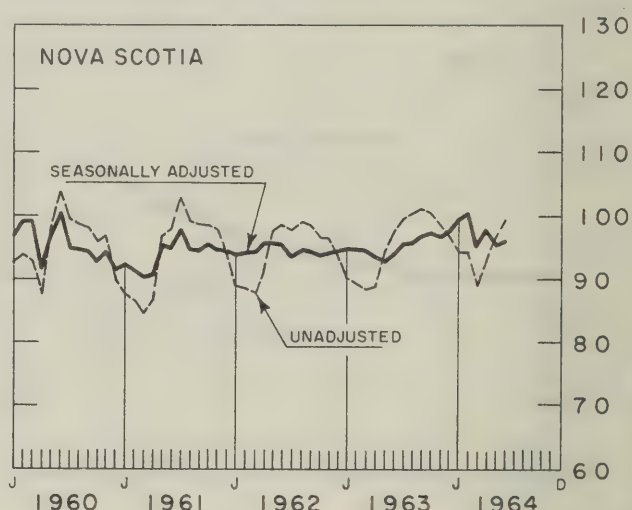

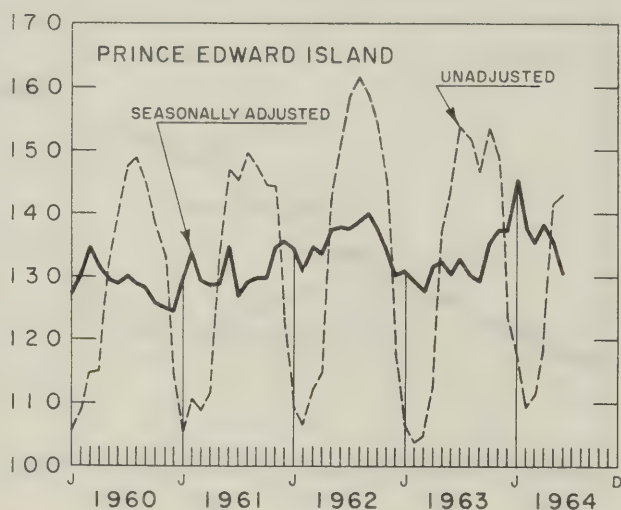

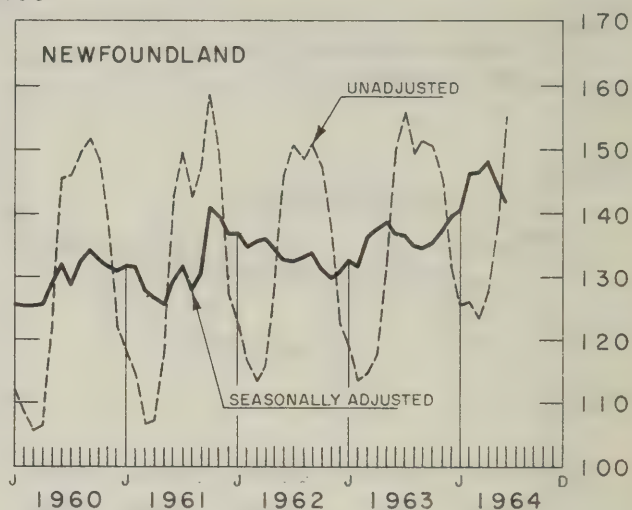

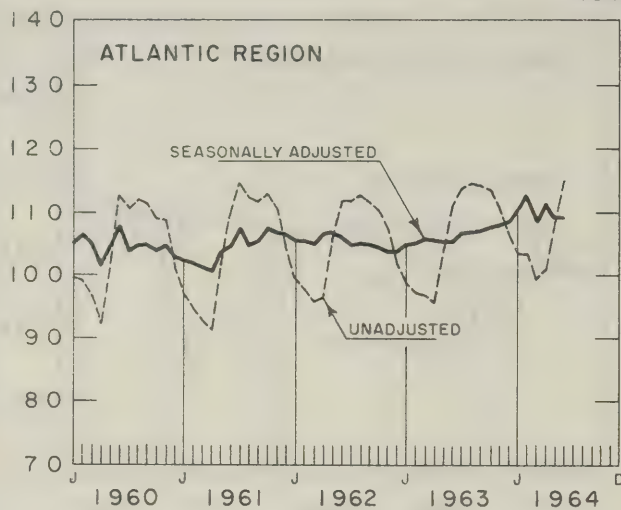

INDEX NUMBERS OF EMPLOYMENT, CANADA SERVICE-PRODUCING INDUSTRIES

1949=100

INDEX NUMBERS OF EMPLOYMENT, ATLANTIC REGION AND EASTERN PROVINCES

1949 = 100

INDEX NUMBERS OF EMPLOYMENT, ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

1949 = 100

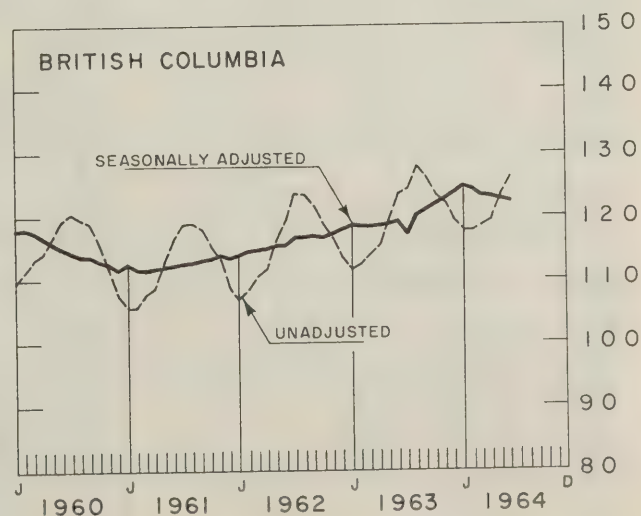

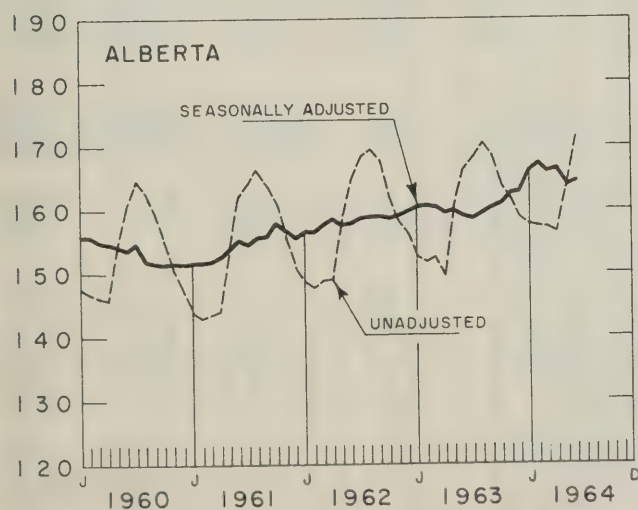

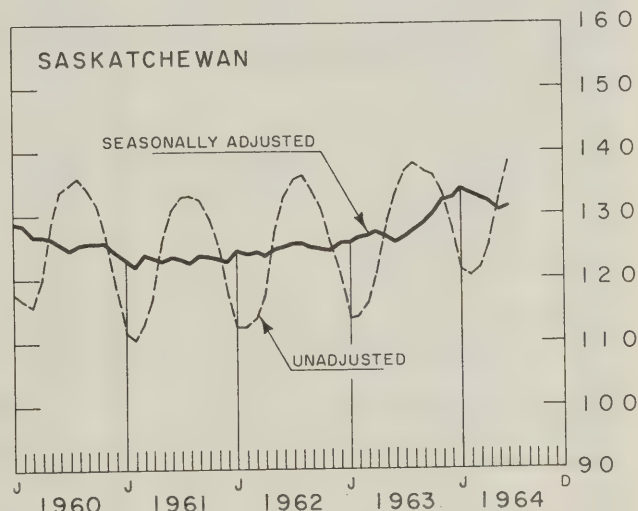

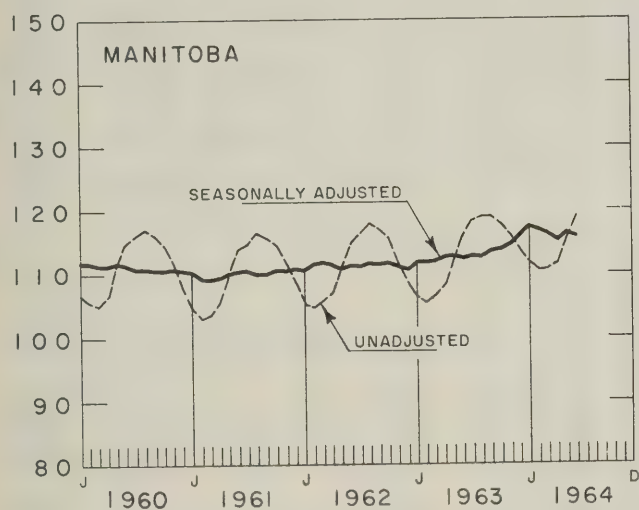

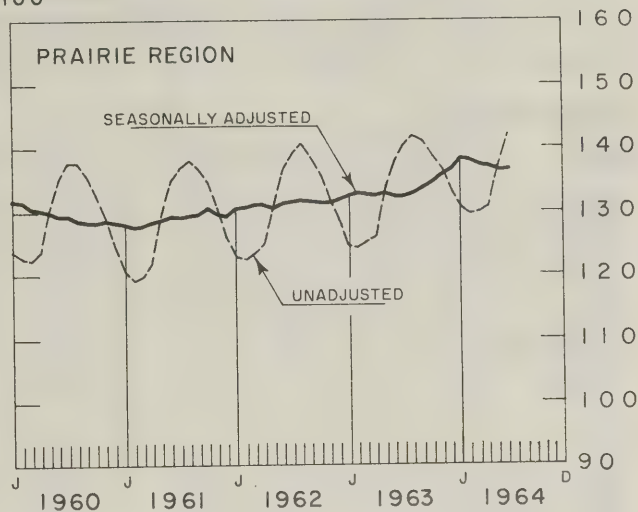

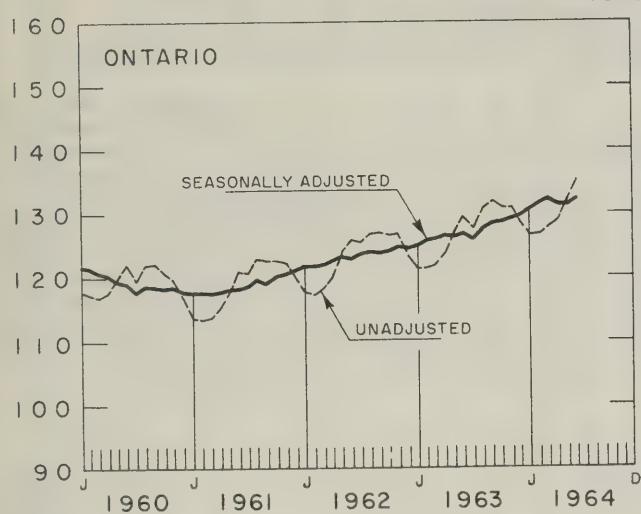

TABLE 4. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Estimated coverage (w)	Employment indexes				Average weekly wages and salaries				Employees reported June 1964
		June 1964	May 1964	June 1963	June 1962	June 1964	May 1964	June 1963	June 1962	
	%	1949 = 100				dollars				number
Forestry (chiefly logging)	76	82.8	61.6	77.1	76.8	89.52	90.80	89.06	80.91	60,054
Mining	96	118.7	114.8	117.3	121.0	105.22	104.98	101.39	98.79	104,868
Metal mining		133.4	131.4	129.8	135.1	105.44	104.17	102.32	100.32	63,000
Gold (a)		65.4	63.5	67.7	70.7	86.26	85.40	82.54	80.72	14,878
Other metal (b)		196.6	194.4	187.5	195.0	111.38	109.87	108.96	106.92	48,122
Iron		312.2	303.3	281.2	277.7	128.14	126.16	124.61	119.67	10,417
Uranium	120.20	118.23	118.57	114.21	3,457
Fuels		82.5	76.9	82.5	85.3	111.46	113.02	107.61	104.87	25,353
Coal		37.9	35.2	39.0	40.8	83.91	84.68	78.90	79.72	9,341
Oil and natural gas		263.6	246.2	260.0	266.9	127.53	129.45	125.17	120.59	16,012
Non-metal (c)		159.1	151.9	163.3	162.1	94.80	96.08	88.84	83.62	16,515
Asbestos		183.2	181.2	185.3	194.2	105.18	105.59	101.11	95.62	6,893
Manufacturing	92	123.9	121.4	118.9	116.4	89.68	90.05	86.29	83.72	1,341,314
Durable goods (u)		131.5	129.0	124.2	121.0	96.84	97.26	93.05	90.20	648,113
Non-durable goods (u)		117.6	115.0	114.4	112.5	82.99	83.28	80.14	77.88	693,201
Food and beverages		124.1	117.4	124.0	122.8	78.34	78.92	75.68	73.34	175,332
Meat products		139.9	136.0	138.5	136.5	88.13	87.73	86.92	84.72	31,891
Dairy products		137.5	131.7	137.2	135.9	75.92	75.93	73.42	69.99	16,993
Canned and cured fish		174.2	149.7	189.5	168.0	50.19	51.35	50.12	47.61	19,936
Canned and preserved fruits and vegetables		114.6	96.7	114.4	115.7	65.45	69.10	64.10	62.51	16,044
Grain mill products		98.7	95.6	93.2	102.2	86.54	87.78	83.69	81.82	9,334
Bread and other bakery products		115.0	112.0	115.5	113.7	76.97	76.29	74.50	71.52	24,035
Biscuits and crackers		102.4	96.8	92.9	103.2	71.76	72.30	67.53	63.17	7,370
Distilled and malt liquors		98.9	97.7	98.7	100.5	110.37	110.32	107.86	103.81	13,832
Other beverages (d)		172.0	162.9	167.6	165.1	84.56	81.10	79.77	76.73	12,709
Confectionery		85.5	82.2	86.1	82.3	65.78	65.88	63.38	60.09	8,527
Tobacco and tobacco products		83.5	90.1	83.8	83.9	91.30	85.92	88.61	86.01	8,481
Rubber products		118.7	117.1	112.1	108.2	92.95	92.38	89.56	87.55	23,595
Leather products		89.9	88.3	87.9	88.8	59.44	60.21	57.15	55.62	29,643
Boots and shoes (except rubber)		93.3	91.6	93.7	96.5	57.16	58.02	54.96	53.50	19,844
Other leather products (f)		83.7	82.2	77.3	74.8	64.05	64.65	61.96	60.56	9,799
Textile products (except clothing)		91.2	89.9	85.1	82.3	72.17	71.84	68.35	66.52	68,192
Cotton yarn and broad woven goods		77.7	77.6	74.1	73.6	70.63	67.95	65.16	62.98	18,923
Woolen goods		68.1	66.9	64.2	63.6	65.80	65.77	63.44	62.82	10,294
Synthetic textiles and silk (t)		111.2	109.0	98.0	91.1	78.62	78.77	74.89	72.70	19,022
Clothing (textile and fur)		99.5	98.3	94.4	92.3	54.66	55.67	52.55	51.15	107,446
Men's clothing		104.9	104.0	99.3	96.5	53.81	54.53	51.32	50.19	36,771
Women's clothing		108.1	106.9	98.8	95.6	54.54	56.25	52.79	51.25	29,453
Knit goods		77.4	76.3	75.1	74.6	55.25	56.36	52.66	51.50	20,074
Fur goods		59.2	57.7	62.2	64.4	82.93	84.67	82.87	75.95	2,651
Wood products		117.3	113.2	114.4	113.3	76.26	77.28	74.80	71.36	110,198
Saw and planing mills (g)		120.5	115.4	118.7	117.2	78.38	79.56	77.42	73.30	71,840
Furniture		125.5	123.7	119.9	117.0	73.73	74.52	70.88	69.20	28,518
Other wood products (h)		84.6	80.9	81.9	86.5	68.16	68.88	66.69	63.87	9,840
Paper products		134.2	131.2	131.3	129.2	105.06	104.16	101.46	98.70	100,911
Pulp and paper mills		134.4	131.2	131.7	129.1	112.87	111.91	109.19	106.66	71,317
Other paper products (i)		133.8	131.4	130.2	129.5	86.23	85.62	82.69	79.71	29,594
Printing, publishing and allied industries		126.2	127.2	127.5	127.3	97.10	97.84	93.19	90.93	60,631
Iron and steel products		123.7	121.5	117.1	111.8	101.49	101.96	97.78	95.68	200,752
Agricultural implements		74.3	74.5	72.4	59.2	111.24	109.80	101.15	99.09	13,071
Boilers and plate work		118.3	116.9	126.3	122.5	99.41	99.27	92.03	94.20	7,419
Fabricated and structural steel		158.7	154.7	152.7	164.2	104.90	102.79	100.99	99.52	11,903

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

JULY 1964

Published by Authority of

The Minister of Trade and Commerce

October 1964
8003-501

Price: 30 cents
\$3.00 a year

Volume 42, No. 7

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

72-001 — Advance Statement on Employment and Weekly Earnings—Monthly—Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

72-003 — Man-Hours and Hourly Earnings—Monthly—Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

72-005 — Estimates of Labour Income—Monthly—Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

72-006 — Hiring and Separation Rates in Certain Industries—Semi-Annual—Price \$1.50 per year

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

72-201 — Review of Employment and Payrolls—Annual—Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

72-202 — Review of Man-Hours and Hourly Earnings—Annual—Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

72-203 — Earnings and Hours of Work in Manufacturing—Annual—Preliminary Report—Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

72-204 — Earnings and Hours of Work in Manufacturing—Annual—Final Report—Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

72-502 — Labour Income, 1926-58 — Price 75 cents

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS, JULY 1964

SUMMARY

The industrial composite index of employment (1949=100) was 133.7 in July, up fractionally from the June figure of 133.4. A small rise is not unusual between these months because reductions in manufacturing employment resulting from shutdowns in the automobile industries for model changeover tend to offset increases in other divisions. Seasonally adjusted, the industrial composite rose slightly to 129.7, thus continuing the sluggish movement in evidence since February of this year when it stood at 129.2.

After allowance for seasonal fluctuations, the forestry, trade and service divisions made significant gains in July. There was little or no change in manufacturing, in transportation, storage and communication nor in finance, insurance and real estate; construction and public utility operation declined. Regionally, the seasonally-adjusted industrial composite for British Columbia advanced by 1.4 p.c., as major industrial disputes terminated in the wood and paper products industries. The adjusted indexes for other regions were virtually unchanged from June.

The industrial composite of average weekly wages and salaries for July was \$86.75, up 13 cents from June 1964 and \$3.40 from July 1963. The payroll index, at 272.1, increased by 0.3 p.c. from June and 8.9 p.c. from the July 1963 index of 249.8.

EMPLOYMENT

Manufacturing

The seasonally-adjusted index for manufacturing showed little change in July, nor did either major component. The July index, at 121.0, was only slightly higher than the January figure of 120.4, thereby underlining the slackening which has been typical of the division in recent months.

In durables, only wood products improved over the month. In that industry, employment showed an above-average advance due to the settlement of a major industrial dispute in British Columbia. Reductions in iron and steel, transportation equipment, non-ferrous metals and electrical apparatus and supplies were about average for the time of year. However, a decline in non-metallic mineral products was larger than seasonal.

In iron and steel products, employment strengthened in agricultural implements and in heating and cooking appliances but weakened in sheet metal products. The reduction in the last named industry continued a trend in evidence since March of this year. In transportation equipment, an above-average reduction in motor vehicles for the annual changeover was balanced by a smaller-than-usual layoff for retooling in the parts and accessories industry.

In non-durables, the adjusted index, at 115.3, was up fractionally from June. In this division, there was an above-average increase in paper products following settlement of a major industrial dispute in British Columbia. This gain was offset by larger-than-seasonal reductions in clothing and in printing, publishing and allied industries.

Non-Manufacturing Industries

Among the remaining goods-producing industrial divisions, the adjusted indexes for forestry and mining rose while that for construction declined; the decline in construction occurred because employment did not rise in highway, bridge and street construction as much as is usual between June and July. In the service producing industrial divisions, the adjusted indexes for trade, service and finance, insurance and real estate rose in July. Both the wholesale and retail components contributed to the strength in trade although the smaller-than-seasonal decline that occurred in retailing was due in part to the settlement of an industrial dispute in Montreal.

Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by 13 cents to \$86.75 in July, as nearly all major industrial divisions reported higher average earnings. The gains were particularly marked in forestry (\$3.91), mining (\$1.09) and construction (\$2.03). Only manufacturing and public utility operation showed declines, falling by 61 cents and \$2.21 respectively. The reduction in manufacturing of 61 cents, accompanied by a large decrease in employment in that relatively highly-paid industry, greatly modified gains elsewhere. The decline was due primarily to a substantial decrease in employment among highly-paid automobile industry workers.

CYCLICAL TRENDS, JUNE 1963 - JULY 1964

Since June 1963, the industrial composite index has moved up at a rate unequalled since the upturn in the spring of 1961. The main features of the current phase have been a marked upsurge in the composite between June 1963 and January 1964, then a flattening over the next six months. The rapid upswing in employment resulted primarily from a continued strong domestic market tied in with a marked rise in export demand, resulting from the wheat agreement with Russia and tax cuts in the United States. However, some of the demand was due also to a shift of some construction work from the summer to the winter. This last factor, in conjunction with some forward buying of building materials in anticipation of the institution of the second stage of the sales tax, resulted in a further seasonal shift in demand and accounted for the flattening in the industrial composite in the first half of 1963.

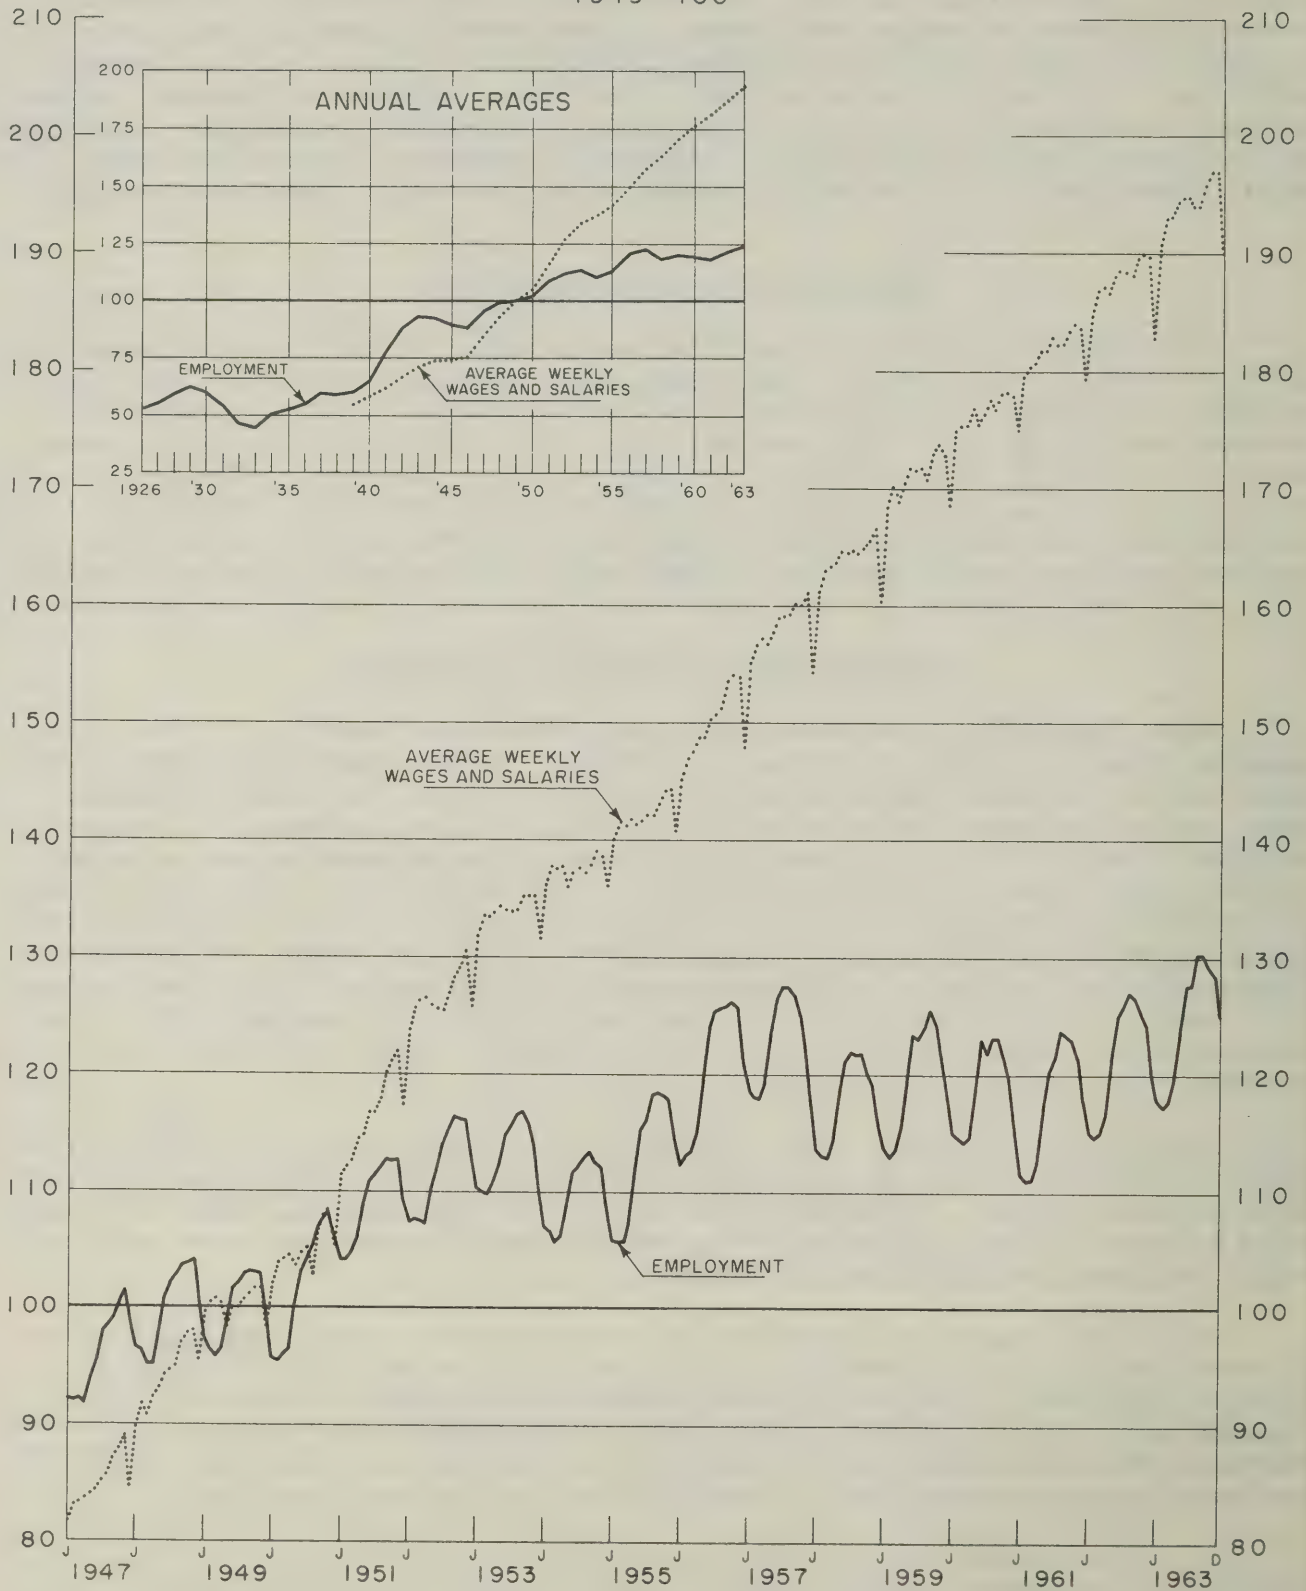

From June 1963 to July 1964, the seasonally-adjusted index for manufacturing advanced from 115.7 to 121.0, an increase of 4.6 p.c. This advance resulted from an increase of 6.4 p.c. in durables and 2.9 p.c. in non-durables. Most of the advance in manufacturing had ceased by the end of March 1964 and over the next four months the index recorded a small decline.

The marked expansion in durables in the most recent period took place because of strengthening in all components. There was a substantial pick-up in transportation equipment and iron and steel products which lasted through most of the 13-month period from June 1963 to July 1964. Wood products and non-metallic mineral products expanded over the last half of 1963 and the first quarter of 1964, then wood products weakened and non-metallic mineral products levelled.

In iron and steel products, most component industries improved their employment position over the last half of 1963. The only notable exceptions were

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES (COMPOSITES OF NINE NON-AGRICULTURAL INDUSTRIES)

1949 = 100

fabricated and structural steel, in which employment levels were down substantially, and agricultural implements which weakened in the fourth quarter. In 1964, most component industries strengthened in the first quarter but only agricultural implements, primary iron and steel and machinery products continued to improve in the second quarter.

In transportation equipment, employment advanced strongly in all component industries except shipbuilding and repairing over the 13-month period. In the last-named industry, employment levels declined sharply in 1963; this downward trend continued in the first half of 1964 and was magnified by the occurrence of a major industrial dispute in British Columbia. Despite the losses in shipbuilding, however, the gains in the other components were such that by June 1964 employment in the transportation equipment group was 11.2 p.c. above that for June 1963.

Employment also advanced in the goods producing divisions other than manufacturing. Forestry rose by 11.5 p.c., as a decline over the last half of 1963 was more than offset by increases in the first half of 1964. Mining advanced over the last half of 1963 due to expansion in non-metals; however, in 1964, this component weakened and the total mining index showed a slight decline.

The seasonally-adjusted index for construction rose by 8.3 p.c. between June 1963 and January 1964. The adjusted index of 131.7 reached in January 1964 was the highest recorded for that industry since June 1960 when the index rose to 132.6. The high level of employment in the last half of 1963 seems to have been largely a result of the seasonal shifting of demand referred to above. Thus, between January and July in 1964, the adjusted index for this division declined by 4.3 p.c. to 126.0.

The adjusted indexes for all the service-producing industrial divisions advanced during the past 13 months. Service led with an increase of 10.4 p.c., while trade and finance, insurance and real estate showed increases of 5.2 p.c. and 4.9 p.c., respectively. The significant improvement, however, was in transportation, storage and communication where an increase of 2.0 p.c. represented the first sustained growth in employment in several years.

TABLE 2. Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, Goods-Producing Industries

Year and month					Manufacturing							
	Forestry (chiefly logging)		Mining		All manufactures		Durable goods(u)		Non-durable goods(u)		Construction	
	Un-adjusted	Season-ally adjusted	Un-adjusted	Season-ally adjusted	Un-adjusted	Season-ally adjusted	Un-adjusted	Season-ally adjusted	Un-adjusted	Season-ally adjusted	Un-adjusted	Season-ally adjusted
Average - 1949	100.0		100.0		100.0		100.0		100.0		100.0

* Revised figures.

INDEX NUMBERS OF EMPLOYMENT, CANADA GOODS-PRODUCING INDUSTRIES

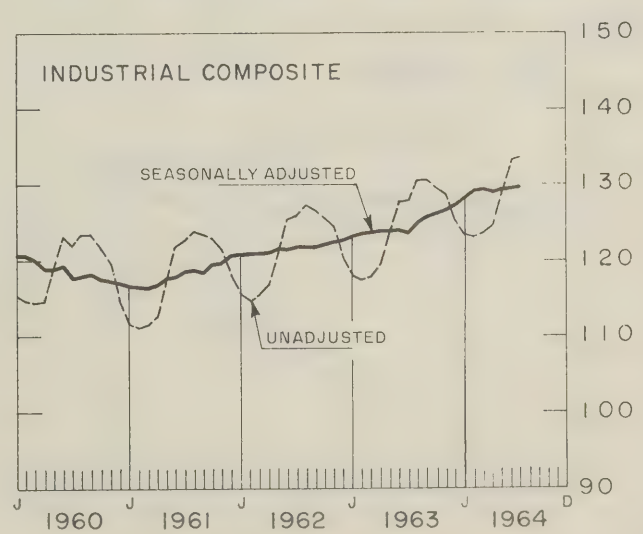

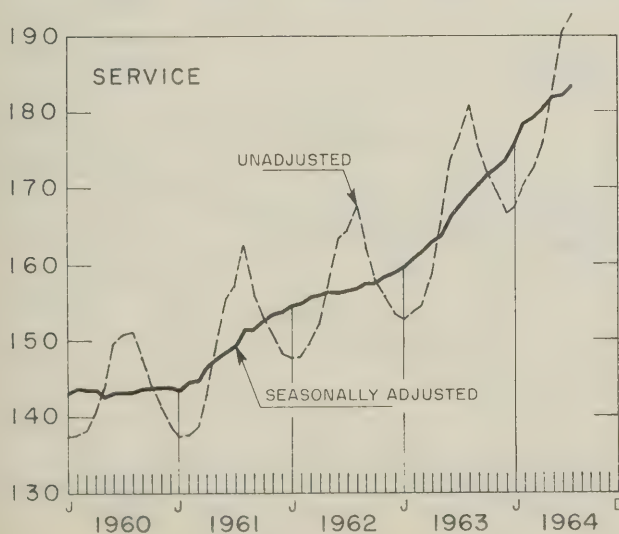

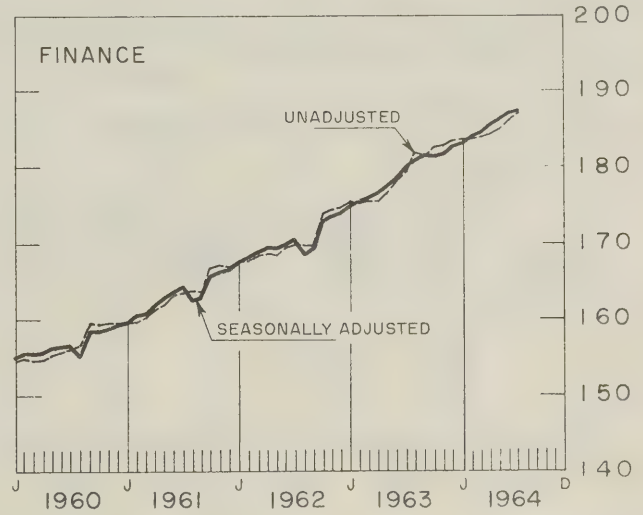

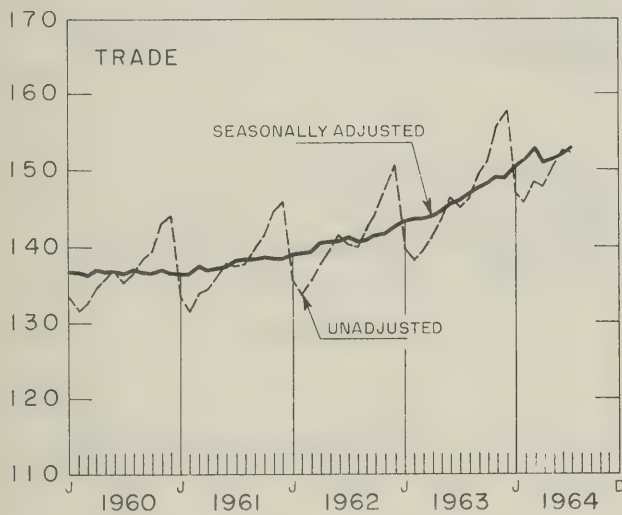

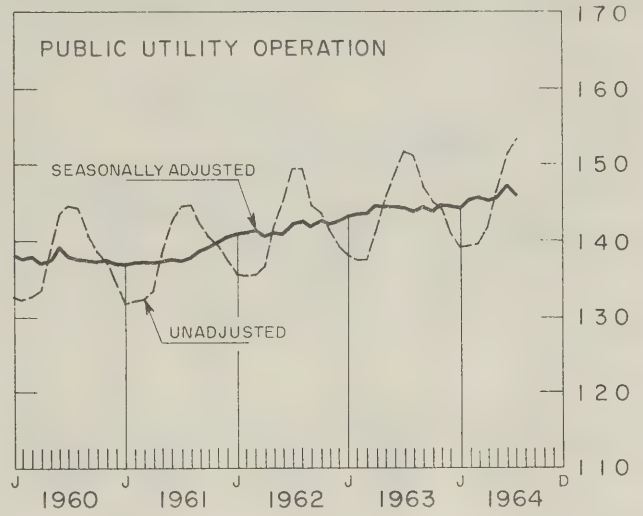

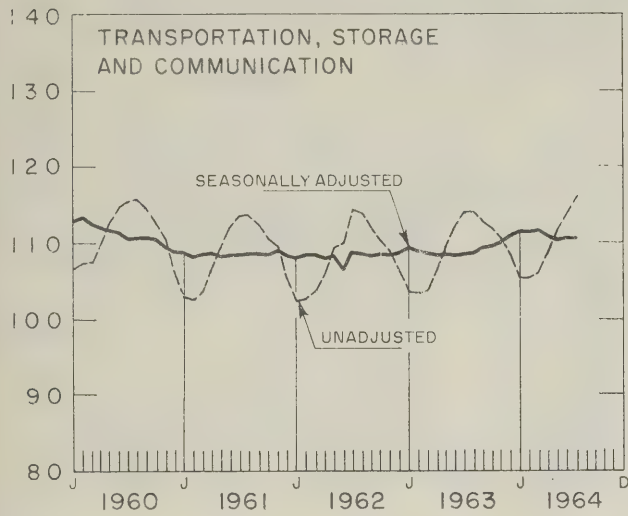

1949 = 100

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON.

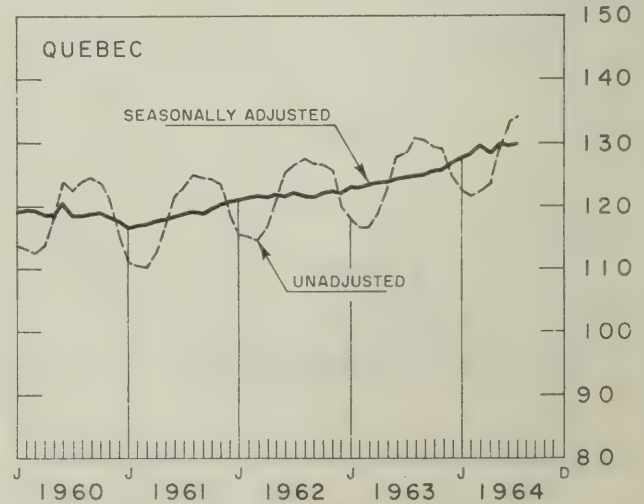

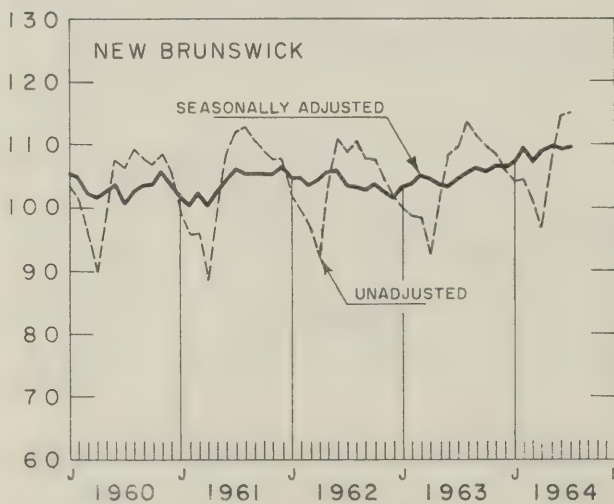

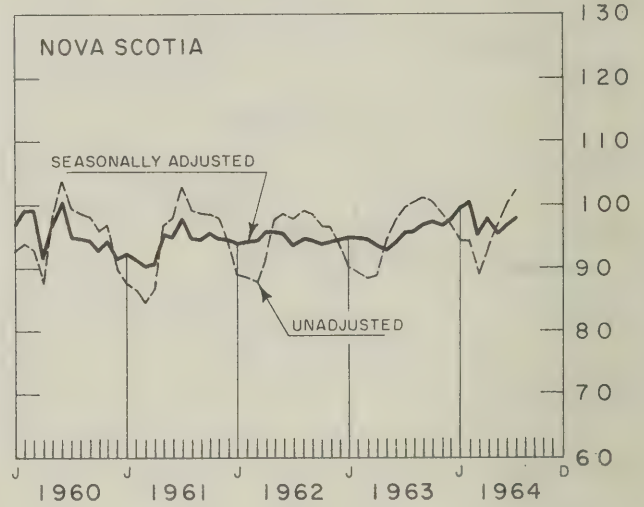

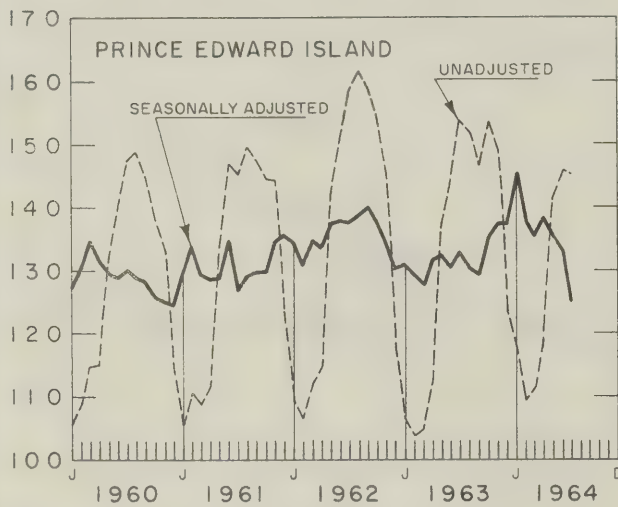

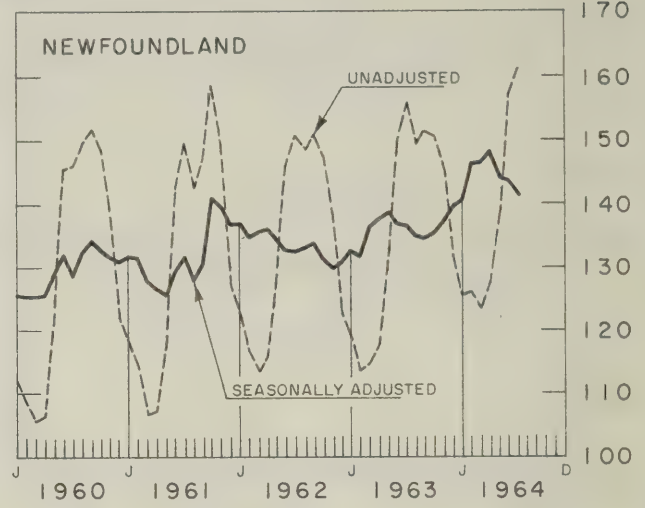

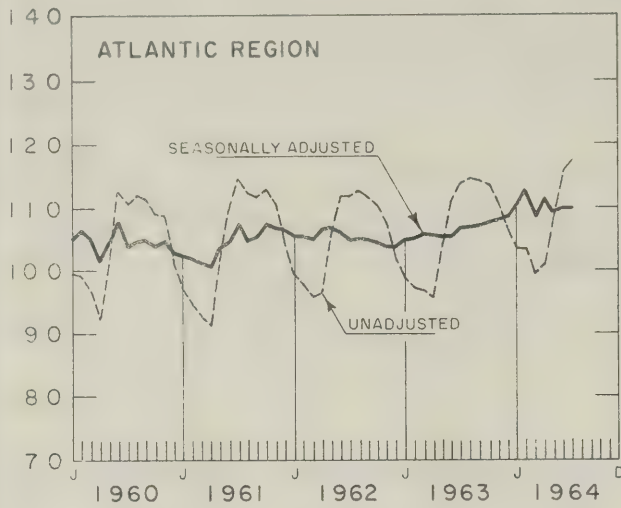

INDEX NUMBERS OF EMPLOYMENT, CANADA SERVICE-PRODUCING INDUSTRIES

1949=100

INDEX NUMBERS OF EMPLOYMENT, ATLANTIC REGION AND EASTERN PROVINCES

1949 = 100

INDEX NUMBERS OF EMPLOYMENT, ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

1949 = 100

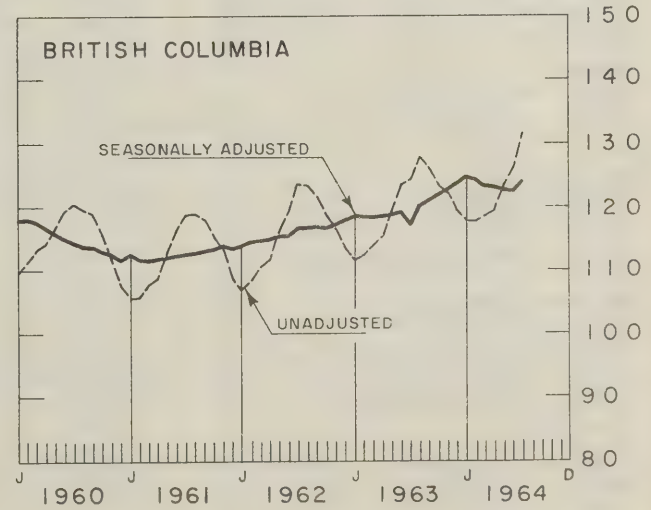

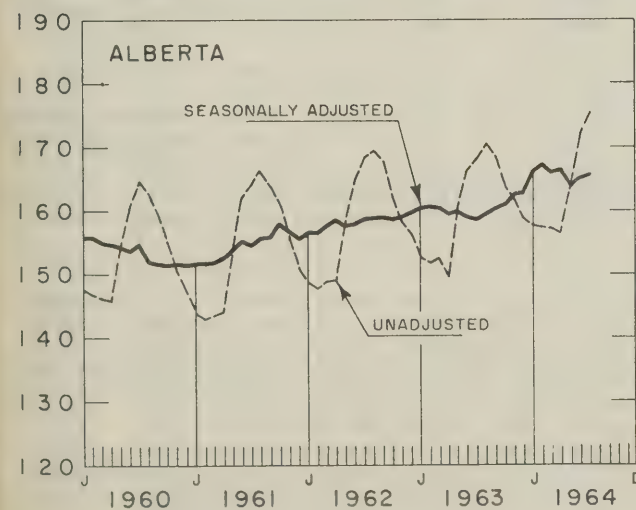

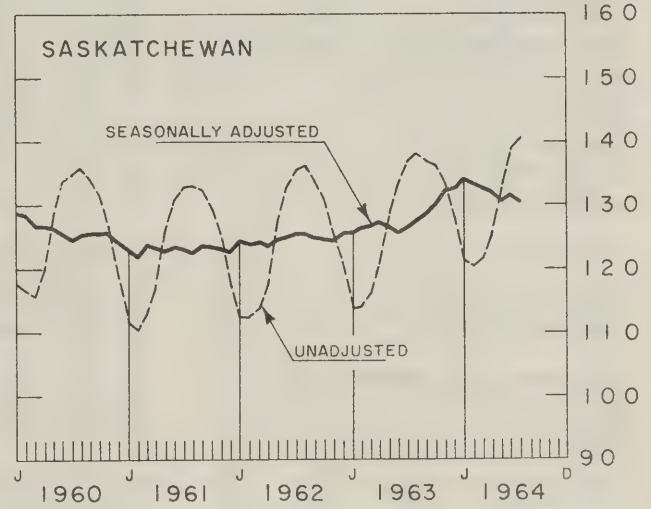

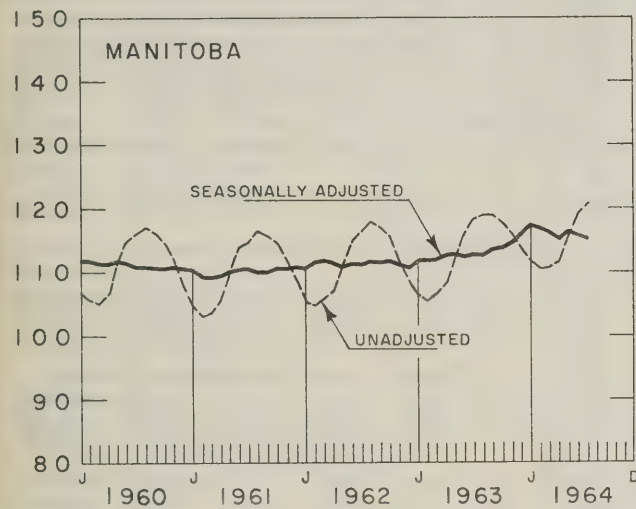

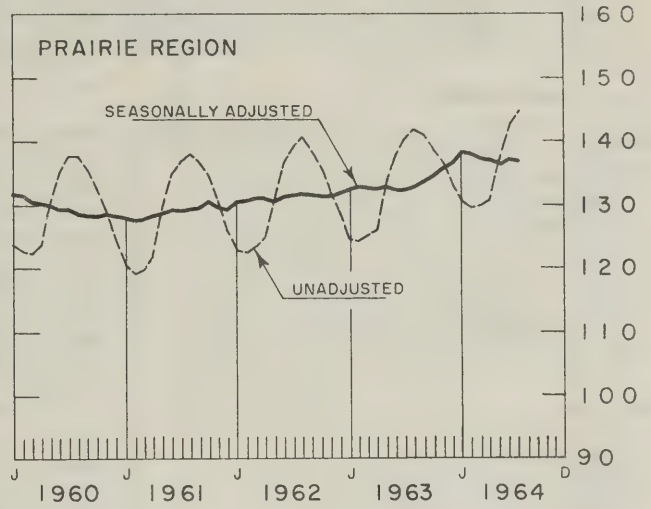

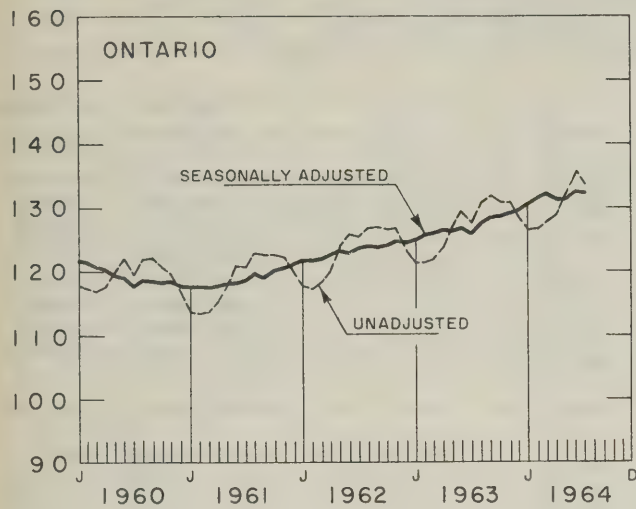

TABLE 4. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Estimated coverage (w)	Employment indexes				Average weekly wages and salaries				Employees reported July 1964
		July 1964	June 1964	July 1963	July 1962	July 1964	June 1964	July 1963	July 1962	
	%	1949 = 100				dollars				number
Forestry (chiefly logging)	76	89.1	83.0	79.5	78.8	93.02	89.11	89.05	85.32	64,587
Mining	96	120.8	119.7	118.0	121.2	106.27	105.18	102.25	98.76	106,713
Metal mining		136.0	135.2	130.6	136.7	106.05	105.39	103.47	100.10	64,236
Gold (a)		65.1	65.4	67.4	70.8	86.55	86.37	83.73	80.24	14,812
Other metal (b)		201.9	200.0	189.4	198.0	111.89	111.17	110.00	106.71	49,424
Iron		314.0	312.2	283.9	321.3	129.41	128.24	128.33	119.32	10,479
Uranium	125.93	123.05	120.36	114.04	3,071
Fuels		84.6	82.5	83.0	84.3	114.11	111.46	108.29	104.36	25,977
Coal		37.8	37.9	38.7	39.7	88.46	83.91	82.09	80.43	9,327
Oil and natural gas		274.1	263.6	264.0	266.5	128.48	127.53	123.94	118.95	16,650
Non-metal (c)		158.9	159.0	163.9	159.3	94.78	94.70	88.91	84.81	16,500
Asbestos		177.8	183.2	185.9	186.5	104.86	105.18	102.77	96.74	6,691
Manufacturing	92	122.6	124.2	116.9	115.5	89.12	89.73	85.30	83.13	1,326,429
Durable goods (u)		127.6	131.7	119.9	118.3	96.24	96.98	91.89	89.54	628,736
Non-durable goods (u)		118.3	117.8	114.5	113.1	82.71	82.95	79.52	77.52	697,693
Food and beverages		128.5	124.7	125.5	126.7	77.87	78.25	73.92	72.26	181,408
Meat products		141.1	140.3	138.9	137.6	87.23	88.21	85.44	82.96	32,180
Dairy products		139.3	137.7	140.0	136.1	75.35	75.97	72.36	69.01	17,217
Canned and cured fish		170.5	176.7	153.2	181.4	55.05	49.69	43.96	54.67	19,596
Canned and preserved fruits and vegetables		154.9	114.8	153.9	148.7	62.34	65.37	57.34	57.09	21,698
Grain mill products		100.3	99.7	94.9	100.9	87.14	86.75	83.66	83.94	9,337
Bread and other bakery products		115.1	115.5	115.1	113.4	76.91	77.19	72.83	70.28	24,038
Biscuits and crackers		99.0	103.5	97.5	100.4	71.72	71.59	68.28	63.85	7,130
Distilled and malt liquors		100.2	99.4	98.6	100.4	111.16	110.38	106.87	101.55	14,010
Other beverages (d)		176.8	172.2	171.0	162.5	83.05	84.28	80.04	73.15	13,063
Confectionery		84.6	85.5	83.9	82.8	66.63	65.77	63.29	59.69	8,435
Tobacco and tobacco products		82.9	83.5	80.0	81.7	91.98	91.30	90.12	86.55	8,413
Rubber products		118.1	118.8	111.1	105.6	91.04	92.79	87.78	85.96	23,487
Leather products		90.0	89.9	87.9	88.9	59.90	59.42	56.80	55.53	29,690
Boots and shoes (except rubber)		93.5	93.2	93.9	97.1	58.17	57.28	55.33	54.14	19,874
Other leather products (f)		83.7	84.0	77.1	74.2	63.39	63.71	60.05	58.80	9,816
Textile products (except clothing)		89.9	91.2	84.6	81.6	70.80	72.16	67.09	65.79	67,191
Cotton yarn and broad woven goods		76.5	77.7	73.5	71.9	67.03	70.47	62.87	61.38	18,638
Woollen goods		67.9	68.3	65.0	63.1	64.31	65.67	62.76	62.08	10,259
Synthetic textiles and silk (t)		110.6	111.2	98.1	91.5	78.53	78.79	73.84	72.07	18,922
Clothing (textile and fur)		98.1	99.8	93.7	91.7	55.34	54.63	53.12	51.63	105,892
Men's clothing		102.7	105.0	97.7	94.6	53.77	53.70	51.41	49.84	35,998
Women's clothing		107.4	108.1	99.9	97.2	56.96	54.55	55.28	53.88	29,266
Knit goods		77.3	78.2	74.8	73.6	55.48	55.39	52.52	50.23	20,046
Fur goods		59.1	59.4	60.6	65.0	81.44	82.74	78.86	76.53	2,625
Wood products		120.4	117.3	117.4	114.7	76.45	76.31	73.63	71.10	113,201
Saw and planing mills (g)		125.8	120.5	123.0	119.4	78.60	78.48	75.53	72.63	74,967
Furniture		124.6	125.7	120.7	116.7	74.01	73.77	71.55	70.02	28,333
Other wood products (h)		84.7	84.8	82.5	86.7	67.12	67.92	65.16	63.22	9,901
Paper products		136.8	134.4	131.8	129.9	104.68	105.06	101.30	98.72	102,848
Pulp and paper mills		138.7	134.6	133.3	131.0	112.22	112.83	108.51	106.11	73,602
Other paper products (i)		132.2	133.7	128.4	127.3	85.71	86.30	83.36	80.49	29,246
Printing, publishing and allied industries		123.9	126.4	126.4	126.2	96.79	97.15	92.88	90.61	59,562
Iron and steel products		123.5	124.2	116.5	111.8	101.27	101.82	97.60	95.75	200,444
Agricultural implements		73.7	74.3	69.9	58.7	109.22	111.24	103.07	100.39	12,961
Boilers and plate work		116.4	118.0	125.6	123.6	101.72	99.92	93.58	95.01	7,298
Fabricated and structural steel		158.5	160.8	149.5	164.7	103.63	105.09	100.17	96.34	11,888
Hardware and tools		127.7	130.2	116.3	109.6	87.62	88.47	85.09	82.70	14,521
Heating and cooking appliances		110.8	107.8	104.6	108.7	87.55	87.65	84.48	82.97	9,507
Iron castings		108.4	109.8	102.1	97.5	96.63	97.02	92.62	90.79	21,101
Machinery (j)		126.1	126.7	119.0	110.4	97.65	98.45	92.20	91.25	39,263
Industrial machinery (r)		147.2	147.6	137.4	124.3	98.10	99.41	92.46	91.89	31,563
Primary iron and steel		148.3	147.5	134.9	129.2	113.10	113.57	112.87	108.73	44,321
Sheet metal products		124.3	126.0	122.9	123.0	99.63	99.60	95.93	96.38	19,613
Wire and wire products		128.7	129.8	117.1	112.9	101.06	101.56	96.40	95.31	10,703

[†] Revised figures

EMPLOYMENT, URBAN AREAS INDUSTRIAL COMPOSITE 1949=100

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

**Estimated Provincial Coverage of all Paid Workers,
June 1, 1951**

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

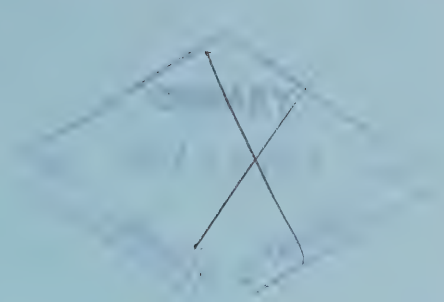

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

72-001 — Advance Statement on Employment and Weekly Earnings—Monthly—Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

72-003 — Man-Hours and Hourly Earnings—Monthly—Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

72-005 — Estimates of Labour Income—Monthly—Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

72-006 — Hiring and Separation Rates in Certain Industries—Semi-Annual—Price \$1.50 per year

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

72-201 — Review of Employment and Payrolls—Annual—Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

72-202 — Review of Man-Hours and Hourly Earnings—Annual—Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

72-203 — Earnings and Hours of Work in Manufacturing—Annual—Preliminary Report—Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

72-204 — Earnings and Hours of Work in Manufacturing—Annual—Final Report—Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

72-502 — Labour Income, 1926-58 — Price 75 cents

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS, AUGUST 1964

SUMMARY

The industrial composite index of employment (1949=100) was 136.3 at the end of August, up 1.7 per cent from the July figure of 134.0. All major industrial divisions shared in the advance except mining which showed a relatively large decline. Manufacturing accounted for well over half the overall gain as employees were recalled in the motor vehicles and related industries following completion of retooling in most establishments; also contributing to the rise in manufacturing, were increases in food and beverages - associated with fruit and vegetable canning - and advances in clothing.

Seasonally-adjusted, the industrial composite rose from 130.0 in July to 130.6 in August. This relatively large increase resulted from gains in manufacturing (0.9 p.c.), trade (0.8 p.c.), and finance, insurance and real estate (1.0 p.c.). The marked rise in manufacturing reflected movements in the durables component for which the seasonally-adjusted index rose 1.6 p.c. due to above-average increases in transportation equipment and electrical apparatus and supplies. The adjusted indexes for forestry, mining and construction declined over the month. The decline in mining was due mainly to a major industrial dispute in the metals group.

The seasonally-adjusted industrial composite indexes of employment rose 0.5 p.c., 0.8 p.c., and 0.6 p.c. for the Atlantic region, Ontario and British Columbia respectively, between July and August. The adjusted index for Quebec was virtually unchanged, while that for the Prairie region declined 1.2 p.c. The decrease in the Prairie region reflected, for the most part, major industrial disputes in the metal mining and processing industries.

The industrial composite of average weekly wages and salaries was \$87.16 in August, up 40 cents from July 1964 and \$3.80 from August 1963. The payroll index advanced 2.2 p.c. to 278.8 in August, the latest figure being 9.5 p.c. above August of last year.

EMPLOYMENT

Manufacturing

The seasonally-adjusted index of employment in manufacturing advanced 0.9 p.c. in August to 122.1. The increase between July and August was the first substantial rise in several months, and reflected a marked advance in durable goods manufacturing where the adjusted index rose 1.6 p.c. in the month to 129.7. The adjusted non-durables index edged up to 115.8 in August, 0.3 p.c. above July.

The large advance in the seasonally-adjusted index for durable goods manufacturing reflected strengthening in all major groups except non-ferrous metal products. The most important advance was in transportation equipment where employment in the motor vehicles industry rose markedly.

In transportation equipment, several major car manufacturers had completely recalled their employees by the end of August whereas in previous years the majority of employees were recalled in September. As a result, employment in August was substantially higher than is usually the case. The marked rise in the motor vehicles industry was offset to some extent by movements in motor vehicle parts and accessories. In that industry, the July to August increase was much smaller than

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

For footnotes (a) to (w) see page iii.

average due to an unusually high level of employment in July. Elsewhere in the transportation equipment group, employment in railroad and rolling stock equipment declined contra-seasonally and shipbuilding and repairing rose contra-seasonally.

The gains in other components of durables were more moderate. Further strengthening occurred in wood products as the saw and planing mills component continued to recover from the industrial dispute settled in July. Employment in iron and steel products expanded due to strengthening in agricultural implements, machinery and primary iron and steel. Only non-ferrous metals weakened over the month, due mainly to a major industrial dispute in Manitoba.

In non-durable-goods manufacturing, most component industries advanced from July to August. However, only textile products and printing, publishing and allied industries recorded increases that were above average. Marked advances in food and beverages and clothing conformed to usual seasonal patterns. However, within the food and beverage groups there were offsetting movements; the canned and cured fish industry rose more than seasonally, and the canned and preserved fruits and vegetables industry rose less than seasonally.

Non-Manufacturing Industries

The seasonally-adjusted indexes for goods-producing industrial divisions other than manufacturing declined in August. Forestry decreased by 2.8 p.c. to 78.0 as employment in this industry in Quebec did not increase as much as it usually does in August. Mining was down by 2.7 p.c. due, largely, to a major industrial dispute in metals. Construction was off 0.6 p.c. in August to 126.4; the industry has shown no clear trend since the marked decline in April from the high levels recorded in the winter of 1963-1964.

The seasonally-adjusted indexes for all service-producing industrial divisions rose in August, although only in trade and in finance, insurance and real estate were the gains substantial. The gains in trade occurred mainly in Ontario and Quebec and resulted from above-average increases in retailing.

Regional Employment

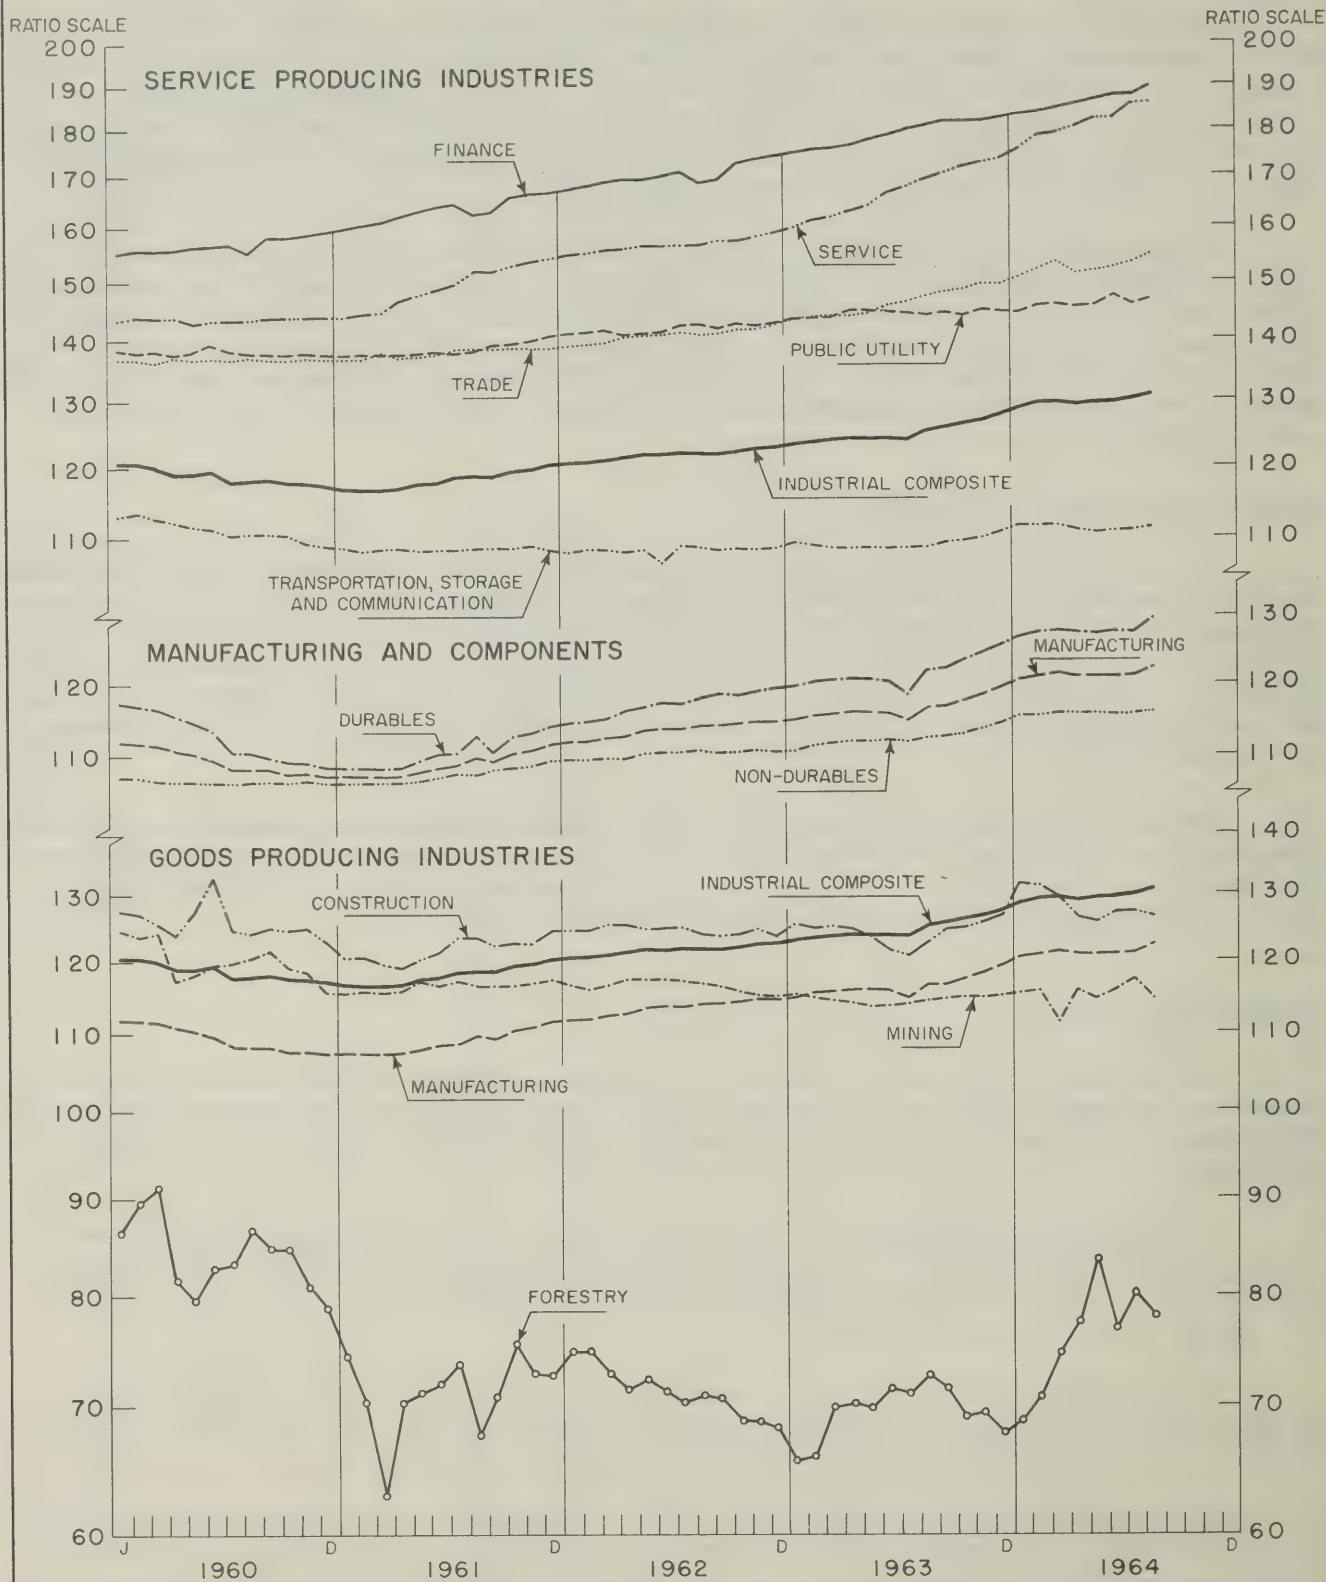

The seasonally-adjusted industrial composite indexes of employment rose in the Atlantic Region (0.5 p.c.), Ontario (0.8 p.c.) and British Columbia (0.6 p.c.). The index for Quebec was virtually unchanged while that for the Prairie Region declined.

In the Atlantic region, the adjusted indexes for all provinces except Nova Scotia increased in August. In general, buoyancy in manufacturing contributed to the advances. In other major industrial divisions employment changes were in line with usual seasonal expectations.

The adjusted index for Quebec, at 130.4, was virtually unchanged in August. In that region, larger-than-seasonal gains in manufacturing and trade were offset by smaller-than-seasonal increases in forestry and construction.

The marked advance in Ontario resulted, primarily, from substantial increases in manufacturing associated with the early changeover in motor vehicles. Also of significance were increases in trade, in finance, insurance and real estate, and in transportation, storage and communication. Only mining weakened in the province, reflecting reductions in gold and uranium.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

The decline in the seasonally-adjusted index for the Prairie Region was reflected in all provinces although a major part of the decrease resulted from an industrial dispute in metal mining and processing in Manitoba.

The advance in British Columbia was due mainly to gains in manufacturing. An additional factor was that employment in forestry in August continued at July levels instead of declining as is usually the case. The only weakening occurred in trade, where employment declined contra-seasonally.

Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by 40 cents in August to \$87.16. Most major industrial divisions also advanced with increases of \$1.00 or more recorded in forestry, in transportation, storage and communication and in finance, insurance and real estate. The most important factor contributing to the rise in the composite was an increase of 51 cents in manufacturing accompanied by a marked gain in employment in that relatively highly-paid industry. The gains in the above industries were offset to some extent by declines in mining (\$1.69), trade (52 cents) and in service (31 cents).

The increase in manufacturing in August resulted from an increase of \$1.17 in durables combined with a marked increase in employment in that component. The major factor contributing to the rise in durables was the return to work of the highly paid automobile workers.

Average earnings were up in August in seven of the ten provinces. The gains ranged from 10 cents in Nova Scotia to 88 cents in Alberta. Per capita earnings declined in Prince Edward Island (\$1.19), New Brunswick (92 cents) and Saskatchewan (23 cents). The decline in the Atlantic Region provinces was due, mainly, to short time in the fish processing industries.

TABLE 2. Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, Goods-Producing Industries

Year and month					Manufacturing

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), WITH UNADJUSTED INDEX NUMBERS, CANADA, GOODS PRODUCING INDUSTRIES

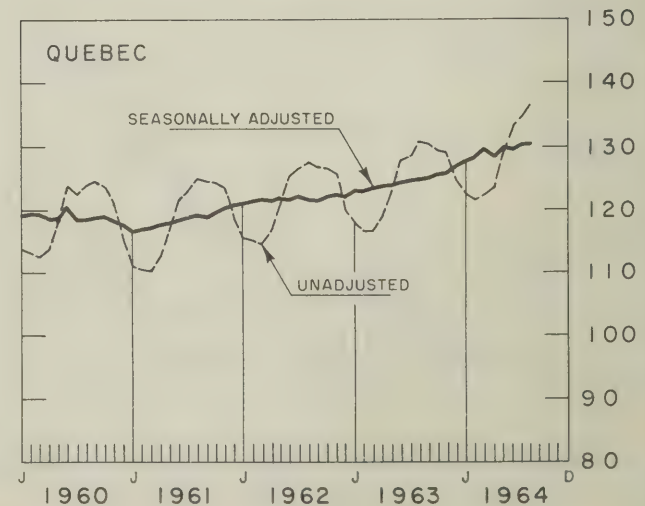

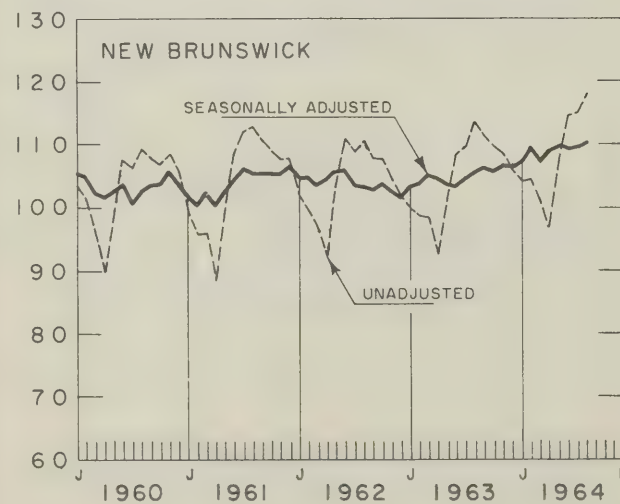

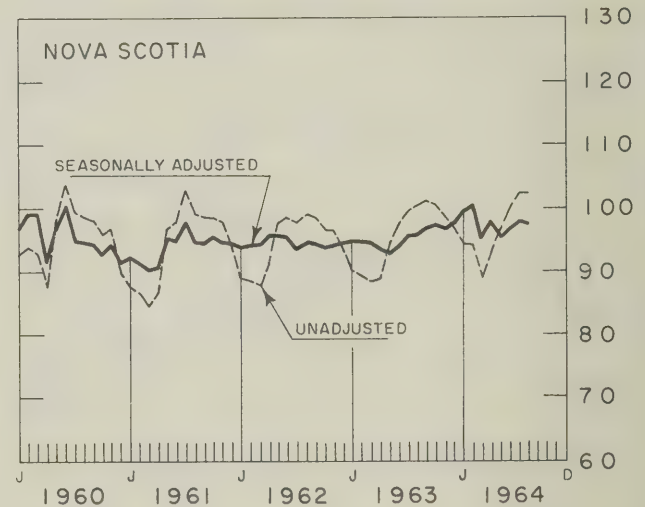

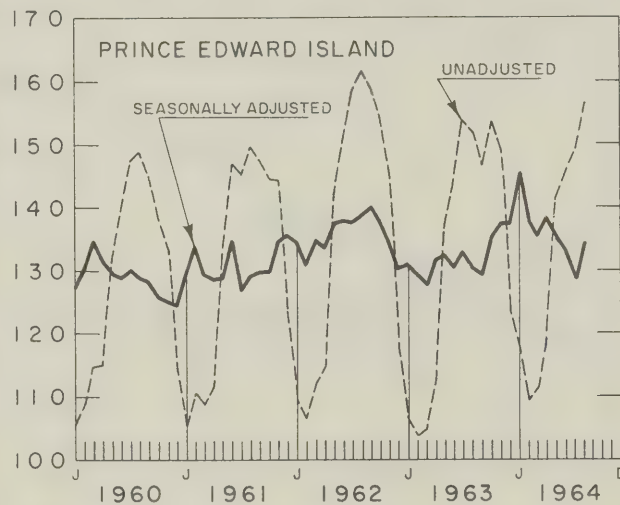

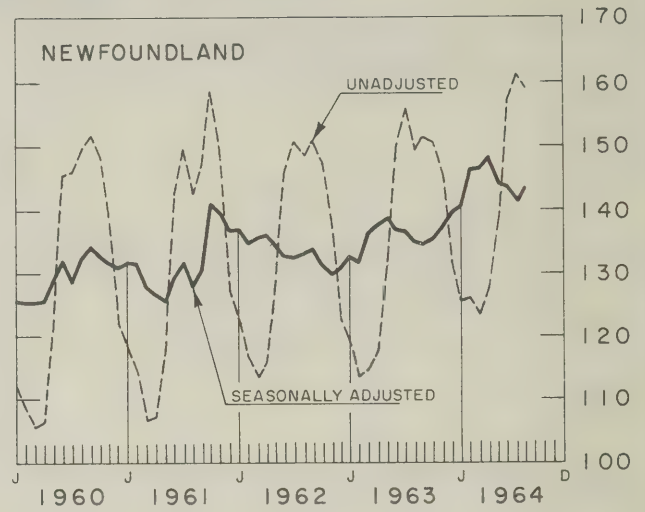

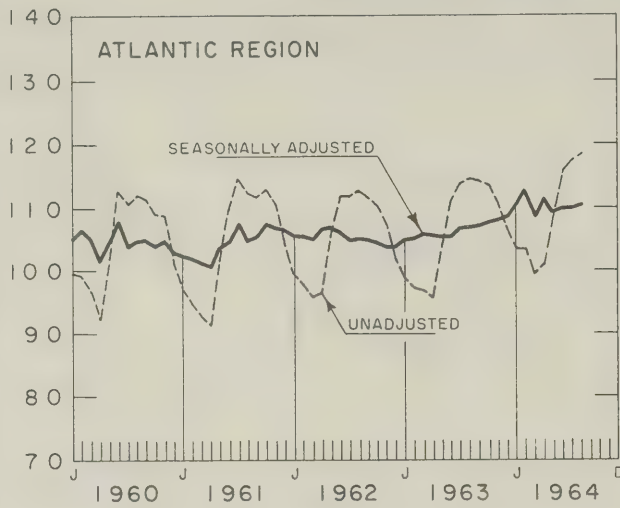

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA, SERVICE-PRODUCING INDUSTRIES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

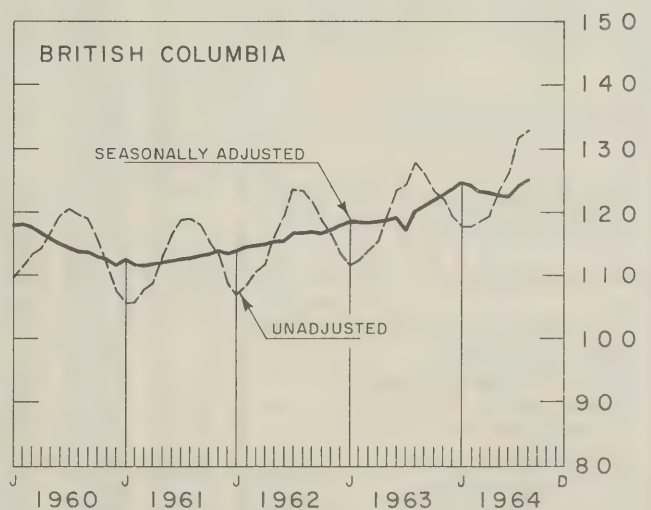

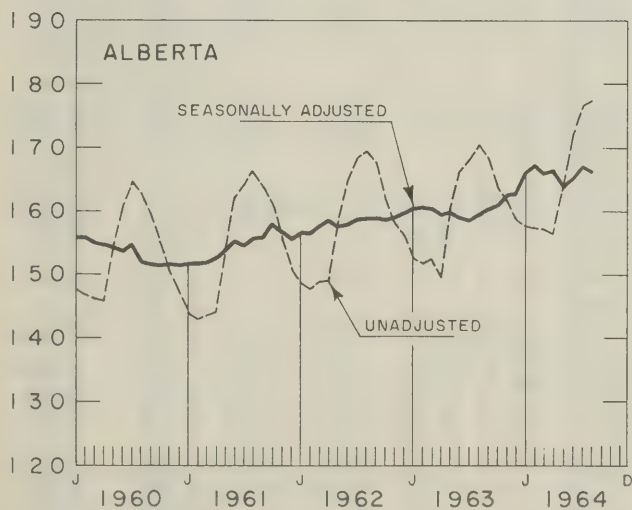

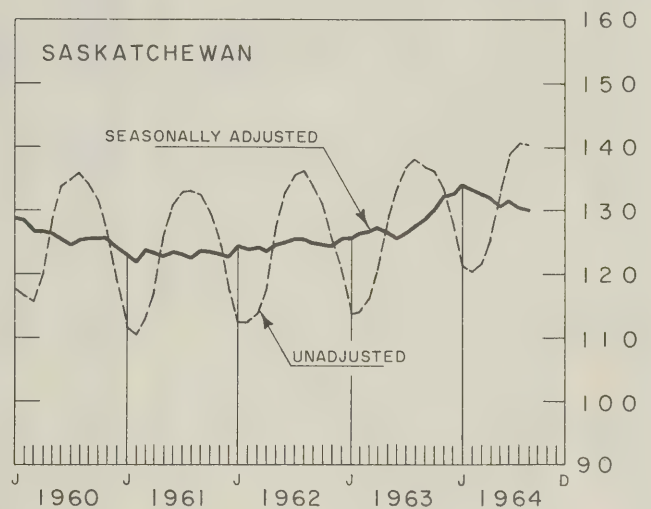

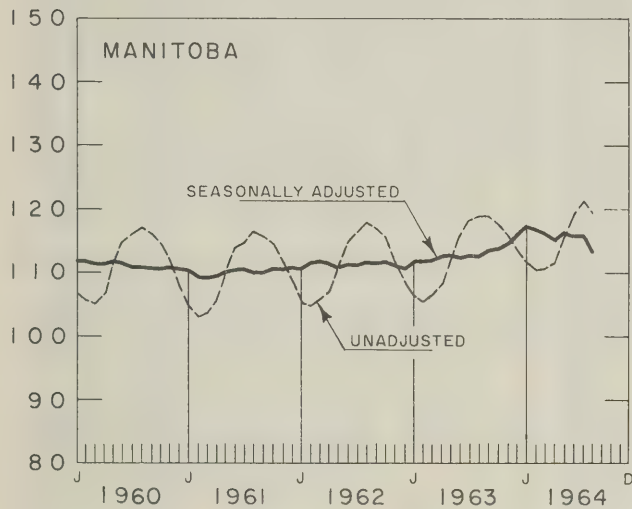

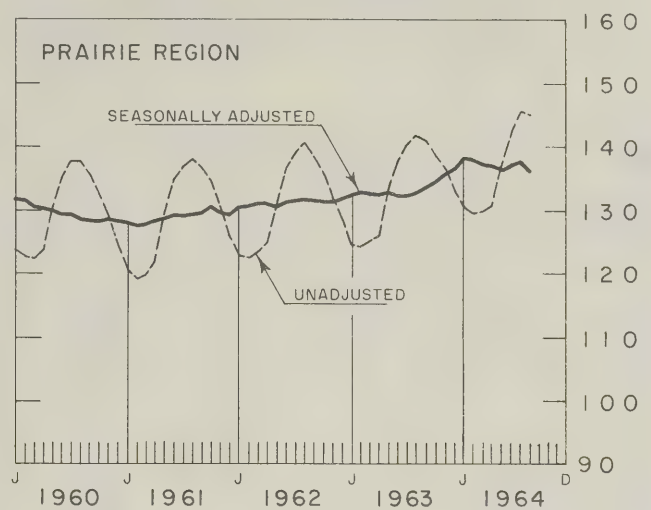

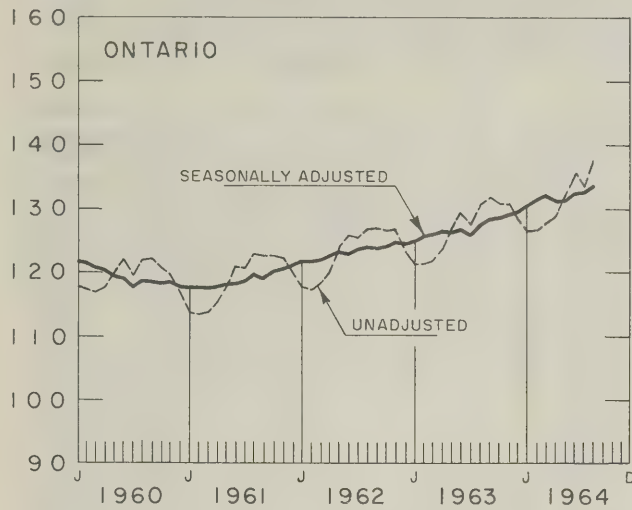

TABLE 4. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Esti- mated cov- erage (w)	Employment indexes				Average weekly wages and salaries				Employees reported August 1964
		Aug. 1964	July 1964	Aug. 1963	Aug. 1962	Aug. 1964	July 1964	Aug. 1963	Aug. 1962	
	%	1949 = 100				dollars				number
Forestry (chiefly logging)	76	91.5	89.8	84.5	81.6	94.46	93.43	86.34	82.52	66,351
Mining	96	118.2	121.7	118.0	120.7	104.23	105.92	101.80	98.39	104,432
Metal mining		131.4	136.0	130.8	136.2	105.02	106.14	102.53	100.17	62,045
Gold (a)		63.2	65.2	66.5	69.9	85.32	86.49	81.82	81.57	14,385
Other metal (b)		194.7	201.9	190.5	197.8	110.97	112.04	109.26	106.28	47,660
Iron		311.4	314.3	280.9	316.3	127.67	129.15	128.73	120.62	10,391
Uranium	125.97	129.87	114.71	109.28	2,744
Fuels		81.8	84.6	82.1	82.9	110.80	114.11	107.81	102.99	25,133
Coal		36.6	37.8	38.7	37.7	81.94	88.46	80.78	75.58	9,023

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

**Estimated Provincial Coverage of all Paid Workers,
June 1, 1951**

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page 1.

8003-501

Price: 30 cents
\$3.00 a year

Volume 42, No. 9

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

72-001 — Advance Statement on Employment and Weekly Earnings—Monthly—Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

72-003 — Man-Hours and Hourly Earnings—Monthly—Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

72-005 — Estimates of Labour Income—Monthly—Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

72-006 — Hiring and Separation Rates in Certain Industries—Semi-Annual—Price \$1.50 per year

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

72-201 — Review of Employment and Payrolls—Annual—Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

72-202 — Review of Man-Hours and Hourly Earnings—Annual—Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

72-203 — Earnings and Hours of Work in Manufacturing—Annual—Preliminary Report—Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

72-204 — Earnings and Hours of Work in Manufacturing—Annual—Final Report—Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

72-502 — Labour Income, 1926-58 — Price 75 cents

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS
SEPTEMBER 1964

Summary

The industrial composite index of employment declined from 136.4 in August to 136.0 at the end of September. The change between these months is usually small as most industries are operating at seasonal peaks of production throughout this period.

Seasonally adjusted, the industrial composite advanced from 130.8 in August to 131.0 in September. The increase resulted from small to moderate gains in most major industrial divisions. There were declines in forestry, mining and service.

The small increase in manufacturing (0.2 p.c.) resulted from an advance in durables of 0.4 p.c. In that component, all major industry groups strengthened after allowance for usual seasonal movements, except transportation equipment.

The seasonally-adjusted industrial composites for all regions except the Atlantic Region advanced in September. The increases were moderate, however, varying from 0.2 to 0.6 p.c. The reduction in the Atlantic region reflected movements in Newfoundland and Nova Scotia, where the seasonally-adjusted industrial composite indexes of employment declined by 1.7 p.c. and 2.0 p.c., respectively.

The industrial composite of average weekly wages and salaries for September, rose by 85 cents to \$88.04. The September figure was \$3.82 above September 1963. The payroll index for the current month, at 281.0, was up 0.6 p.c. from August and 9.1 p.c. from the same month last year.

Employment

Manufacturing

The seasonally-adjusted index of employment for manufacturing recorded a small increase in September thereby maintaining the gains recorded in August. As a result, the third quarter average of 121.9 was 0.8 p.c. above the second quarter average of 120.9. The recent improvement was due primarily to movements in durable goods manufacturing where the third quarter was up 1.3 p.c. over the second. The third quarter average for non-durables advanced by 0.4 p.c. over the second quarter.

The increase in the seasonally-adjusted index for durable goods manufacturing resulted from improvement in all major industry groups except transportation equipment. Employment declined in wood and non-metallic mineral products but in each case the decrease was less than seasonal. In non-ferrous metals, employment in September was maintained at August levels although it usually declines at this time; the stimulating factor here was the completion of a major industrial dispute in smelting and refining. Iron and steel products and electrical apparatus and supplies advanced in September although, typically, there is little change between these months. Transportation equipment also rose in September but the increase did not differ significantly from the average increase between these months in recent years.

The improvement in wood products marked a continuation of a movement that began in July, at which time the industry began to make up ground lost in the second quarter due to industrial disputes and a contraction in construction. The gain in iron and steel reflected marked improvement in fabricated and structural steel and

Note: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

in iron castings; there was a seasonal increase in machinery, and seasonal declines in primary iron and steel and sheet metal products. In transportation equipment, there was a larger-than-usual increase in motor vehicles as all firms completed the changeover, and most resumed operation at higher levels of employment than existed before the changeover. However, the gains in motor vehicles were offset by some slackening in other components.

The seasonally-adjusted index for non-durable goods manufacturing was virtually unchanged in September at 116.0. In general, the component industries showed variations that differed little from usual seasonal movements.

Non-Manufacturing Industries

In goods producing industries other than manufacturing, the adjusted indexes for forestry and mining declined while that for construction rose. The decline in forestry reflected conditions in the Atlantic Region and British Columbia where employment in September continued at August levels whereas it usually rises between these months. The decline in the adjusted index for mining resulted from a larger-than-seasonal decline in the oil and natural gas industry.

The seasonally-adjusted indexes for all service-producing industrial divisions except service rose from August to September. The most significant increase occurred in transportation, storage and communication where employment in railways declined much less than is usual for the time of year. Trade showed a small increase, as the retail component continued to expand.

Regional Employment

The seasonally-adjusted industrial composites advanced in all regions except the Atlantic Region. The increases for the various regions were Quebec 0.5 p.c., Ontario 0.4 p.c., the Prairie Region 0.6 p.c. and British Columbia 0.2 p.c. The gain in the Prairie Region reflected movements in Manitoba and Saskatchewan where the adjusted indexes rose by 1.0 p.c. and 1.1 p.c. respectively. A decline of 1.1 p.c. for the Atlantic Region resulted from reductions in the adjusted indexes for Newfoundland (1.7 p.c.) and Nova Scotia (2.0 p.c.).

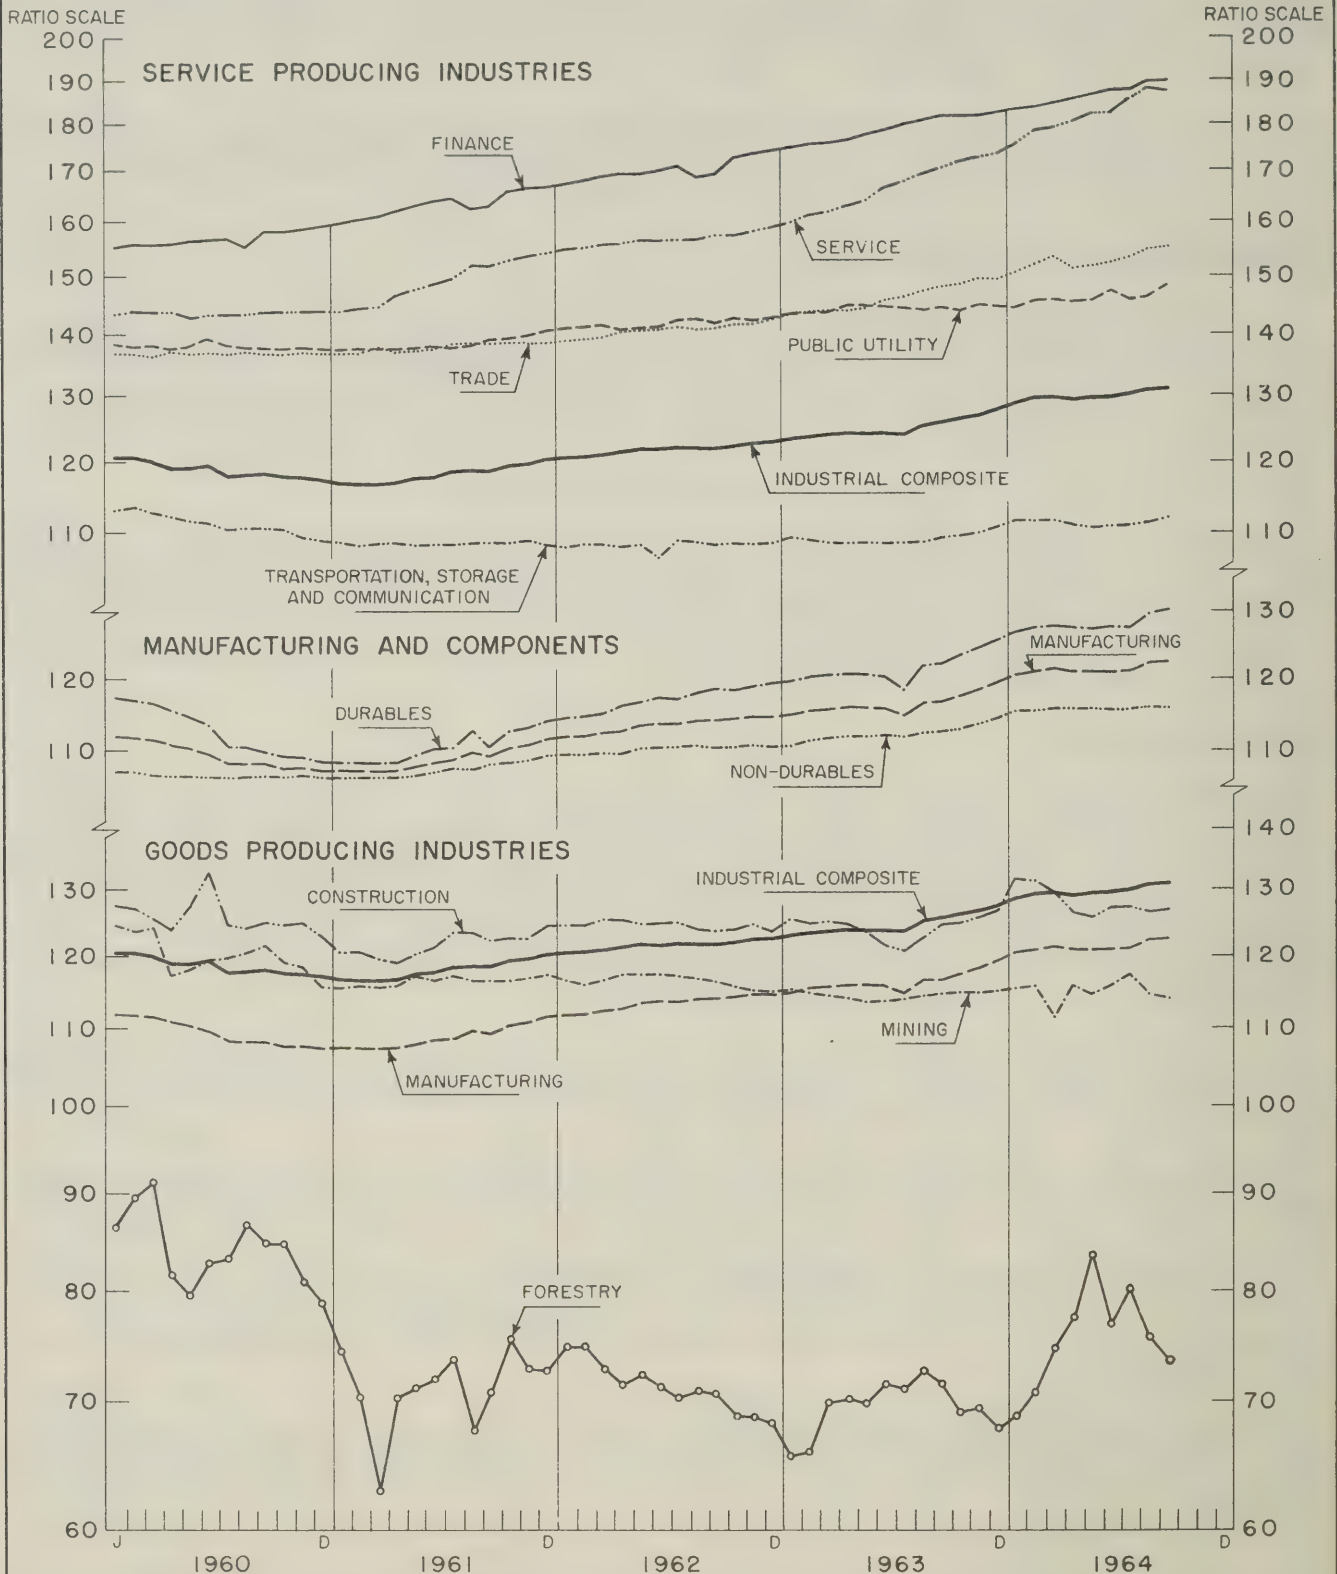

In the Atlantic Region, the decline was due primarily to movements in forestry. This division showed virtually no change from August to September although it usually records a large increase at this time.

In Quebec, employment declined less than seasonally in manufacturing and rose more than seasonally in trade. Other divisions recorded usual seasonal movements.

In Ontario, employment strengthened in manufacturing and construction but movements in other divisions were seasonal. In the Prairie Region, employment was up in manufacturing and in transportation, storage and communication after allowance for usual seasonal variations.

In British Columbia, there were above-average increases in manufacturing and trade. However, these gains were offset by larger-than-seasonal reductions in forestry and service.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

Average Weekly Wages and Salaries

Average weekly wages and salaries rose by 85 cents to \$88.04 cents in September. The advance resulted from increases in the averages for all industrial divisions except trade and finance, insurance and real estate which declined by 44 and 16 cents, respectively.

The increases in average weekly earnings were large, amounting to 80 cents or more in every division except forestry, which rose by 30 cents. Mining increased by \$2.07 as gains of about \$2.00 were recorded for each component. In construction, an increase of \$1.09 reflected a combination of two factors; a gain of \$1.49 in the building and general engineering component and a relatively large decline in employment among lower paid highway, bridge and street construction workers.

In manufacturing, average earnings rose by \$1.32 as the durable and non-durable components rose by \$1.56 and \$1.01, respectively. In addition, employment in durables - in which average earnings are higher than the average for all manufacturing - increased substantially relative to that for non-durables.

All components of durables rose by \$1.00 or more in September. The gains ranged from \$1.00 in iron and steel and electrical apparatus and supplies to \$2.53 in transportation equipment. The marked rise in earnings in transportation equipment, associated with a large seasonal increase in employment in that relatively highly paid industry, was a major factor contributing to the sizable increase in average earnings in durables.

In non-durables, there were increases in every industry group except petroleum products which fell by 18 cents. In most cases, the increases were in excess of 90 cents except in leather (11 cents) and clothing (41 cents). The largest increase was in rubber products where a gain of \$3.43 was due, in large part, to increased overtime in the tires group.

Per capita earnings rose in every province except Newfoundland (7 cents) and Alberta (29 cents). There were increases of 90 cents or more in Prince Edward Island, New Brunswick, Quebec, Ontario, and British Columbia. The largest advance occurred in Ontario, where earnings rose by \$1.06.

TABLE 2. Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, Goods-Producing Industries

Year and month					Manufacturing							
	Forestry (chiefly logging)		Mining		All manufactures		Durable goods(u)		Non-durable goods(u)		Construction

^r Revised figures.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA, GOODS PRODUCING INDUSTRIES

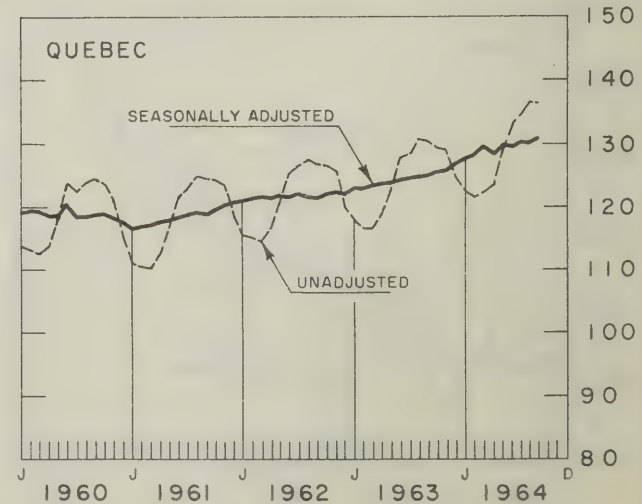

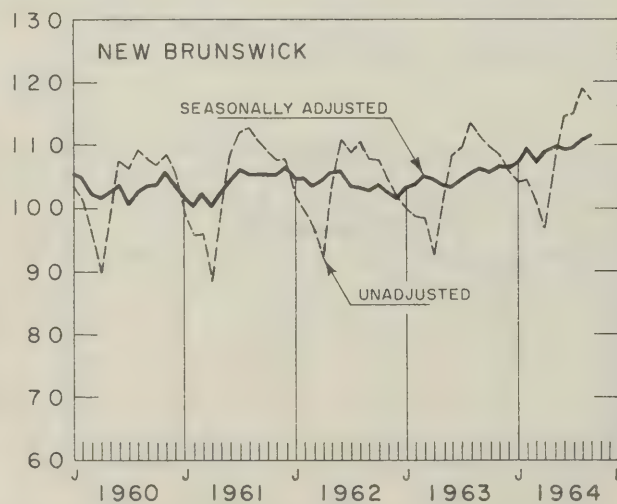

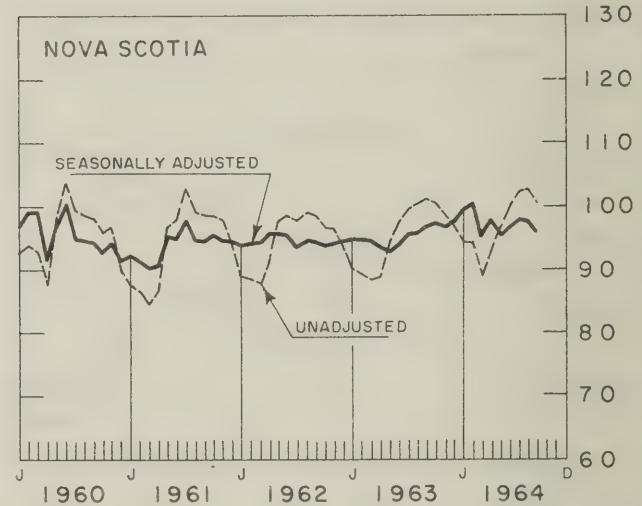

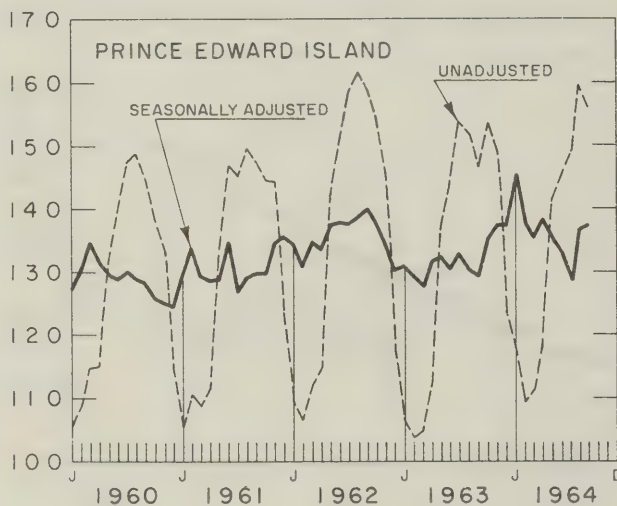

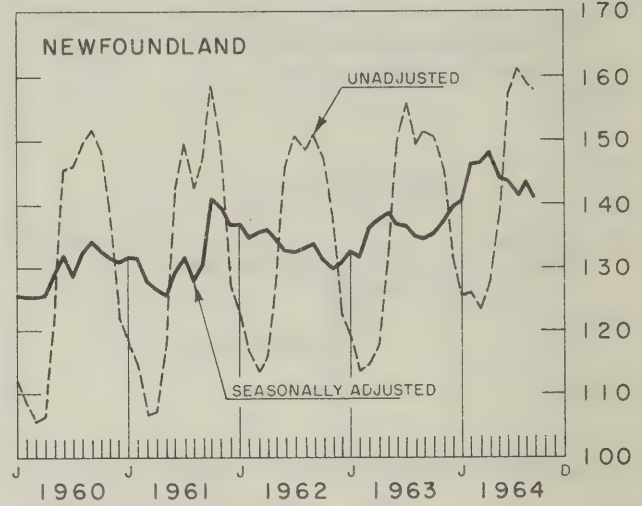

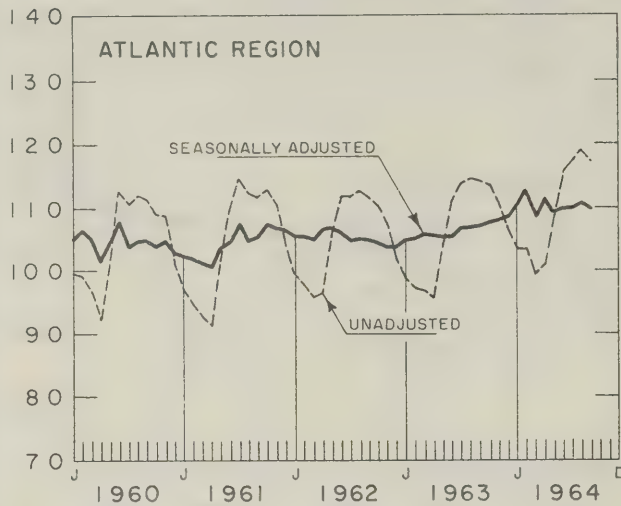

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA, SERVICE-PRODUCING INDUSTRIES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), WITH UNADJUSTED INDEX NUMBERS, ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

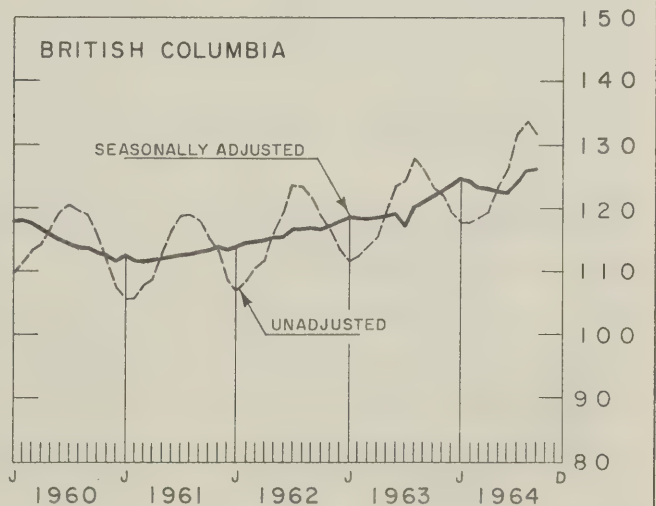

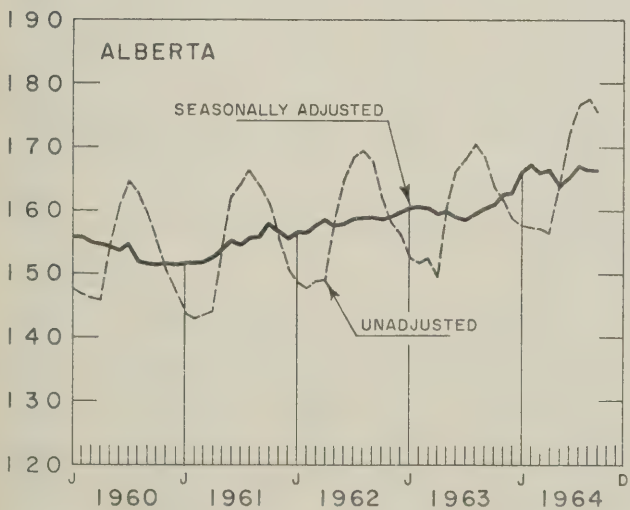

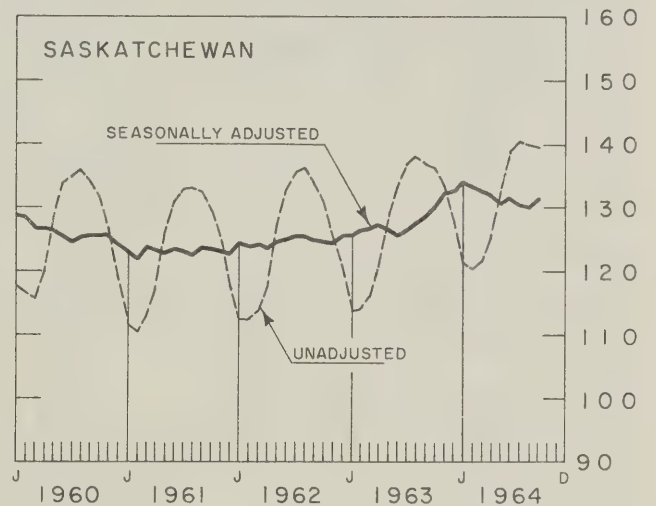

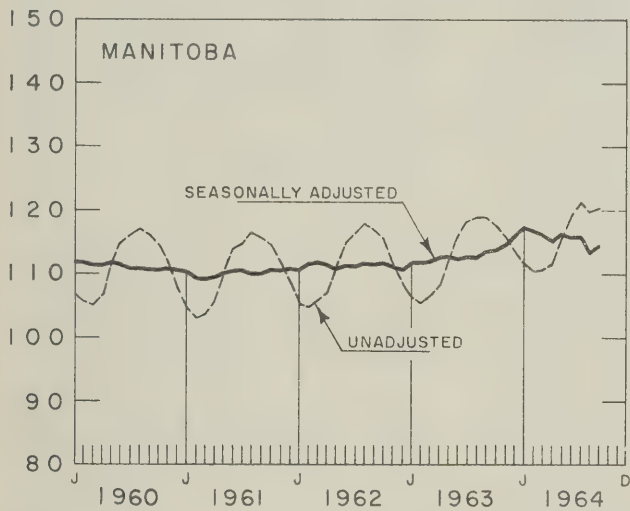

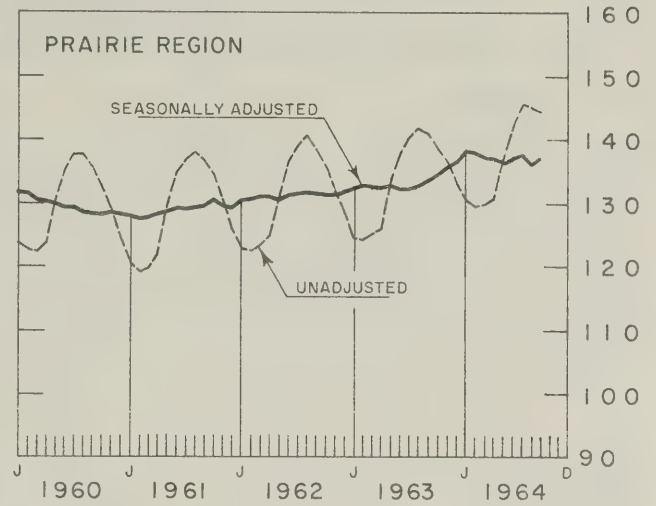

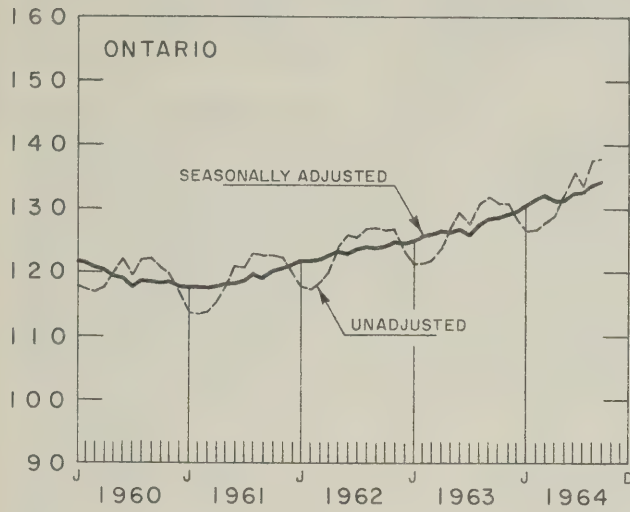

TABLE 4. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Esti- mated cov- erage (w)	Employment indexes				Average weekly wages and salaries				Employees reported September 1964
		Sept. 1964	Aug. 1964	Sept. 1963	Sept. 1962	Sept. 1964	Aug. 1964	Sept. 1963	Sept. 1962	
	%	1949=100				dollars				number
Forestry (chiefly logging)	76	91.6	88.5	88.5	86.8	95.58	95.28	90.63	84.42	66,489
Mining	96	116.3	118.4	116.7	118.2	106.16	104.09	103.21	99.15	102,782
Metal mining		129.8	131.6	129.3	133.1	106.82	104.88	104.18	99.43	61,319
Gold (a)		61.0	63.2	64.6	68.6	87.14	85.32	84.76	80.68	13,883
Other metal (b)		193.8	195.1	189.5	193.1	112.58	110.77	110.33	105.61	47,436
Iron		301.7	311.4	298.0	313.0	131.88	127.67	124.62	118.08	10,069
Uranium	129.56	125.97	119.75	108.32	2,599
Fuels		80.6	81.8	81.7	82.6	112.87	110.80	108.60	105.49	24,761
Coal		37.7	36.6	38.6	39.5	85.83	81.94	83.89	79.63	9,284
Oil and natural gas		254.8	265.2	257.4	258.9	129.09	126.97	123.71	121.62	15,477
Non-metal (c)		160.5	166.1	162.3	155.4	93.76	91.52	91.78	88.21	16,702
Asbestos		168.2	174.1	185.8	184.8	107.50	103.73	103.60	97.05	6,331
Manufacturing	92	126.2	126.4	120.3	117.6	90.97	89.65	86.71	83.91	1,366,536
Durable goods (u)		132.9	132.1	124.5	120.6	99.12	97.56	94.13	91.36	654,936
Non-durable goods (u)		120.7	121.6	116.8	115.0	83.47	82.46	80.09	77.37	711,600
Food and beverages		133.1	135.9	130.7	129.9	76.12	74.82	72.70	69.90	188,085
Meat products		141.0	142.2	138.2	135.9	87.79	87.60	84.65	82.68	32,150
Dairy products		128.4	135.8	127.7	125.2	76.55	75.59	73.40	70.57	16,122
Canned and cured fish		155.8	182.0	160.4	152.7	50.42	49.44	45.82	44.49	17,941
Canned and preserved fruits and vegetables		212.5	211.5	203.1	204.9	58.77	55.34	55.69	52.97	29,722
Grain mill products		98.4	99.1	96.6	99.5	89.05	87.91	85.52	82.85	9,150
Bread and other bakery products		114.4	116.5	112.4	113.1	76.93	76.06	73.44	69.95	23,913
Biscuits and crackers		101.9	100.2	96.7	102.2	73.16	71.56	68.88	64.36	7,335
Distilled and malt liquors		98.2	100.0	96.4	96.2	109.50	108.88	105.87	102.27	13,731
Other beverages (d)		163.0	170.1	159.3	152.1	78.71	78.78	75.46	72.08	12,045
Confectionery		103.9	98.6	101.9	102.4	65.12	65.51	61.59	60.77	10,365
Tobacco and tobacco products		82.5	82.7	79.5	80.5	94.48	93.41	88.77	86.04	8,371
Rubber products		120.8	119.4	106.6	109.7	97.07	93.64	92.11	87.86	24,012
Leather products		91.8	91.4	89.6	89.9	61.63	61.52	59.43	56.99	30,269
Boots and shoes (except rubber)		94.5	94.1	95.0	96.7	59.61	59.89	57.43	54.57	20,082
Other leather products (f)		86.9	86.6	79.8	77.6	65.62	64.72	63.77	62.45	10,187
Textile products (except clothing)		91.4	91.8	86.4	83.6	74.05	73.12	70.21	67.82	68,307
Cotton yarn and broad woven goods		78.5	78.9	75.2	75.1	72.30	71.53	68.41	64.76	19,122
Woollen goods		67.7	68.4	66.3	63.0	65.99	65.80	64.29	63.37	10,234
Synthetic textiles and silk (t)		112.1	112.9	99.0	93.6	81.11	79.86	76.50	73.85	19,187
Clothing (textile and fur)		102.4	102.1	98.9	96.1	57.64	57.23	55.09	53.37	110,500
Men's clothing		106.3	105.7	102.3	99.6	56.22	55.45	53.88	52.34	37,255
Women's clothing		116.3	115.4	109.7	104.5	59.34	59.27	56.86	54.60	31,689
Knit goods		78.5	78.8	75.8	75.8	57.79	57.43	54.48	52.91	20,357
Fur goods		60.7	59.1	64.6	66.7	84.46	82.81	77.52	75.01	2,706
Wood products		119.1	121.2	116.2	112.1	79.01	77.97	75.78	73.93	111,917
Saw and planing mills (g)		122.5	125.8	119.5	114.4	80.99	79.95	77.18	75.59	72,941
Furniture		129.3	128.5	124.9	121.2	77.06	76.31	75.03	73.07	29,393
Other wood products (h)		82.0	83.7	82.3	82.8	69.94	67.74	67.58	64.81	9,583
Paper products		135.5	137.8	130.6	130.1	105.71	104.44	102.33	99.12	101,859
Pulp and paper mills		135.2	138.8	130.4	130.7	113.47	111.82	110.33	107.08	71,786
Other paper products (i)		136.0	135.3	131.2	128.7	87.18	86.28	83.26	79.74	30,073
Printing, publishing and allied industries		126.1	125.0	127.5	127.0	98.92	97.76	94.73	91.79	60,535
Iron and steel products		125.2	124.8	116.1	113.7	103.20	102.20	98.90	96.67	203,196
Agricultural implements		71.3	73.7	65.2	59.7	108.40	109.52	101.03	98.99	12,535
Boilers and plate work		115.8	114.3	123.9	128.4	102.89	101.51	98.69	96.01	7,259
Fabricated and structural steel		169.7	164.4	150.9	161.6	104.22	103.59	102.16	100.30	12,729

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan.....	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

Price: 30 cents
\$3.00 a year

Volume 42, No. 10

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58**—Price 75 cents
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS, OCTOBER 1964

Summary

The industrial composite index of employment (1949=100) was 134.4 in October, down 1.3 p.c. from the September figure of 136.2. The decrease resulted from declines in all major divisions except trade. Widespread reductions are usual between these months as staff associated with outdoor activities is reduced. There was an increase in trade as retail establishments took on additional workers to cope with the heavy year-end buying associated with Christmas.

Seasonally-adjusted, the composite was off 0.2 p.c. from 131.2 to 131.0. The slackening reflected declines in the adjusted indexes for forestry (7.4 p.c.), manufacturing (0.7 p.c.), transportation, storage and communications (0.7 p.c.) and finance, insurance and real estate (0.9 p.c.). At least three quarters of the overall reduction resulted from the decreases in forestry and manufacturing. In the former, the weakening was centred in Quebec and the Atlantic Region, and continued a trend which has been in evidence for several months. In the latter, the decreases resulted from extensive layoffs in the automobile industries due to shortages of materials and orders, arising from industrial disputes in the United States. For the most part, these losses were offset by a substantial increase in construction where the adjusted index rose by 3.5 p.c., and by smaller gains in mining, trade and service.

The seasonally-adjusted industrial composite indexes of employment for Newfoundland, Prince Edward Island, New Brunswick and Ontario declined in October and the index for Quebec was virtually unchanged. The seasonally-adjusted indexes for the remaining provinces rose in October; the percentage gains amounted to 1 p.c. or more for each province except British Columbia where the index increased 0.6 p.c.

The industrial composite of average weekly wages and salaries rose by 51 cents to \$88.51 in October; this figure was \$3.86 above last year's October figure of \$84.65. The payroll index for October was down 0.7 p.c. from September 1964, but up 8.7 p.c. from October 1963.

Employment

Manufacturing

The seasonally-adjusted index for manufacturing underwent a reversal in October, thereby cancelling much of the substantial gains secured between June and September. At the end of September, the index was 122.6, or 1.4 p.c. above the June figure of 120.9; at the end of October the index was 121.8, down 0.7 p.c. from September.

The downturn in October, as well as the June to September increase, reflected movements in the durables component where the adjusted index advanced by 2.0 p.c. between June and September, then declined by 1.2 p.c. in October. The adjusted index for non-durable goods manufacturing rose by only .8 p.c. between June and September and was virtually unchanged from September to October.

The decline in the seasonally-adjusted index for durable goods manufacturing resulted from substantial layoffs in the automobile industries related to major industrial disputes in the United States. Elsewhere in the durables sector, employment strengthened in iron and steel, non-ferrous metals and electrical apparatus

Note: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

and supplies. Declines in wood products and non-metallic mineral products did not differ significantly from the usual movement between September and October but the decrease in transportation equipment was above average.

In iron and steel, employment has expanded markedly since the fall of 1963 due, primarily, to steady gains in fabricated and structural steel, machinery and primary iron and steel. In October these industries continued to show improvement, and in addition there was a contra-seasonal advance in iron castings and a smaller-than-seasonal decline in sheet metal products.

The weakening in transportation equipment reflected movements in motor vehicles and motor vehicle parts and accessories. Layoffs in these industries exerted a downward influence on the durables index equivalent to about 2.2 index points (after allowance for usual seasonal variation). The other components of transportation equipment recorded contra-seasonal increases in October, but these gains offset only a small part of the substantial reductions due to the layoffs in the automobile industries.

The seasonally-adjusted index for non-durable goods manufacturing, at 116.0, was virtually unchanged in October. This component had indicated some strengthening from June to September due, mainly, to expansion in food and beverages and rubber products. In October each of these industries, as well as leather products, reported larger-than-usual reductions; in addition, miscellaneous manufacturing industries rose less than seasonally. This weakening was offset by strengthening in clothing, paper and chemical products.

Non-Manufacturing Industries

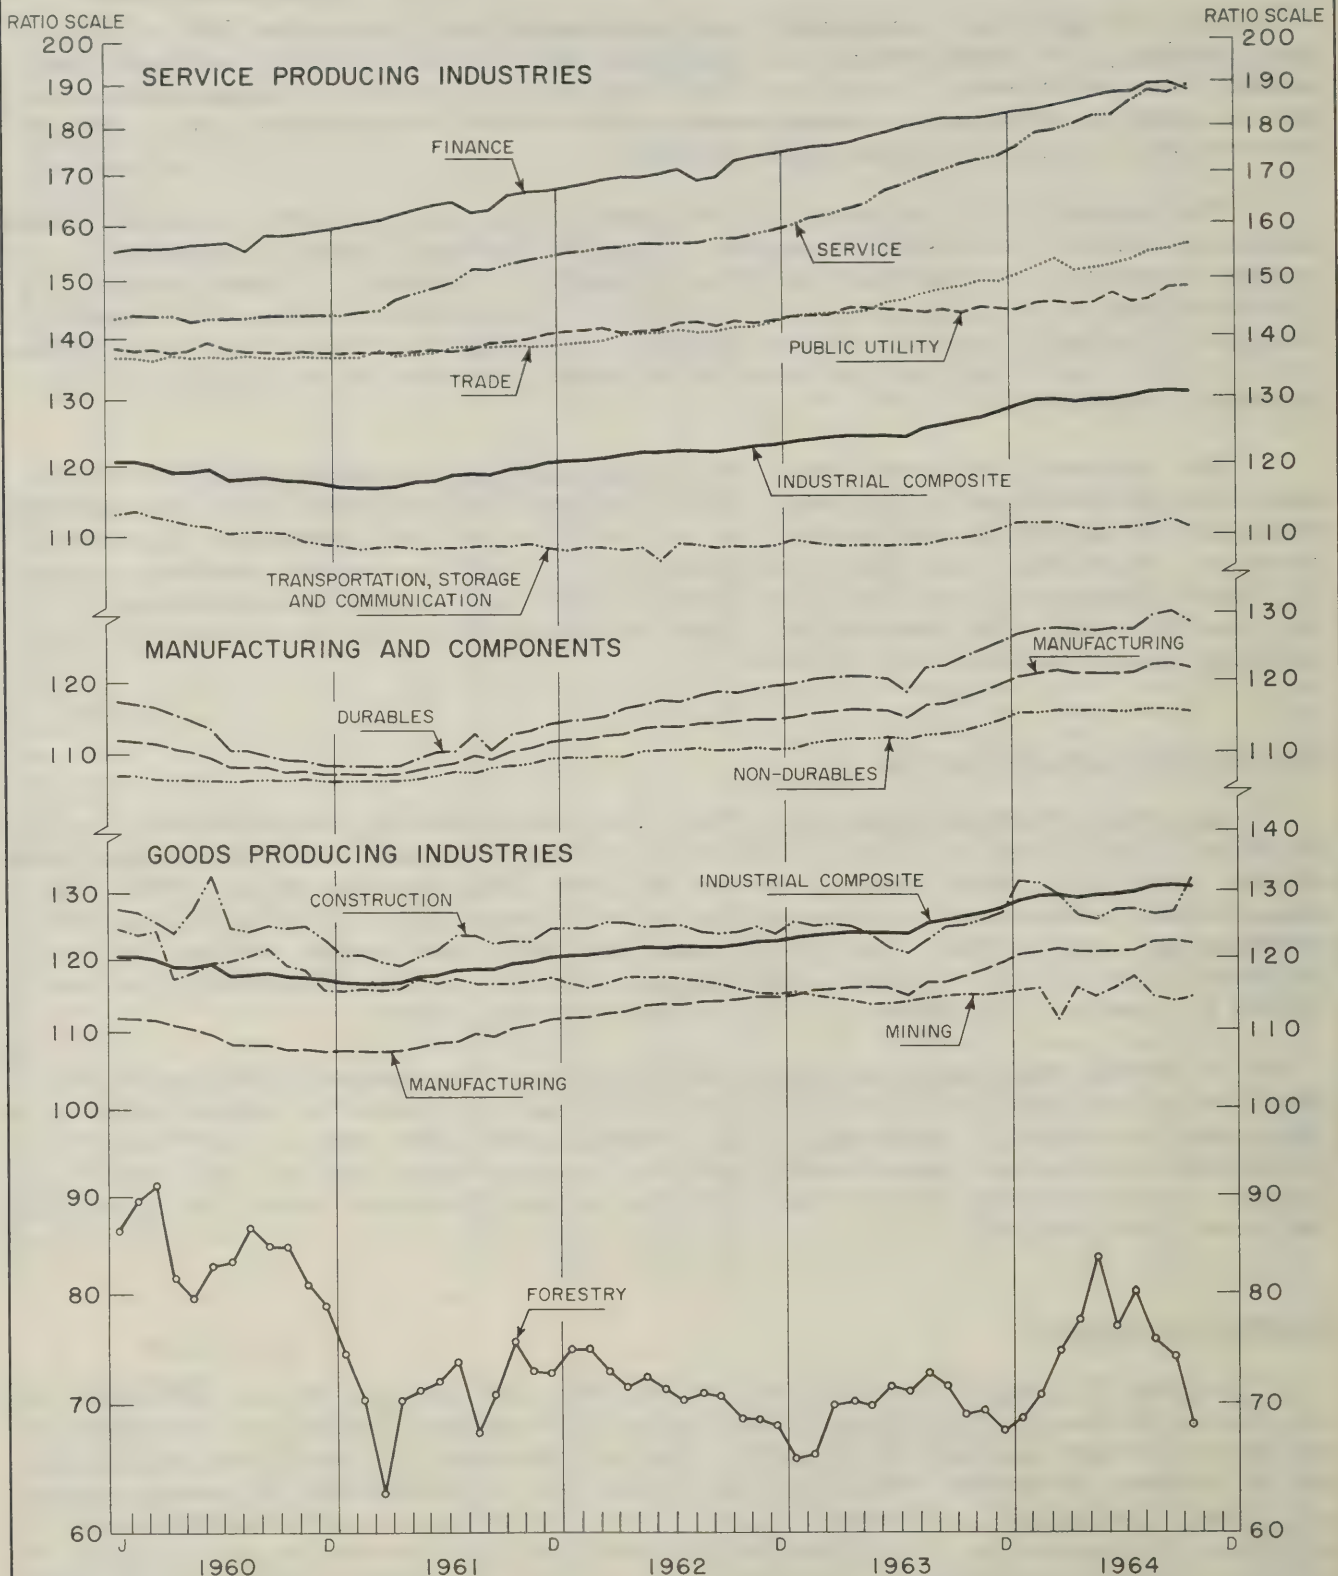

In goods-producing industries other than manufacturing, the seasonally-adjusted indexes for mining and construction rose and the adjusted index for forestry declined. In mining, employment in metals declined less than seasonally. The rise in construction resulted from strengthening in both components; building and general engineering showed a small increase between September and October whereas it usually declines by from 2 to 4 percent, and highway, bridge and street construction recorded the smallest September to October decline since 1954.

In the service-producing-industrial divisions, the seasonally-adjusted indexes for trade and service rose over the month and the index for public utility operation was virtually unchanged. The seasonally-adjusted indexes for transportation, storage and communication and for finance, insurance and real estate declined. In the former, the decline reflected an above-average reduction in railway and water transportation.

Regional Employment

Regionally, employment expanded in the West and declined or was unchanged in the East. In the Atlantic Region, the seasonally-adjusted industrial composite index of employment declined by 0.8 p.c., due to above-average reductions in forestry and in railway and water transportation. There was strengthening in manufacturing and trade. In Quebec, the movements of the major industrial divisions were offsetting. In particular, a contra-seasonal increase in construction was balanced by a contra-seasonal decrease in forestry. The decline in Ontario reflected the layoffs in the automobile industries.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

In the Prairie Region, the seasonally-adjusted industrial composites for all provinces rose over the month, the gains being 1.0 p.c. or more in each province. The strength in the region derived, primarily, from buoyant conditions in the construction industry. More moderate gains were recorded in British Columbia; in that province, strengthening in construction also was an important factor although not to the same degree as for the Prairie Region.

Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by 51 cents in October to \$88.51. The increase was associated with higher earnings in all major industrial divisions, the gains ranging from 21 cents in manufacturing to \$4.78 in forestry. Countering these positive influences was a substantial increase in the weight of trade and a reduction in the weight of manufacturing. In trade, employment rose by 1.0 p.c. while employment in all industries surveyed declined by 1.3 p.c. Since average earnings in trade range anywhere from \$10.00 to \$15.00 lower than the average for the industrial composite, the increase in weight was a depressing factor. In the manufacturing division, where earnings tend to be 2 or 3 dollars above the average for all industries, employment declined proportionately more than for the industrial composite.

In manufacturing, average earnings rose by 65 cents in non-durables but declined by 27 cents in durables. In non-durables only food and beverages, paper products, petroleum products, chemical products and miscellaneous manufacturing industries increased over the month. The gains ranged from 12 cents in paper products to \$2.42 in foods and beverages. However, a more important contributing factor to the rise in earnings was extensive seasonal layoffs in fruit and vegetable canning where earnings tend to be below the average for non-durables. In durables, there were increases in wood (\$1.32), non-metallic mineral products (\$1.02), and non-ferrous metals (8 cents). The main factor, however, was a reduction of \$1.81 in transportation equipment accompanied by a substantial reduction in employment in that relatively highly paid industry.

All provinces reported higher earnings in October except Prince Edward Island and Ontario. The gains ranged from 29 cents in Manitoba to \$1.88 in British Columbia. In Prince Edward Island average earnings were off 97 cents while in Ontario they were virtually unchanged from September.

TABLE 2. Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers, Canada, Goods-Producing Industries

Year and month	Manufacturing

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), WITH UNADJUSTED INDEX NUMBERS, CANADA, GOODS PRODUCING INDUSTRIES

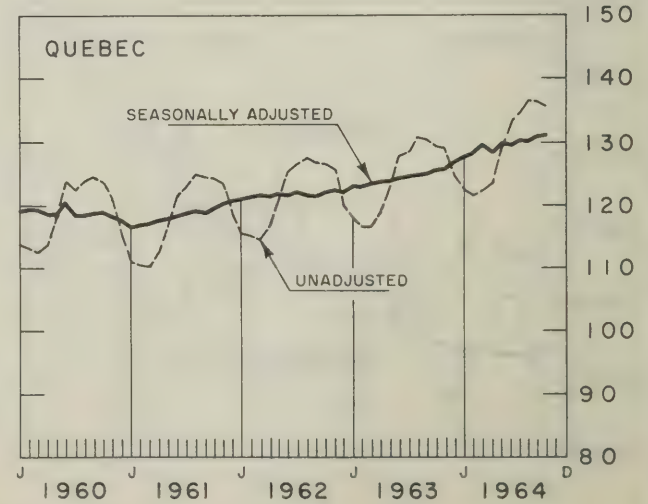

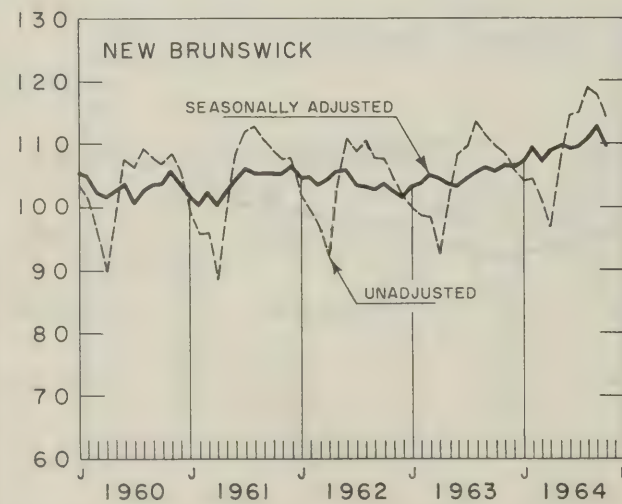

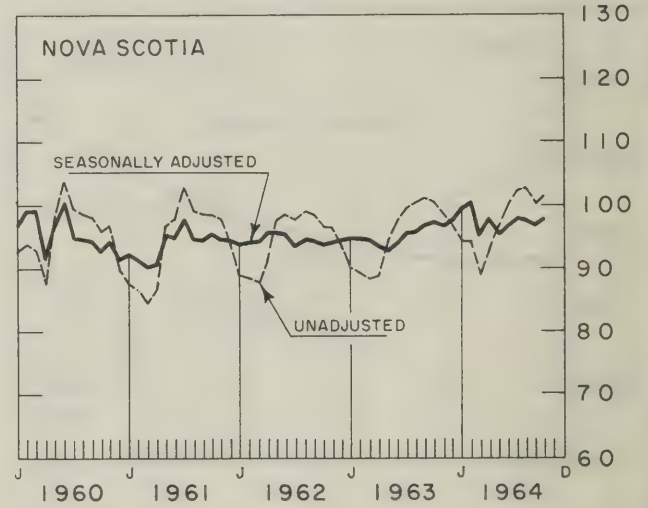

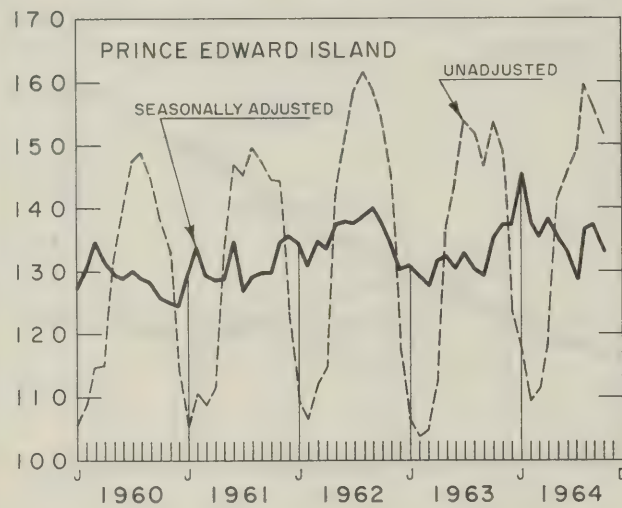

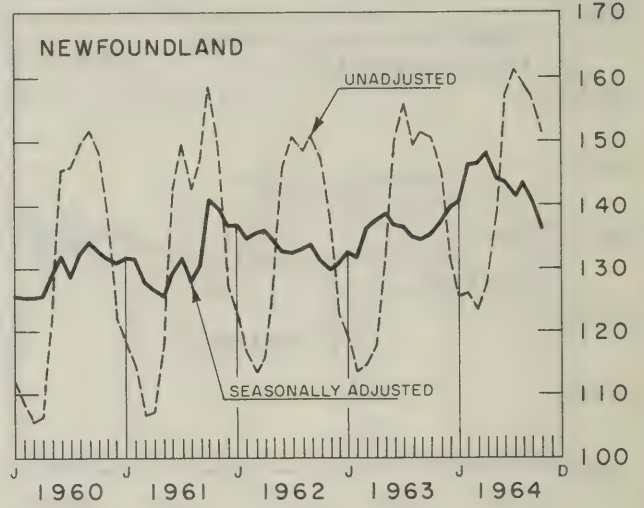

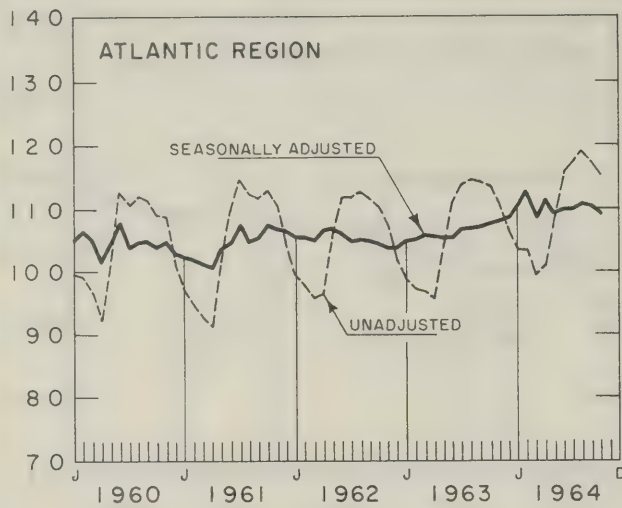

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA, SERVICE-PRODUCING INDUSTRIES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), WITH UNADJUSTED INDEX NUMBERS, ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

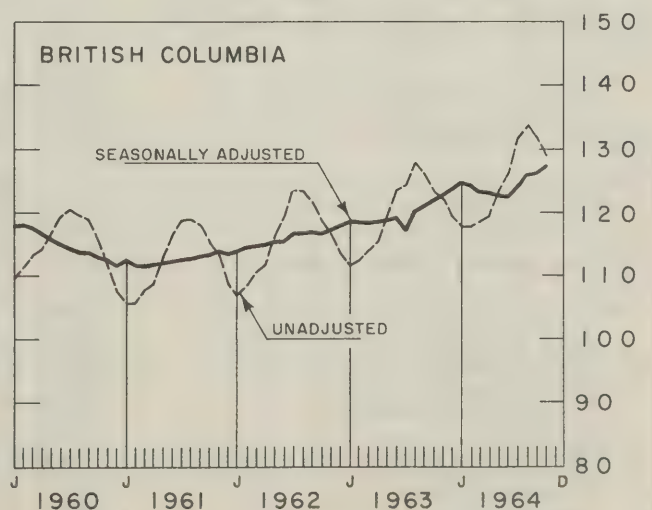

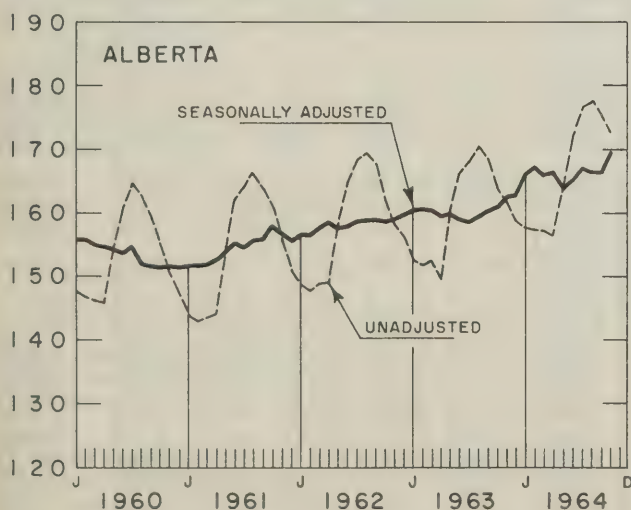

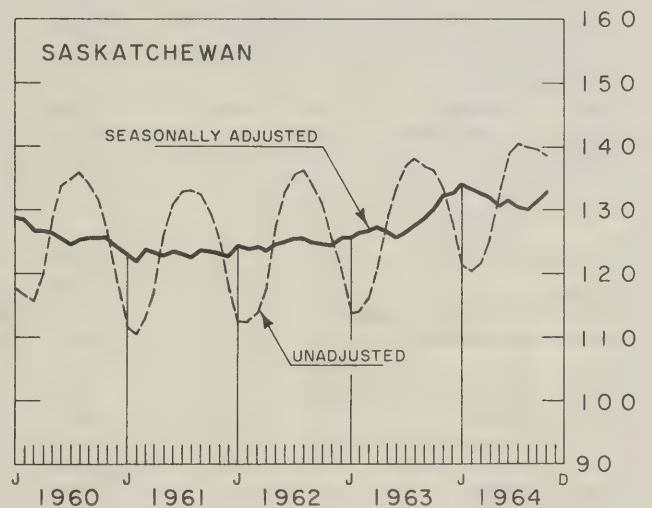

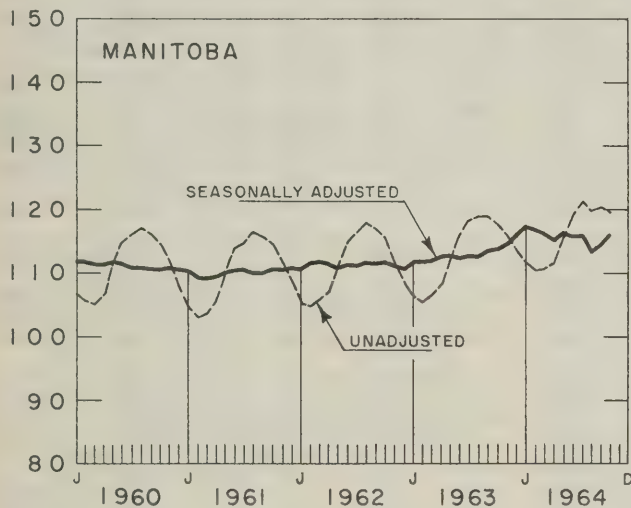

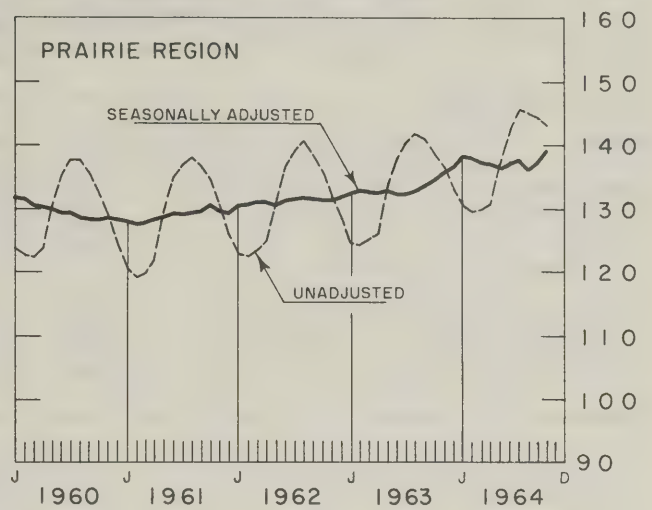

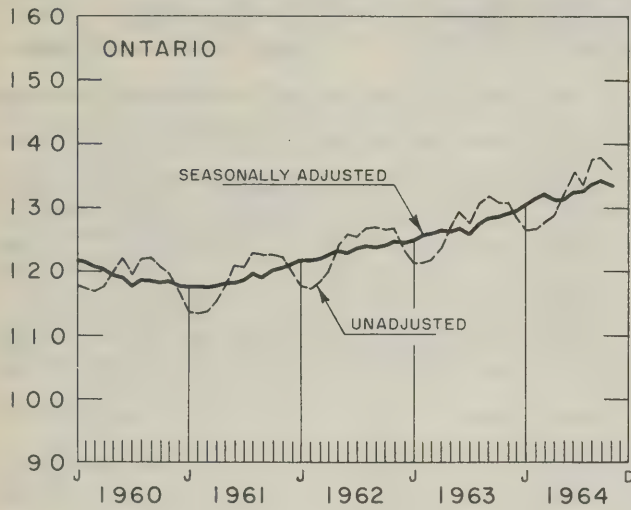

TABLE 4. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Estimated coverage (w)	Employment indexes				Average weekly wages and salaries				Employees reported October 1964
		Oct. 1964	Sept. 1964	Oct. 1963	Oct. 1962	Oct. 1964	Sept. 1964	Oct. 1963	Oct. 1962	
	%	1949 = 100				dollars				number
Forestry (chiefly logging)	76	88.3	92.1	89.2	89.0	100.24	95.46	91.43	86.00	64,171
Mining	96	115.3	116.3	115.4	116.1	108.08	106.24	103.59	99.65	101,915
Metal mining		129.2	129.8	127.8	129.3	108.11	106.97	104.63	100.78	61,018
Gold (a)		60.7	61.0	65.3	68.8	87.63	87.07	85.52	82.88	13,801
Other metal (b)		192.9	193.7	185.8	185.4	114.09	112.79	110.86	106.95	47,217
Iron		296.6	301.7	288.8	303.6	133.89	131.88	128.60	119.28	9,896
Uranium	131.52	130.48	119.15	112.93	2,486
Fuels		81.9	80.6	82.1	82.7	113.84	112.87	107.80	105.15	25,159
Coal		37.7	37.7	39.5	39.2	87.33	85.83	82.47	80.37	9,295
Oil and natural gas		261.1	254.8	255.1	260.5	129.37	129.09	123.71	120.38	15,864
Non-metal (c)		150.9	160.1	157.0	154.7	98.80	93.75	93.32	86.75	15,738
Asbestos		167.3	168.2	184.4	184.5	108.15	107.50	104.55	96.53	6,294
Manufacturing	92	123.5	126.3	119.3	115.9	91.22	91.01	87.43	84.34	1,337,282
Durable goods (u)		130.1	132.9	124.6	119.7	98.97	99.24	94.57	91.47	640,977

	number			per cent					
Manufacturing – Concluded:									
Transportation equipment	135,238	124,574	10,664	92.1	7.9	92.3	7.7	91.9	8.1
Aircraft and parts	29,429	26,635	2,794	90.5	9.5	90.7	9.3	90.1	9.9
Motor vehicles	31,363	29,478	1,885	94.0	6.0	94.2	5.8	94.0	6.0
Motor vehicle parts and accessories	26,320	21,763	4,557	82.7	17.3	83.6	16.4	81.4	18.6
Railroad and rolling stock equipment	22,399	22,085	314	98.6	1.4	98.6	1.4	98.6	1.4
Shipbuilding and repairing	21,822	21,099	723	96.7	3.3	96.6	3.4	96.5	3.5
Non-ferrous metal products	58,235	51,748	6,487	88.9	11.1	88.9	11.1	88.7	11.3
Aluminum products	8,879	7,469	1,410	84.1	15.9	84.6	15.4	84.8	15.2
Brass and copper products	9,272	8,212	1,060	88.6	11.4	88.3	11.7	88.2	11.8
Smelting and refining	29,581	28,789	792	97.3	2.7	97.3	2.7	97.2	2.8
Electrical apparatus and supplies	91,391	62,781	28,610	68.7	31.3	68.7	31.3	69.4	30.6
Heavy electrical machinery	20,348	15,796	4,552	77.6	22.4	77.6	22.4	78.1	21.9
Telecommunication equipment	24,059	13,895	10,164	57.8	42.2	58.0	42.0	59.8	40.2
Non-metallic mineral products (k).....	43,145	38,762	4,383	89.8	10.2	89.4	10.6	89.6	10.4
Clay products	5,309	4,784	525	90.1	9.9	90.2	9.8	90.6	9.4
Glass and glass products	10,423	8,329	2,094	79.9	20.1	78.3	21.7	80.4	19.6
Concrete products	12,413	11,901	512	95.9	4.1	95.9	4.1	95.7	4.3
Products of petroleum and coal.....	16,018	13,777	2,241	86.0	14.0	86.2	13.8	86.2	13.8
Petroleum refining and products.....	15,380	13,186	2,194	85.7	14.3	86.0	14.0	85.8	14.2
Chemical products	59,275	46,370	12,905	78.2	21.8	78.4	21.6	78.1	21.9
Medicinal and pharmaceutical preparations..	8,459	4,692	3,767	55.5	44.5	55.8	44.2	55.3	44.7
Acids, alkalis and salts	10,430	9,733	697	93.3	6.7	93.0	7.0	93.6	6.4
Other chemical products (l)	40,386	31,945	8,441	79.1	20.9	79.4	20.6	78.9	21.1
Miscellaneous manufacturing industries	44,369	27,514	16,855	62.0	38.0	62.4	37.6	62.3	37.7
Construction	307,861	299,122	8,739	97.1	2.9	97.2	2.8	97.2	2.8
Building and general engineering (m)	191,940	185,996	5,944	96.9	3.1	97.0	3.0	97.0	3.0
Building	161,730	156,870	4,860	97.0	3.0	97.0	3.0	97.1	2.9
General engineering	30,210	29,126	1,084	96.4	3.6	96.6	3.4	96.6	3.4
Highways, bridges and streets	115,921	113,126	2,795	97.6	2.4	97.6	2.4	97.4	2.6
Transportation, storage and communication	362,235	305,562	56,673	84.4	15.6	84.4	15.6	84.5	15.5
Transportation	264,162	246,890	17,272	93.5	6.5	93.5	6.5	93.6	6.4
Air transport and airports	17,675	13,987	3,688	79.1	20.9	79.5	20.5	79.9	20.1

EMPLOYMENT, URBAN AREAS
INDUSTRIAL COMPOSITE
1949=100

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

Volume 42, No. 11

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

72-001 — Advance Statement on Employment and Weekly Earnings — Monthly — Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

72-003 — Man-Hours and Hourly Earnings — Monthly — Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

72-005 — Estimates of Labour Income — Monthly — Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

72-006 — Hiring and Separation Rates in Certain Industries — Semi-Annual — Price \$1.50 per year

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

72-201 — Review of Employment and Payrolls — Annual — Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

72-202 — Review of Man-Hours and Hourly Earnings — Annual — Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

72-203 — Earnings and Hours of Work in Manufacturing — Annual — Preliminary Report — Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

72-204 — Earnings and Hours of Work in Manufacturing — Annual — Final Report — Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

72-502 — Labour Income, 1926-58 — Price 75 cents

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS, NOVEMBER 1964

Summary

The preliminary industrial composite index of employment (1949=100) was 134.7 at the end of November, unchanged from the revised October figure. Typically, employment declines about 1.0 p.c. between October and November; this year, the level was maintained, largely as a result of a marked expansion of employment in transportation equipment. The increase in transportation equipment followed extensive layoffs in October due to shortages of parts associated with industrial disputes in the United States and a reduction in orders.

Seasonally-adjusted the industrial composite rose by 1.0 p.c., from 131.3 in October to 132.6 in November. Indexes for most major industrial divisions reached higher levels over the month, but the major part of the gain originated in manufacturing, due primarily to an increase of 3.3 p.c. in the durables component. The advance in durables resulted from marked improvement in wood, iron and steel and non-metallic mineral products in addition to the strong recovery in transportation equipment noted above.

The seasonally-adjusted industrial composites for all provinces, except Prince Edward Island and Quebec, rose in November. The percentage gains ranged from 0.8 p.c. in Alberta to 3.0 p.c. in Newfoundland. The most significant advance (in terms of numbers involved) occurred in Ontario where expanded employment in the automobile industries were a major factor.

The industrial composite of average weekly wages and salaries declined by 49 cents to \$87.98 in November. The latest figure was \$3.37 above the same month last year. The payroll index, at 278.1, was down 0.6 p.c. from October but up 8.8 p.c. from the November 1963 index of 255.5.

Employment

Manufacturing

The seasonally-adjusted index for manufacturing rose sharply to 124.2 in November, up 1.9 p.c. from the October figure of 121.9. The November increase more than made up losses incurred in October so that the latest seasonally-adjusted figure was 1.3 p.c. above September. The large increase in November, as well as the reduction in October, reflected movements in durable goods manufacturing. From September to October the index dropped by 1.2 p.c. due to layoffs of automobile workers; (the recall of these workers was a major factor contributing to the marked advance for durables). The seasonally-adjusted index for non-durable goods manufacturing was unchanged from September to October but rose by 0.6 p.c. from October to November.

In durable goods manufacturing there was improvement in wood, iron and steel, transportation equipment and non-metallic mineral products. The strengthening in wood products reflected a smaller-than-seasonal decline in saw and planing mills.

Note: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Most components of iron and steel strengthened over the month if allowance is made for usual seasonal variation; improvement was most marked in fabricated and structural steel, machinery and sheet metal products. Agricultural implements was the only major component of the iron and steel group indicating some weakening. Non-metallic mineral products were virtually unchanged in November although the industry usually declines by about 2.0 p.c. at this time. Employment was maintained in 1964 by a larger-than-average advance in the glass and glass products industry.

Transportation equipment rose by 11.2 p.c. in November which more than offset losses incurred in October resulting from layoffs in the automobile industries. Gains in November reflected, for the most part, the recall of these workers. An increase in aircraft and parts and a contra-seasonal advance in shipbuilding and repairing also contributed to the buoyancy in the group.

Typically, non-ferrous metals and electrical apparatus and supplies showed small fluctuations from October to November. Over the past six months, however, these industries have indicated marked improvement after allowance for usual seasonal movements.

The October to November increase in the seasonally-adjusted index for non-durable goods manufacturing was the first significant change in the index since July. The advance resulted from smaller-than-seasonal reductions in food and beverages and clothing. In the former industry, employment declined less than seasonally in the fish and fruit and vegetable canning industries.

Non-Manufacturing Divisions

In goods-producing industries other than manufacturing, the seasonally-adjusted indexes for forestry and mining rose while the adjusted index for construction was virtually unchanged. Strengthening in nickel and iron were factors contributing to the advance in mining. Employment in construction, building and general engineering recorded the smallest October to November decline in several years. However, this was balanced by a larger-than-seasonal reduction in highway, bridge and street construction.

There was very little change in the seasonally-adjusted indexes for most service divisions. The only increase of note occurred in transportation, storage and communication where the adjusted index rose by 0.6 p.c. In the last-named division, strengthening in truck transportation and communication was an important factor.

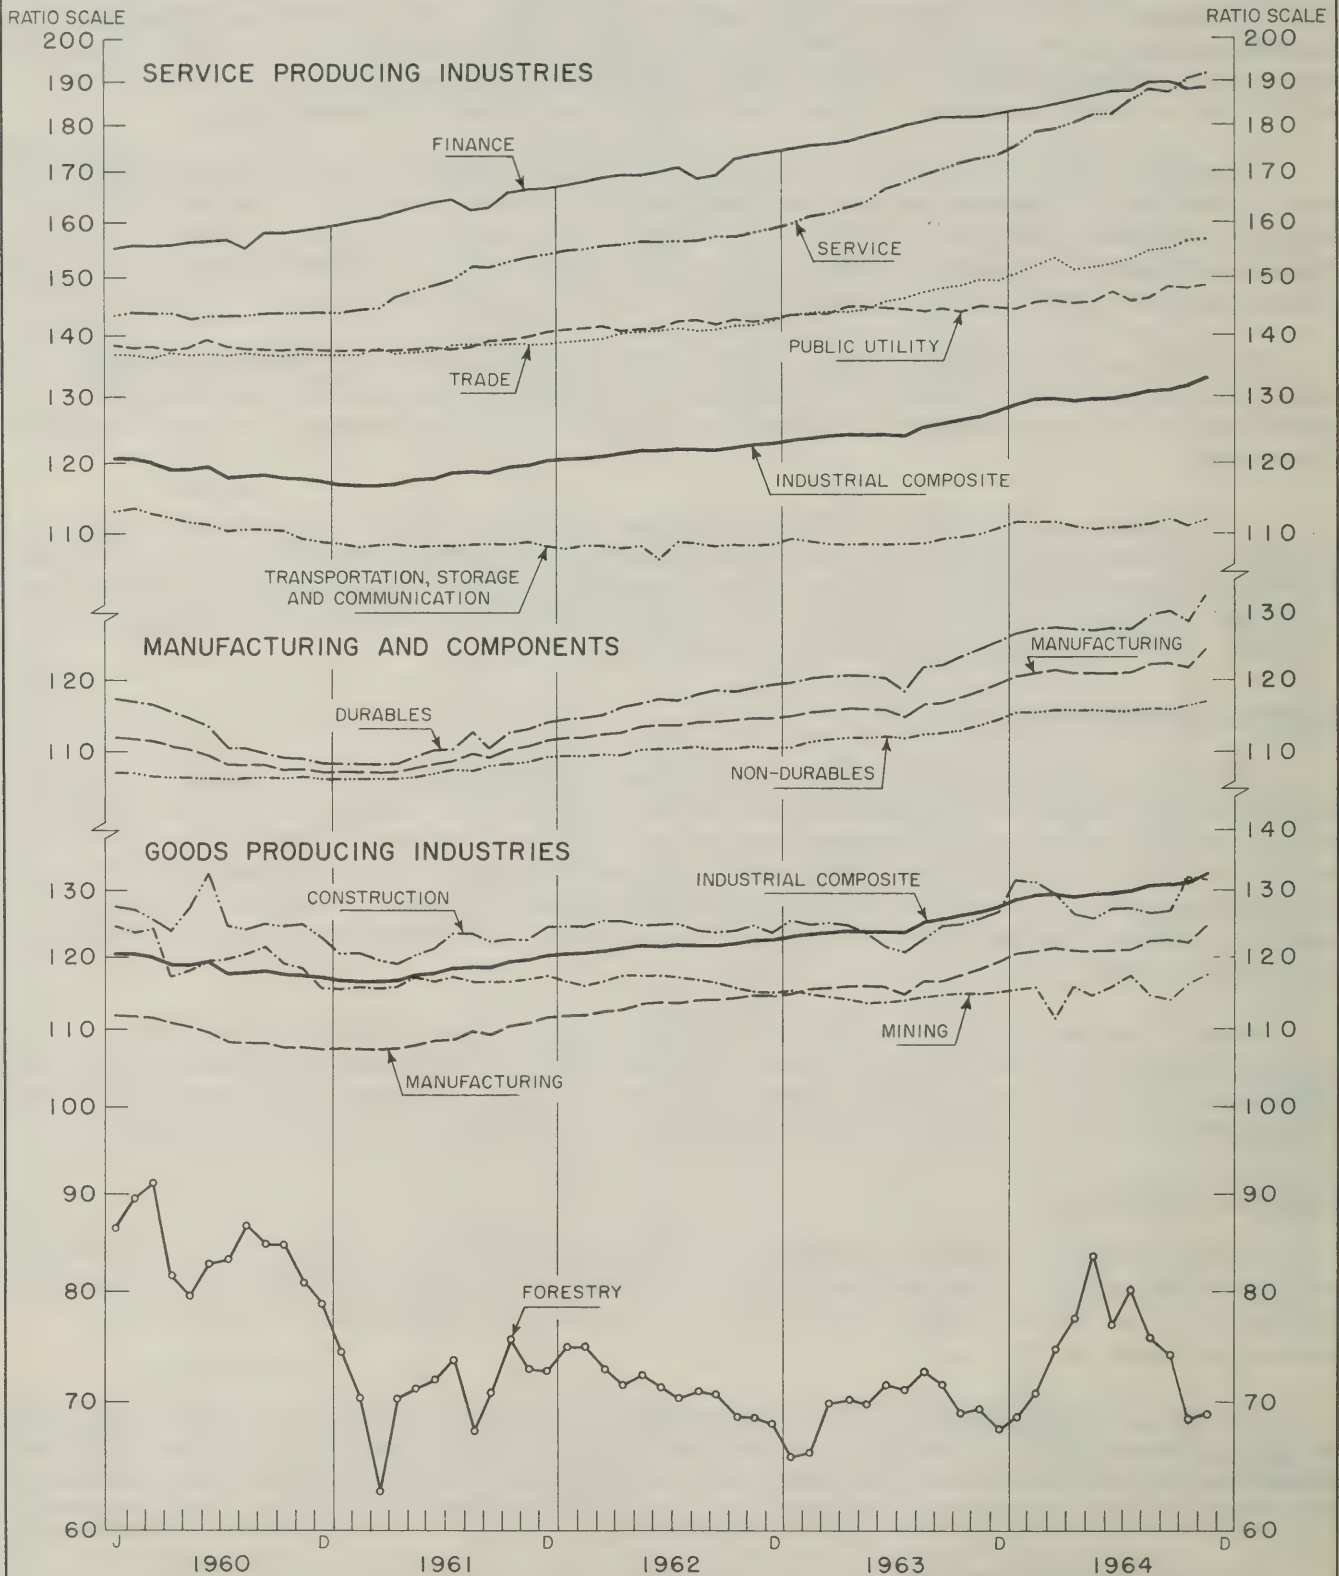

Regional Employment

The seasonally-adjusted indexes of employment for all regions except Quebec rose over the month. The increases were 1.7 p.c. in the Atlantic Region and Ontario, 1.0 p.c. in the Prairie Region and 0.9 p.c. in British Columbia. The index for Quebec declined by 0.4 p.c.

In the Atlantic Region, the strength was in forestry, mining and construction. In Quebec, employment in mining, in manufacturing and in transportation, storage and communication declined less than seasonally. However, improvement in these divisions was offset by a decrease in construction that was considerably larger than seasonal.

The adjusted index for Ontario rose by 1.7 p.c. in November, a substantial increase in view of the great weight of that province. The major factor operating here was the recall of auto-workers laid off in October; also of importance, however, were smaller-than-average decreases in construction, service and transportation, storage and communication.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

The gain in the Prairie Region was distributed among the three provinces. The seasonally-adjusted indexes for Manitoba, Saskatchewan and Alberta rose by 1.0 p.c., 1.3 p.c. and 0.8 p.c., respectively. Industrially, the strength was in manufacturing and construction; other industrial divisions recorded changes that did not differ greatly from usual seasonal patterns. Industry data for British Columbia also indicated strengthening in manufacturing; however, the construction index declined more than seasonally.

Average Weekly Wages & Salaries

The industrial composite of average weekly wages and salaries fell by 49 cents in November. The reduction was due, in part, to declines in weekly earnings in forestry, manufacturing, construction, transportation, storage and communication and trade. Also contributing to the decline were a relative increase in the numbers employed in trade, and a relative decrease in the numbers employed in construction, where earnings are below and above the national average, respectively. Partly offsetting these downward influences were higher earnings in mining, public utility operation, finance, insurance and real estate and service and an increased proportion of persons employed in the highly-paid durables industries.

In manufacturing, average weekly wages and salaries declined by 83 cents in durables and rose by 15 cents in non-durables. However, a substantial increase in the proportion of persons employed in the relatively highly-paid durables sector more than offset the downward influence of the decline in earnings.

In durables, per capita earnings declined in transportation equipment (\$4.62), wood products (35 cents) and non-metallic mineral products (\$1.25). The only sizable increase occurred in non-ferrous metals which rose by 90 cents. The large reduction in transportation equipment reflected a drop of \$24.35 in motor vehicles. In that component, lower earnings were a result of greatly reduced overtime and short time on the part of employees recalled during the course of the pay-period.

In non-durables, the only significant decrease occurred in tobacco products where earnings fell by \$9.06. A sizable decline is usual in November because large numbers of lower-paid seasonal employees are taken on at this time.

All provinces, except Nova Scotia, recorded lower average earnings in November. The decreases ranged from 9 cents in Quebec to \$1.06 in British Columbia.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA, GOODS PRODUCING INDUSTRIES

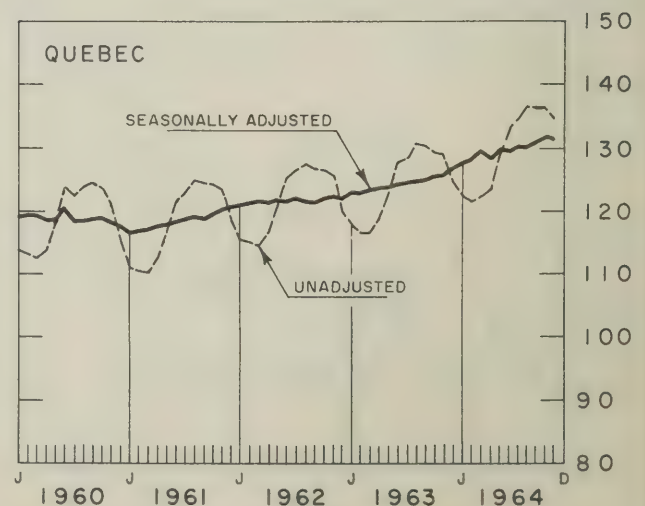

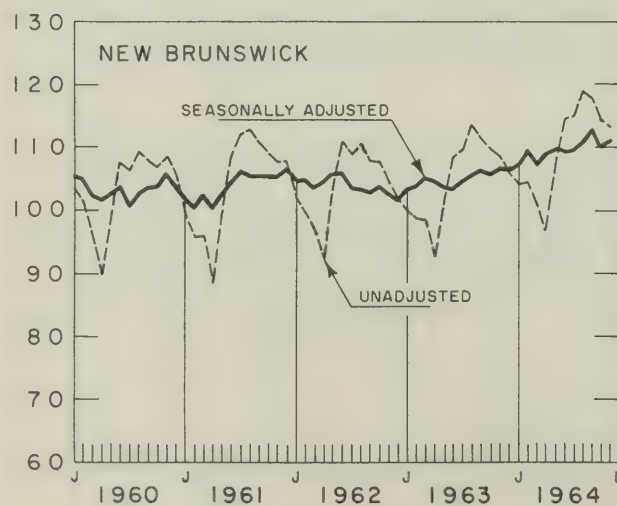

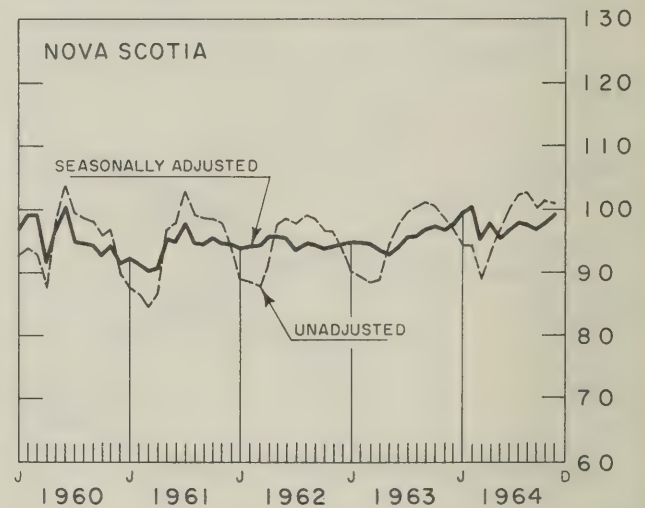

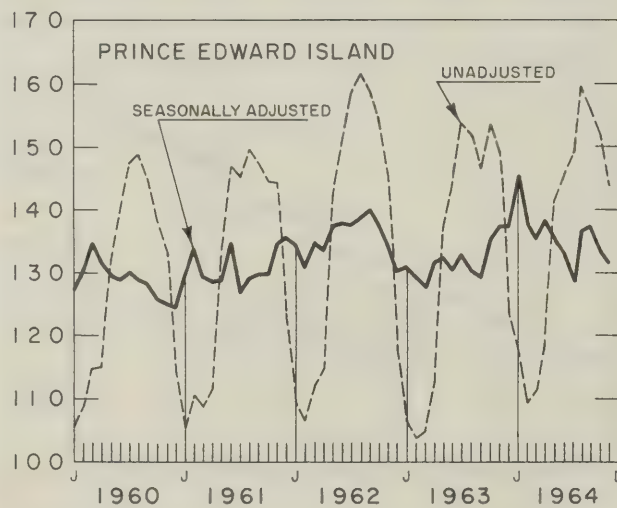

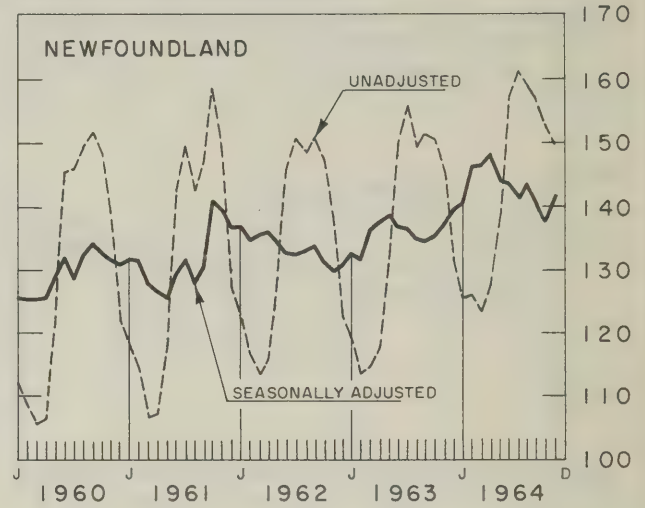

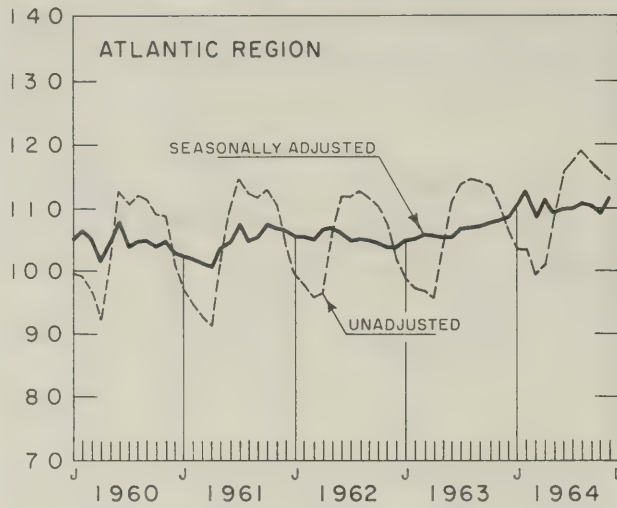

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA, SERVICE-PRODUCING INDUSTRIES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), WITH UNADJUSTED INDEX NUMBERS, ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

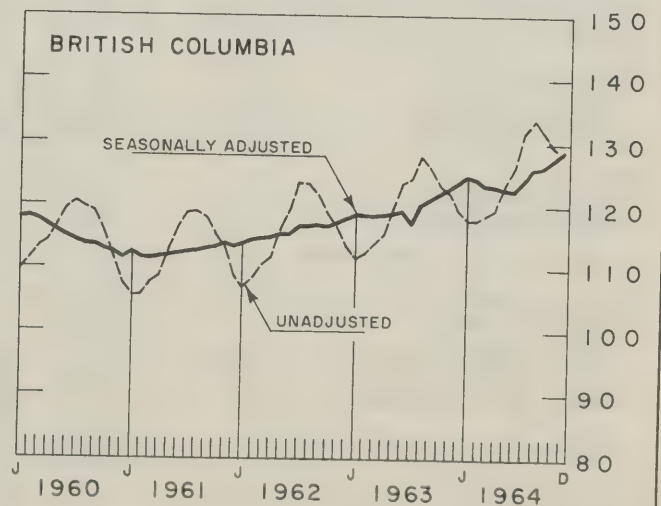

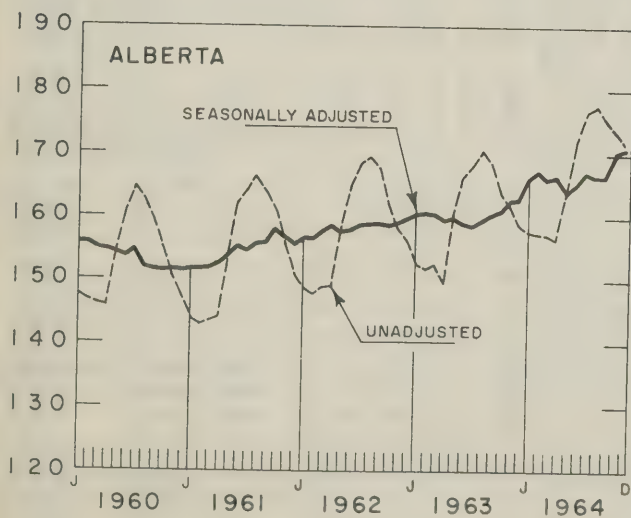

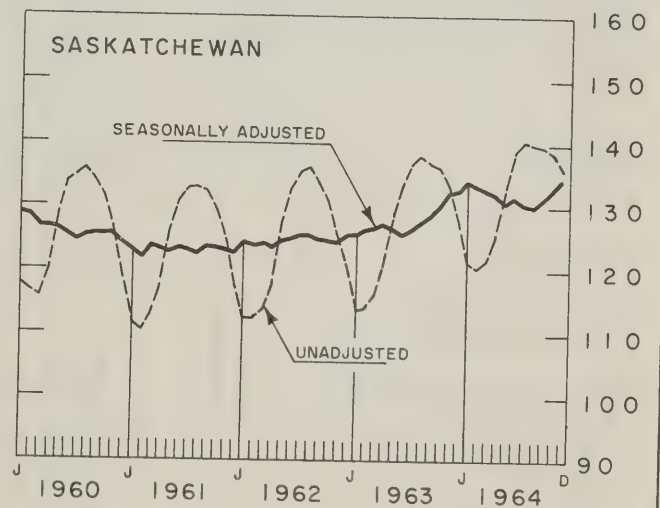

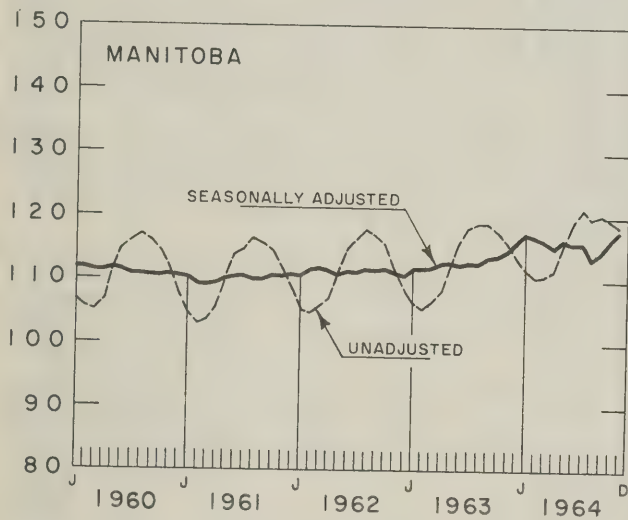

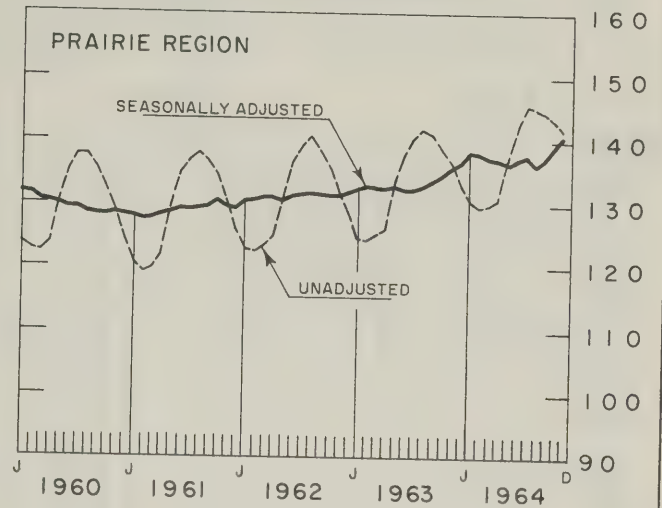

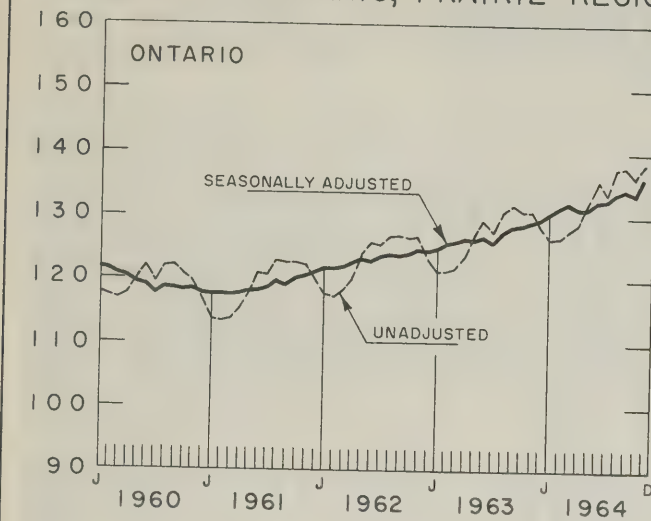

TABLE 4. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Estimated coverage (w)	Employment indexes				Average weekly wages and salaries				Employees reported November 1964
		Nov. 1964	Oct. 1964	Nov. 1963	Nov. 1962	Nov. 1964	Oct. 1964	Nov. 1963	Nov. 1962	
	%	1949 = 100				dollars				number
Forestry (chiefly logging)	76	86.4	88.0	86.9	86.0	98.90	100.25	91.30	85.50	62,791

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan	39
Alberta	51
British Columbia	61

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-003 — **Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income**—Monthly—Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006 — **Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.50 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201 — **Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings**—Annual—Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
(3) a distribution of wage-earners in a given range of hours worked in the survey week)
- 72-502 — **Labour Income, 1926-58**—Price 75 cents
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS

DECEMBER

Summary

The industrial composite index of employment declined 2.6 p.c. at the end of December to 131.2. As usual for the time of year, employment declined in all major industrial divisions except trade which rose slightly, and finance, insurance and real estate which was virtually unchanged. Typically, employment in trade reaches a seasonal peak in December as retailers add to their staffs to handle Christmas and year-end sales. However, the increase in December 1964 was below average due, in part, to industrial disputes in Quebec.

Seasonally-adjusted, the industrial composite rose by 0.6 p.c. to 133.4 in December. The large advance resulted from strengthening in manufacturing, construction and in transportation, storage and communication. The rise in manufacturing was evenly distributed between its two major components, each showing gains of more than 1 p.c.

Both major components of construction strengthened over the month, with building and general engineering continuing the expansion that began in the second half of 1964. In transportation, storage and communication, a decline of 1.5 p.c. in the transportation component was much smaller than the usual decrease at this time.

The seasonally-adjusted industrial composite indexes of employment for most provinces rose over the month. The only exceptions were the adjusted indexes for New Brunswick, Alberta and British Columbia which were virtually unchanged. Of first importance because of the numbers involved were increases of 0.9 p.c. and 0.5 p.c. in Quebec and Ontario, respectively.

The industrial composite of average weekly wages and salaries declined \$2.24 to \$85.70 in December due, largely, to short-time associated with the year-end holidays. However, the December per capita figure was \$4.06 above the same month last year. The payroll index at 264.0 in December was down 5.1 p.c. from November but up 10.1 p.c. from December 1963.

EMPLOYMENT

Manufacturing

The seasonally-adjusted index for manufacturing continued to move upward in December advancing 1.1 p.c. from 124.1 in November to 125.5 at the end of December. The latest increase was distributed evenly among the durables and non-durables components. In the former, the seasonally-adjusted index advanced from 132.9 to 134.4, and in the latter, the increase was from 116.8 to 118.1.

The durables index has been a source of strength in the second half of 1964. Since July, the adjusted index has advanced from 127.6 to 134.4, an increase of 5.3 p.c. During this period all components have improved, although in the non-ferrous metals and transportation equipment industries the expansion was interrupted by industrial disputes in Canada and the United States.

Note: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

Areas and industrial divisions	Index numbers						Average weekly wages and salaries			Employees reported December 1964

All components of durables except transportation equipment contributed to the November-December increase. In wood, employment declined less than seasonally in saw and planing mills and in furniture products. In non-ferrous metals, employment strengthened in aluminum and in smelting and refining. Declines in non-metallic mineral products and electrical apparatus and supplies were also less than seasonal but not as markedly so as in the afore-mentioned industry groups. In transportation equipment, only railroad and rolling stock equipment recorded changes which differed significantly from usual seasonal variations; however, the gain was not large enough to have a pronounced effect on the index for the transportation equipment group.

The seasonally-adjusted index for non-durable goods manufacturing rose strongly from 116.8 in November to 118.1 in December. This component has shown great strength in the 4th quarter after a rather sluggish showing during the first three quarters. For instance, at the end of January 1964, the index stood at 115.1 and by the end of September had risen only to 116.1; however, between September and December it moved to 118.1.

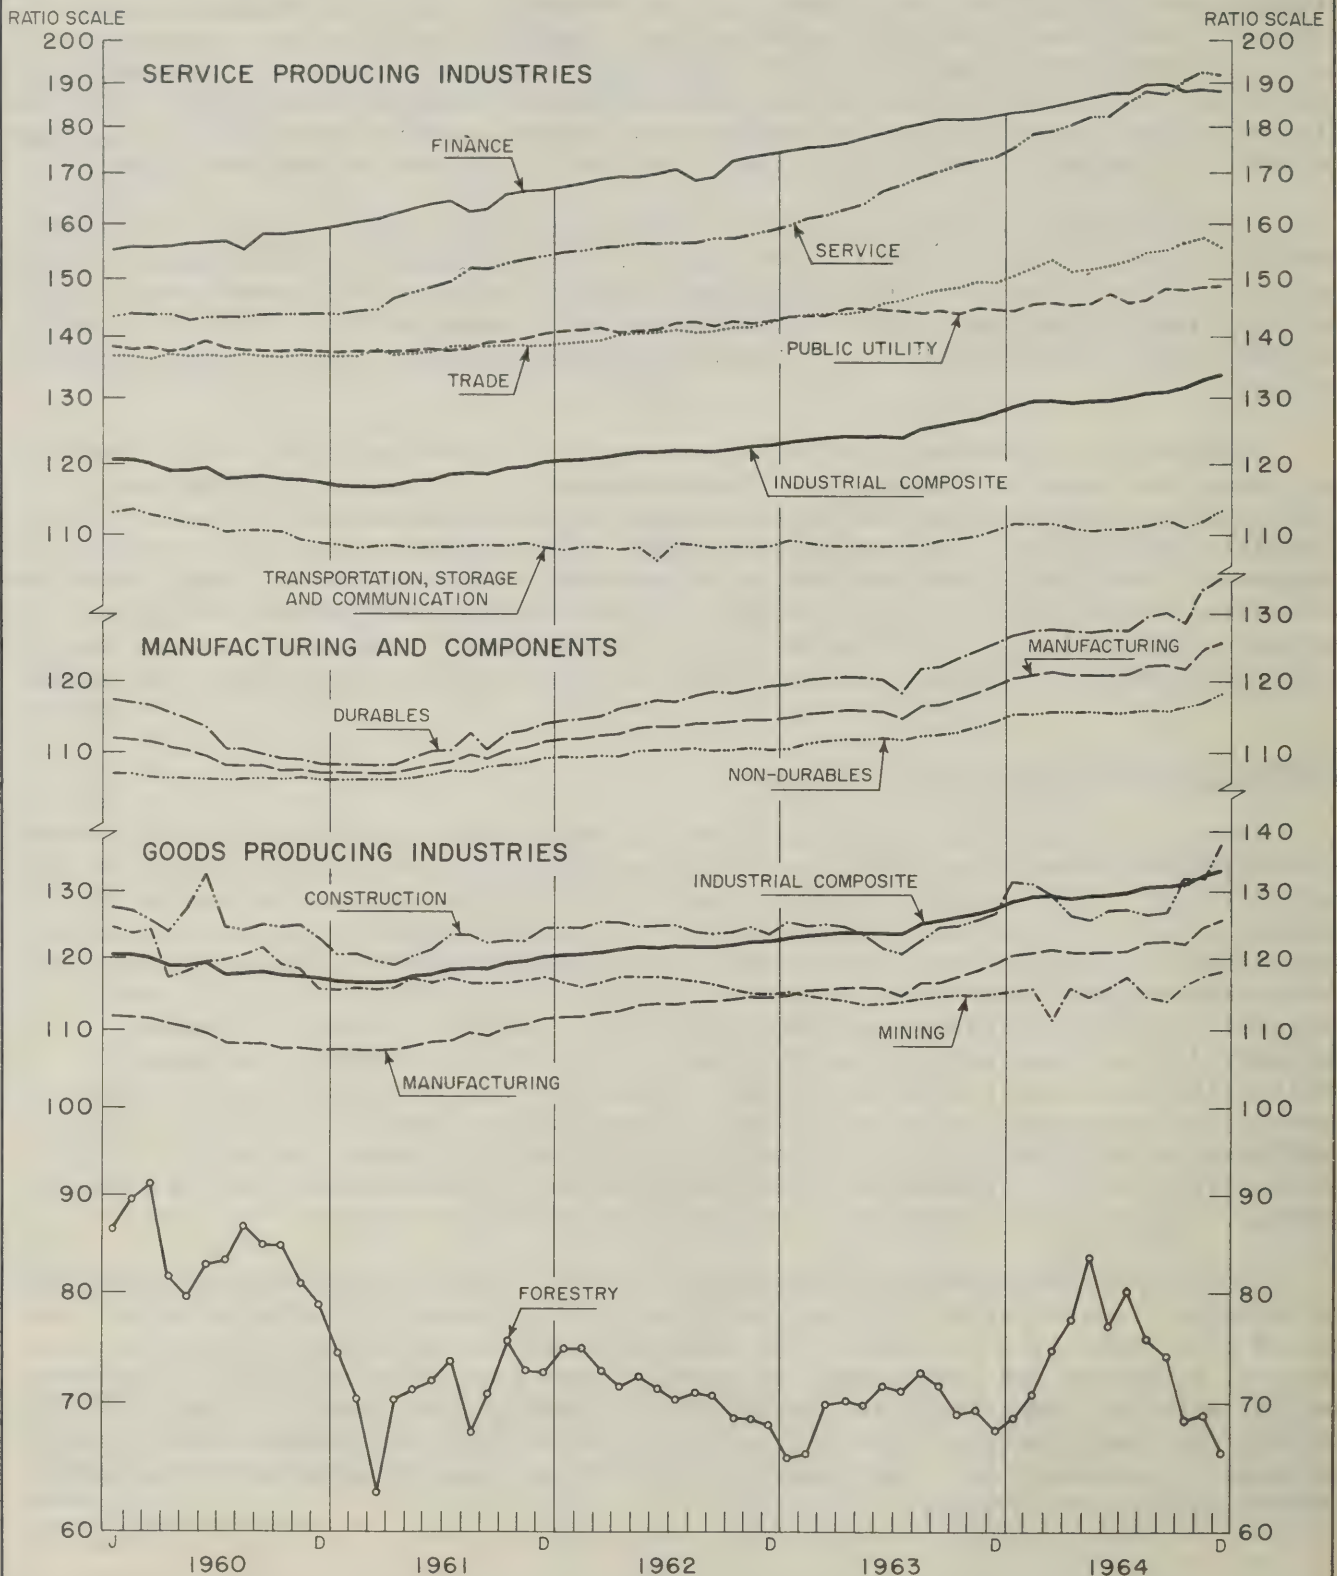

The November-December rise in the non-durables index was fairly well distributed among the component industries. Below-average reductions in dairy products, fruit and vegetable canning and distilled and malt liquors accounted for a smaller-than-seasonal decline in the relatively large food and beverages group. In other components, employment declined less than seasonally in textiles, clothing, chemicals and miscellaneous manufacturing industries, and rose contra-seasonally in paper products and printing, publishing and allied industries. The improvement in the last-named industry followed the settlement of a major industrial dispute in Quebec.

Non-Manufacturing Industries

For goods-producing industrial divisions other than manufacturing, the seasonally-adjusted indexes for mining and construction rose while the adjusted index for forestry fell. The increase in mining was slight but the advance in construction was 4.4 p.c. In construction, both major components recorded decreases that were substantially below the seasonal average. The gains in highway, bridge and street construction partly reflected erratic movements in Quebec where the usual heavy seasonal layoffs occurred in November rather than December; thus the November-December decrease was substantially reduced. The gains in building and general engineering reflected a long-term shift to more winter housebuilding, government bonuses and incentives to carry on winter housebuilding, and an attempt by firms to accelerate production before the final imposition of the federal sales tax. The decline in forestry continued a trend which has been in evidence since the second quarter, and reflects movements in the industry in Eastern Canada.

In the service-producing industrial divisions, the only significant gains were recorded in transportation, storage and communication where the adjusted index rose by 0.9 p.c. from 112.0 to 113.0. The adjusted indexes for public utility operation, finance, insurance and real estate and service were virtually unchanged in December, and the adjusted index for trade declined. The substantial gains in transportation, storage and communication reflected smaller-than-seasonal declines in water, railway and truck transportation. The reduction in trade was due in large part to a major industrial dispute in Quebec.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

Regional Employment

The seasonally-adjusted industrial composite indexes of employment for all regions except British Columbia rose over the month, the gains ranging from 0.4 p.c. in the Prairie Region to 0.9 p.c. in Quebec. The index for British Columbia recorded a slight decline.

In the Atlantic Region, there was further strengthening in most goods-producing industrial divisions and improvement in transportation, storage and communication. The only weakening was indicated in forestry where employment declined substantially more than seasonally.

An increase of 0.9 p.c. in the adjusted index for Quebec was the largest among the regions. The increase was associated largely with erratic movements in construction noted earlier. Manufacturing also strengthened in the province, although the gains were due in part to the settlement of a major industrial dispute in printing, publishing and allied industries. Counter-expansionary forces were represented by a continued contraction in forestry, and a major industrial dispute in trade.

The seasonally-adjusted industrial composite for Ontario rose by 0.5 p.c. in December as employment strengthened in forestry, construction and manufacturing. There was a minor setback in trade where employment did not rise as much as is usual for the time of year.

The seasonally-adjusted index for the Prairie Region rose by 0.4 p.c. due mainly to buoyancy in manufacturing and construction. Changes in the remaining industrial divisions did not differ too markedly from usual seasonal patterns. In British Columbia, a small decline in the seasonally-adjusted industrial composite reflected an above-average reduction in construction. Other industrial divisions recorded mainly seasonal changes.

Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries declined by \$2.24 at the end of December, from \$87.94 to \$85.70. A large decrease in earnings is usual in December. In the main, two factors account for this. Firstly, there is the decline in relative importance of the goods-producing industrial divisions and secondly, there is a widespread prevalence of short time associated with the year-end holidays. Typically, the relatively highly-paid forestry and construction divisions show substantial decreases in employment between November and December while the lower paid trade and finance, insurance and real estate divisions either show no change or an increase. Many factors account for the prevalence of short time:- absenteeism is generally higher as workers attempt to combine the official holiday with the week-end holiday; many firms give Boxing Day as an unpaid holiday; some firms use the last week of the year for inventory taking; and many construction and other firms shut down during the holiday week. When Christmas falls on the week-end, the effects of the first two factors are reduced and the reduction in earnings is usually much lower than when Christmas falls in the middle of the week.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100), WITH UNADJUSTED INDEX NUMBERS, CANADA, GOODS PRODUCING INDUSTRIES

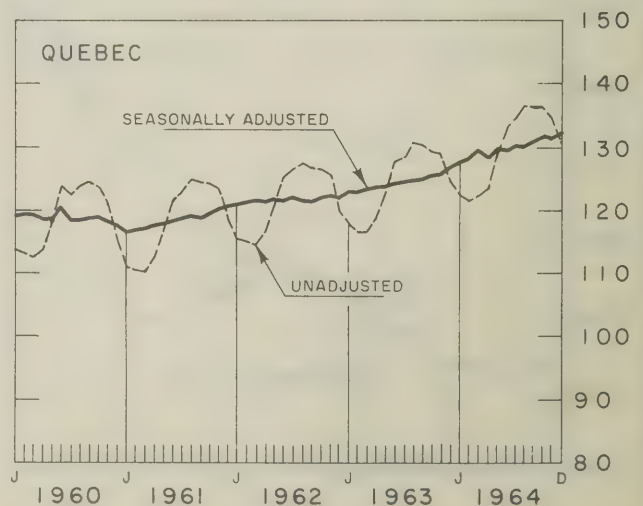

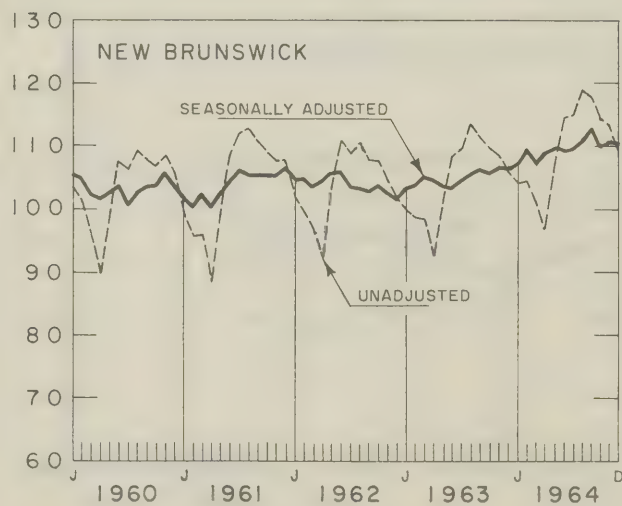

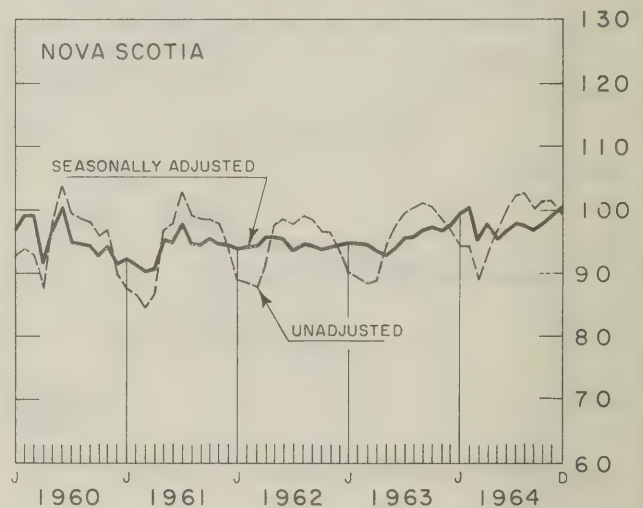

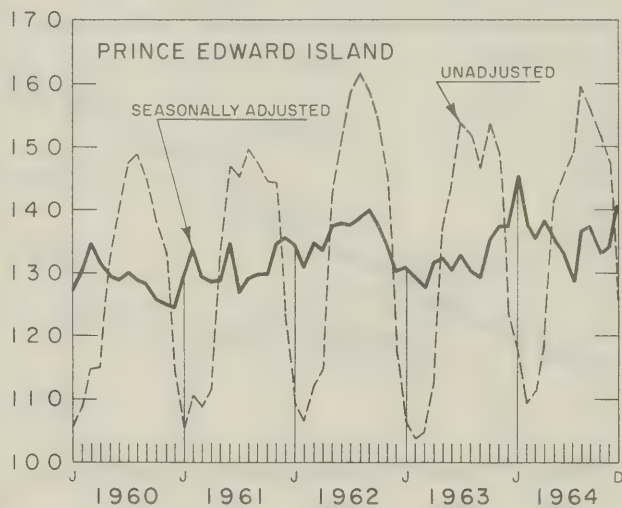

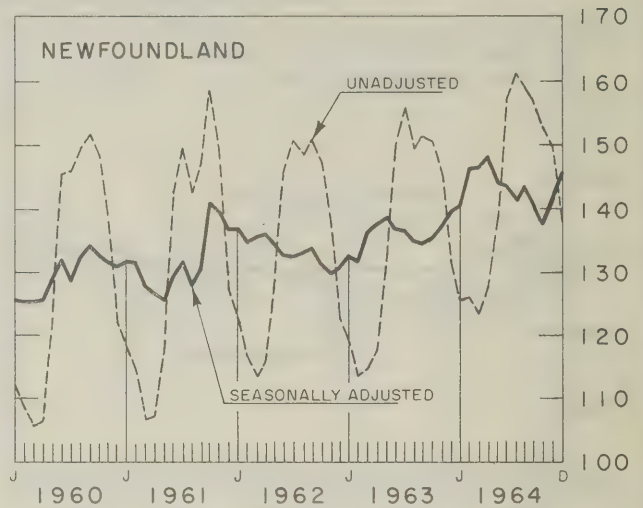

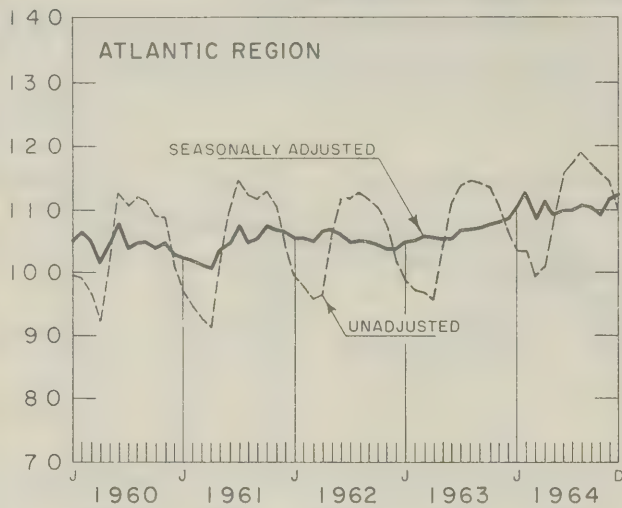

*UNADJUSTED INDEX NUMBERS FOR FORESTRY AND CONSTRUCTION HAVE NOT BEEN CHARTED BECAUSE THEY VARY GREATLY FROM SEASON TO SEASON.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA, SERVICE-PRODUCING INDUSTRIES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

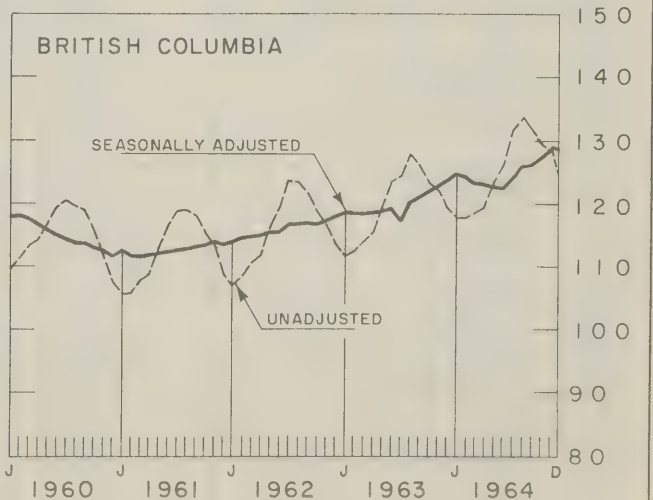

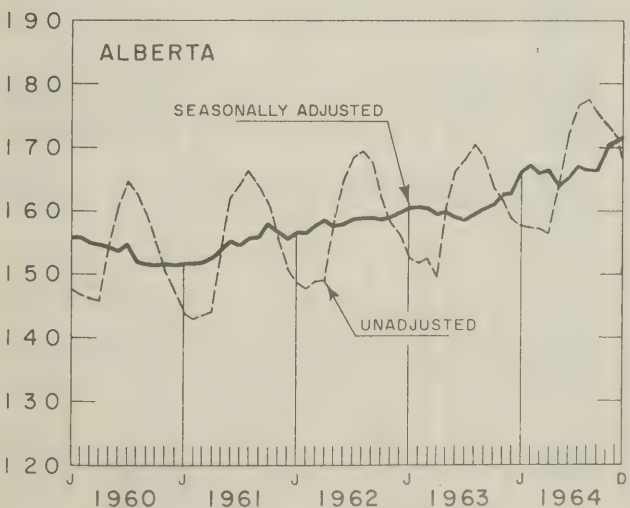

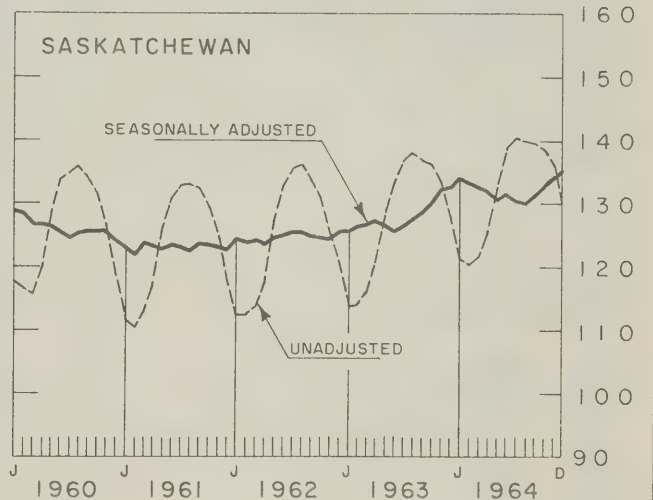

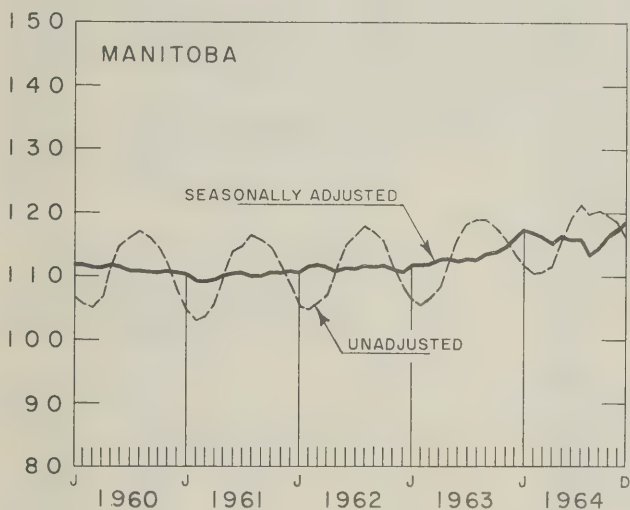

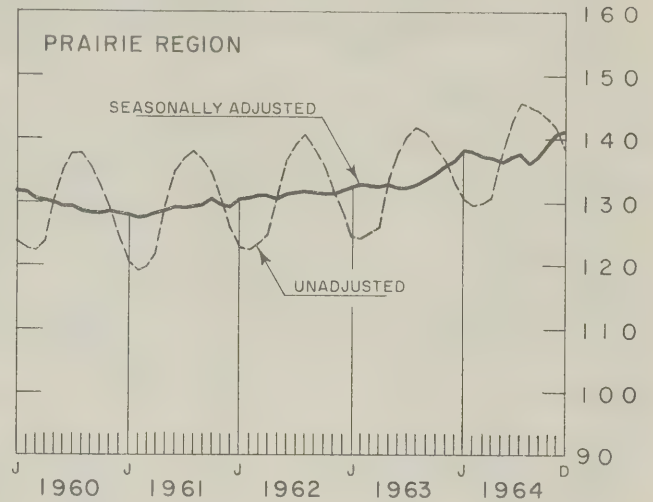

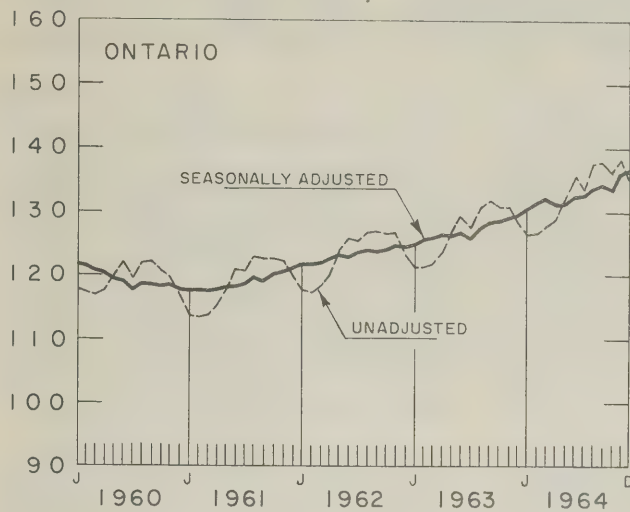

TABLE 4. Employment and Average Weekly Wages and Salaries, Canada, by Industries

Industries	Esti- mated cov- erage (w)	Employment indexes				Average weekly wages and salaries				Employees reported December 1964
		Dec. 1964	Nov. 1964	Dec. 1963	Dec. 1962	Dec. 1964	Nov. 1964	Dec. 1963	Dec. 1962	
	%	1949=100				dollars				number
Forestry (chiefly logging)	76	72.0	86.0	74.5	75.5	91.79	98.59	86.87	81.06	52,369
Mining	96	115.4	116.5	112.4	112.5	104.51	108.89	101.34	96.17	102,017

TABLE 8. Sex Distribution of Employees Reported, by Industries, Canada - Concluded

Industries	December 1964					November 1964		December 1963	
	Both sexes	Men	Women	Men	Women	Men	Women	Men	Women
	number			per cent					
Manufacturing - Concluded:									
Transportation equipment	149,679	138,035	11,644	92.2	7.8	92.2	7.8	91.9	8.1
Aircraft and parts	29,546	26,760	2,786	90.6	9.4	90.4	9.6	90.2	9.8
Motor vehicles	43,817	41,339	2,478	94.3	5.7	94.3	5.7	94.4	5.6
Motor vehicle parts and accessories	28,842	23,920	4,922	82.9	17.1	83.0	17.0	81.8	18.2
Railroad and rolling stock equipment	22,383	22,064	319	98.6	1.4	98.6	1.4	98.6	1.4
Shipbuilding and repairing	21,168	20,440	728	96.6	3.4	96.7	3.3	96.4	3.6
Non-ferrous metal products	58,177	51,869	6,308	89.2	10.8	88.9	11.1	88.9	11.1
Aluminum products	8,733	7,398	1,335	84.7	15.3	84.3	15.7	84.9	15.1
Brass and copper products	9,495	8,420	1,075	88.7	11.3	88.5	11.5	88.4	11.6
Smelting and refining	29,534	28,756	778	97.4	2.6	97.4	2.6	97.2	2.8
Electrical apparatus and supplies	90,401	62,664	27,737	69.3	30.7	68.9	31.1	69.5	30.5
Heavy electrical machinery	20,271	15,853	4,418	78.2	21.8	77.7	22.3	77.7	22.3
Telecommunication equipment	23,754	14,066	9,688	59.2	40.8	58.6	41.4	60.1	39.9
Non-metallic mineral products (k)	40,860	36,398	4,462	89.1	10.9	89.5	10.5	89.0	11.0
Clay products	4,997	4,498	499	90.0	10.0	90.2	9.8	89.6	10.4
Glass and glass products	10,574	8,259	2,315	78.1	21.9	79.2	20.8	79.9	20.1
Concrete products	10,835	10,372	463	95.7	4.3	95.7	4.3	95.3	4.7
Products of petroleum and coal	15,720	13,468	2,252	85.7	14.3	86.0	14.0	85.8	14.2
Petroleum refining and products	15,194	12,988	2,206	85.5	14.5	85.7	14.3	85.6	14.4
Chemical products	58,913	46,222	12,691	78.5	21.5	78.3	21.7	78.5	21.5
Medicinal and pharmaceutical preparations ..	8,362	4,654	3,708	55.7	44.3	55.5	44.5	55.7	44.3
Acids, alkalis and salts	10,349	9,649	700	93.2	6.8	93.3	6.7	93.6	6.4
Other chemical products (l)	40,202	31,919	8,283	79.4	20.6	79.1	20.9	79.4	20.6
Miscellaneous manufacturing industries	41,383	26,513	14,870	64.1	35.9	62.1	37.9	64.7	35.3
Construction	255,738	247,363	8,375	96.7	3.3	97.2	2.8	96.6	3.4
Building and general engineering (m)	162,299	156,550	5,749	96.5	3.5	96.9	3.1	96.4	3.6
Building	137,582	132,757	4,825	96.5	3.5	96.9	3.1	96.5	3.5
General engineering	24,717	23,793	924	96.3	3.7	96.5	3.5	95.9	4.1
Highways, bridges and streets	93,439	90,813	2,626	97.2	2.8	97.4	2.6	97.1	2.9
Transportation, storage and communication	354,868	298,964	55,904	84.2	15.8	84.3	15.7	84.2	15.8
Transportation	257,575	240,525	17,050	93.4	6.6	93.5	6.5	93.5	6.5
Air transport and airports	17,624	14,006	3,618	79.5	20.5	79.6	20.4	79.9	20.1
Railways	131,374	124,249	7,125	94.6	5.4	94.6	5.4	94.5	5.5
Maintenance of equipment	16,368	16,169	199	98.8	1.2	98.8	1.2	98.7	1.3
Maintenance of ways and structures	26,627	26,369	258	99.0	1.0	99.0	1.0	99.1	0.9
Transportation - Railways	79,391	74,423	4,968	93.7	6.3	93.7	6.3	93.7	6.3
Telegraphs	8,988	7,288	1,700	81.1	18.9	81.2	18.8	81.3	18.7
Water transportation (n)	33,082	31,330	1,752	94.7	5.3	94.9	5.1	95.1	4.9
Electric and motor transportation (o)	75,495	70,940	4,555	94.0	6.0	94.1	5.9	94.2	5.8

AVERAGE WEEKLY WAGES AND SALARIES BY INDUSTRIAL DIVISION

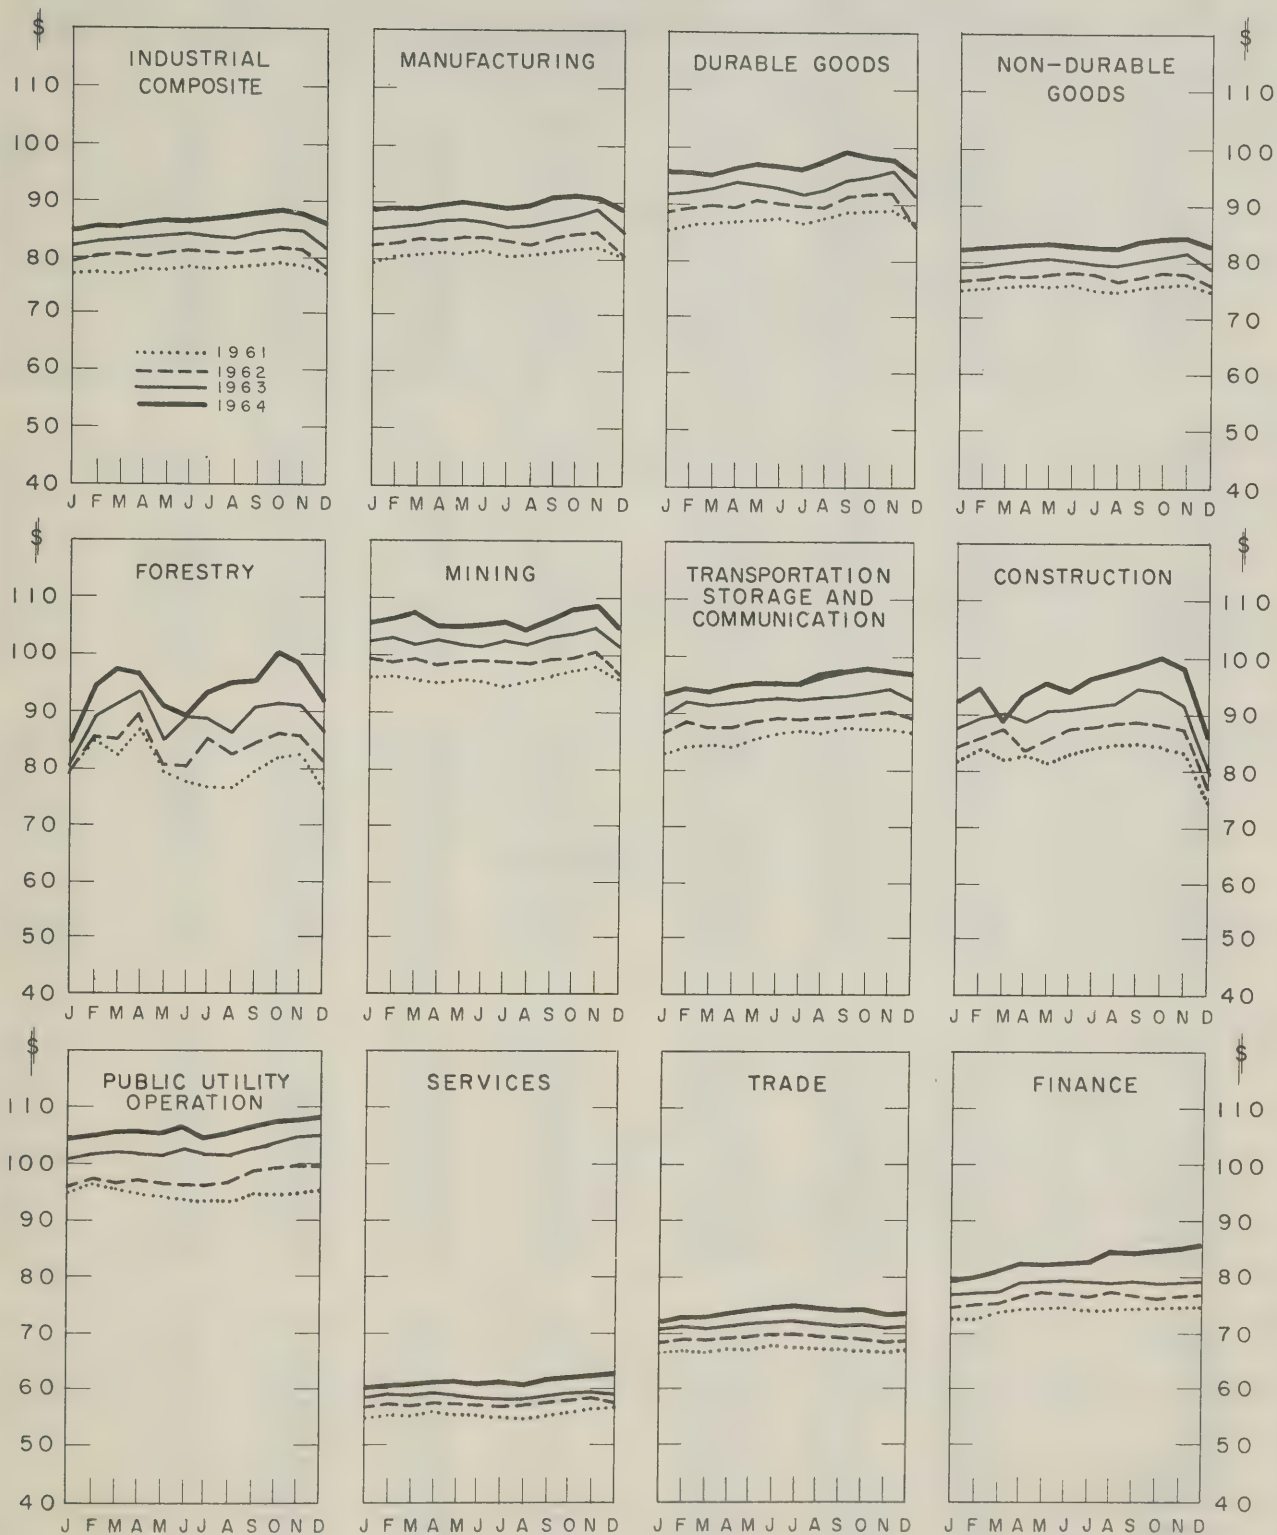

TABLE 10C. Index Numbers of Employment, for Men and Women and Proportion of Women to Total Employees Reported, Canada, Industrial Composite and Manufacturing

Year and month	Industrial composite				Manufacturing			
	Index numbers (1949=100)			Percentage of women	Index numbers (1949=100)			Percentage of women
	Both sexes	Men	Women		Both sexes	Men	Women	
Average - 1951	109.1	110.2	105.3	21.8	108.1	109.7	102.9	22.6
1952	111.9	113.3	107.1	21.6	109.9	112.3	102.2	22.0
1953	113.1	113.5	111.6	22.2	113.0	114.9	106.8	22.4
1954	109.9	109.7	109.9	22.5	107.3	109.3	100.8	22.3
1955	112.9	113.0	112.8	22.5	109.8	111.9	103.0	22.3
1956	120.7	121.0	119.5	22.3	115.8	118.1	108.1	22.2
1957	122.6	122.3	123.7	22.7	115.8	118.1	108.5	22.2
1958	117.9	116.7	122.0	23.3	109.8	111.6	104.0	22.5
1959	119.7	118.6	123.5	23.3	111.1	112.9	105.3	22.7
1960	118.7	117.4	123.1	23.4	109.5	111.3	103.4	22.6
1961	118.1	116.3	124.2	23.9	108.9	110.4	104.0	22.9
1962	121.5	119.3	128.6	24.1	113.3	114.6	109.1	23.1

NOTES

General.—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

1. Coverage.—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

**Estimated Provincial Coverage of all Paid Workers,
June 1, 1951**

Province	p.c.
Newfoundland	47
Prince Edward Island	24
Nova Scotia	51
New Brunswick	50
Quebec	62
Ontario	68
Manitoba	61
Saskatchewan.....	39
Alberta	51
British Columbia	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

2. The Questionnaire used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

3. The Processing.—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

4. The Tabulation.—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

5. The Index Numbers.—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

6. The Weekly Wages and Salaries.—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

7. Hourly Earnings.—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

8. Urban Area Statistics.—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above—named publication include Preston with Galt.

FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not** covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.
